

Who are we?

Invisify is specializing in invisible cybersecurity appliances, patented bit-level security devices, ZTNA, and White Box Cryptography. Serving a global clientele, in multiple verticals, Invisify's' products, such as the **Invisicore**, offer unparalleled security by making critical systems undetectable and invulnerable to network attacks from inside and outside, ensuring the highest level of data protection

Problem

- Zero-day vulnerabilities are "part of life"
- Visible Tools = Visible Targets
- Firewalls Are Not Bulletproof
- OT and IT Security Remain Fragmented
- Passwords and Keys Are Broken Defenses

Solution

Services:

- Invisiflow IT** Bidirectional Separation of networks on OSI level 2 using Deep Packet inspection
- Invisiflow OT** Bi/Unidirectional, Protocol agnostic Separation of networks on OSI level 2 compliant with IEC 62443
- Invisihide** Hide existing firewalls without interfering with their work
- Invisitunnel** Secure Tunneling using White Box Cryptography
- InvisiAI** Edge AI to detect anomalies within allowed traffic using Neuromorphic Hyper Temporal Model
