SkootEco

CAPABILITY STATEMENT

BridgeAI Deployment Catalyst

AI for Assurance and Compliance

Audit-ready emissions data, produced by AI you can check.

SkootEco Group is a B Corporation certified carbon intelligence company. Our AI platform and expert team help organisations measure, report and reduce their emissions in line with the GHG Protocol and UK Government (DESNZ/DEFRA) conversion factors.

SCOPE	METHOD	REACH	SECURITY
Scope 1, 2 and 3, all 15 categories	GHG Protocol with DESNZ/DEFRA factors	IACC endorsed partner: 400+ venues, 18 countries	Working towards SOC 2 and ISO 27001

Deployed today

SkootEco AI. A multi-agent system that gathers data through conversation, then produces a carbon baseline, reduction plan, ISO 14068-1 alignment and EcoVadis support. Piloting with UK businesses.

Event carbon calculator. Per-event footprints built on a verified annual venue baseline (HCMI method), in use with hotel and conference venue operators.

Skoot Commute. Employee commuting survey and Scope 3 Category 7 reporting, with a confidence rating on every result.

Fleet baseline calculator. Vehicle-level emissions drawn from official UK vehicle records.

Assurance built in

Calculated, not generated. Footprints come from a rules-based engine using published factors. AI gathers and checks data; it does not invent numbers.

Data quality on every figure. Each input is tiered as verified, lagged or default, so a reviewer can see what each result rests on.

Assumptions in the open. Provisional outputs flag their assumptions and are refined as better data arrives.

Impartial by design. We advise and calculate; independent verification stays with accredited verifiers. A named lead signs off all methodology.

Proposed project: guardrailed AI for enterprise emissions assurance

TRL 5-6 TO 7-8

AI extraction and validation of invoice, utility, travel and supplier data

Anomaly and data gap detection before anything is reported

Explainable calculations a reviewer or auditor can trace line by line

Integration with the booking, CRM and ERP systems large operators already use

Partners we want to meet

AI adopters

Medium and large organisations needing audit-ready Scope 1, 2 and 3 data: hospitality and venues, events, professional services, sport, logistics and manufacturing.

Technology partners

AI and data specialists in document understanding, data validation and explainable AI.

Assurance and research

Assurance providers, universities and sector bodies working on trusted AI in sustainability reporting.

FRAMEWORKS WE WORK TO

GHG Protocol · DESNZ/DEFRA factors · SECR · CDP · SBTi · ISO 14068-1 · ISO 14067 · PPN 006 · EcoVadis · HCMI
