# THINK TANK EMPOWERMENT AND WHOLE-CHAIN COLLABORATION: THE MODERN PROJECT PARADIGM

**Profile:** Mr. Zeng Shaohu — Member of the CPC Branch Committee of Sichuan IICG Engineering Consulting Co., Ltd., Dazhou Hi-Tech Zone; Chairman of the Dazhou Hi-Tech Zone Sci-Tech Services United Trade Union Committee; Secretary-General of the Dazhou Association for the Promotion of Sci-Tech Innovation; Chief Engineer, Co-founder and Senior Engineer of Sichuan IICG Group. **Tel: +86-18780802121**

As Chief Engineer of Sichuan IICG Group, I have witnessed the Group, driven by the dual engines of "Wisdom Brain + Qualification Matrix", continuously delivering IICG solutions for new-type urbanization.

## Think-Tank Engine: The Conversion Hub of Policy and Technology

IICG possesses exceptional policy-decoding capabilities. Together with Chengdu University of Information Technology and other universities and research institutes, it has formed dedicated policy research teams backed by a strong think tank, and developed a self-service evaluation model for government platform debt and credit, which has helped local governments obtain approved financing exceeding RMB 100 billion.

## Qualification Chain: An All-Domain Pass from Consulting to Operation

IICG holds more than 20 core qualifications covering consulting, valuation, audit, cost engineering, tendering & bidding, human resources, patents and achievement evaluation, vertically connecting the entire chain from project initiation to smart operation & maintenance. Through apprenticeship programs and jointly established disciplines with universities, IICG continuously cultivates interdisciplinary talent. It now employs over 50 professionals — including consulting engineers, asset appraisers and certified public accountants — whose horizontal collaboration powerfully drives project progress.

## Intelligent Hub: A Data-Driven Decision Revolution

The Group's digital portal system (IICG DIGITAL PORTAL) integrates multiple cloud modules — PCS, TPS, SNSS, FMS, ECS and TS — covering the management of core business processes such as finance & taxation, HR, project collaboration, and tendering & procurement. IICG has obtained more than 200 software copyrights and over 50 authorized invention patents, and has built the Group's AI staff repository, which is widely applied in internal management and project monitoring & early warning.

## Conclusion

From policy think tank to qualification ecosystem, IICG Group is reshaping the value chain of project consulting services by "turning technology into credit and credit into technology".

# GROUP PROFILE

## IICG GROUP · Sichuan IICG Group

Founded in 2016, Sichuan IICG Group is a comprehensive consulting institution dedicated to the innovation-driven development strategy, serving technology-based enterprises and government investment & financing platforms. It is a municipal technology center, a municipal outstanding service enterprise, a provincial public service institution for SMEs, a provincial technology transfer demonstration institution, an "SRDI" (Specialized, Refined, Distinctive and Innovative) enterprise and a National High-Tech Enterprise. As a new-generation force in the consulting industry, IICG Group has always focused on in-depth project consulting and financing planning, and is committed to becoming an outstanding whole-process consulting service provider.

IICG Group owns over 3,000 m<sup>2</sup> of self-purchased office space. Headquartered in the Chengdu Hi-Tech Zone of the China (Sichuan) Pilot Free Trade Zone, it has also co-built the Sci-Tech Service Building in the Chengdu Economic & Technological Development Zone. Group members include IICG Engineering Consulting, IICG Planning & Development, IICG Human Resources, Huiying Jingcheng Patent Agency, IICG Digital Technology, IICG Industrial & IT Services, IICG Tendering Agency, Jihai CPA, Park Asset Appraisal, Gongxin Construction, Gongxin Chuangfu, Laig Tech Services, Zhongshi Verification and Chuanji Innovation. The Group operates four angel investment platforms — Gongxin No. 1, Gongxin No. 2, Lingtou Capital and IICG Nengtou — and has invested in Xinda Pump & Valve Co., Ltd., FF BOND LIMITED (Hong Kong) and Seoul Fluid Power Research Institute Co., Ltd. (South Korea). It took the lead in establishing the Dazhou Hi-Tech Zone Sci-Tech Services United Trade Union and the Dazhou Association for the Promotion of Sci-Tech Innovation, and operates Dazhou Kechuangtong, the Achievement Registration Repository of the Dazhou Sci-Tech Achievement Evaluation Service Alliance, the Wanda-Kai-Chuanyu Coordinated Development Demonstration Zone Sci-Tech Integrated Service Platform, and the Kehui Cloud Platform. With offices in more than 30 regions/countries worldwide — including Chengdu, Guiyang, Chongqing, Kunming, Hong Kong (China) and Seoul (South Korea) — the Group maintains qualified teams in consulting, valuation, audit, cost engineering, tendering agency, human resources and patent agency, with more than 200 employees on staff.

IICG Group has created its proprietary sci-tech service package, offering a "4+1" service portfolio integrating whole-process consulting for construction projects, financing consulting, valuation & audit, sci-tech integrated services and angel investment. It undertakes the socialized operation of the Dazhou Branch of the National Technology Transfer Southwest Center. Leveraging its full-chain service advantages, IICG Group has established long-term cooperation with more than 80 SME service institutions, financing institutions, consulting agencies, universities and research institutes across China. It serves over 2,000 SMEs annually and has successfully planned project financing totaling RMB 100 billion for government financing platforms.

# DEVELOPMENT HISTORY

## Development History ▶

2011.08–2013.08

**Daxian Bohua Culture & Information Consulting Co., Ltd.**

We discovered that entrepreneurship requires a team — and, more importantly, keeping pace with the times.

2018

Purchased property in a prime Chengdu location and established the Group headquarters, gradually forming the "4+1" portfolio: engineering consulting / project financing / valuation & audit / sci-tech integrated services + angel investment.

2020.01

**Full launch of group-based management**

2021.03

**Sci-Tech Service Office Building construction began**

Groundbreaking of the sci-tech office building jointly built by Sichuan IICG Group, Sichuan Machinery Research & Design Institute, HIT Intelligent Manufacturing Research Institute, Shanbang Jiaoda and Xinda Pump & Valve.

2020.06

The Group completed Series B financing, led by Sanyi Nengtou with Zhonghui Group following, and opened employee stock ownership.

2021.04

**Seoul Fluid Power Research Institute Co., Ltd.**

Jointly funded by FF BOND, Seoul Hi-Tech, Dr. Park Je-ho's team (Seoul National University) and associates of Moon Jae-in — opening a new chapter of international technology cooperation.

2024.01

**Sichuan IICG Human Resources Outsourcing Service Co., Ltd.**

Focusing on interdisciplinary talent cultivation; reached school-enterprise cooperation with Chengdu University of Information Technology and other universities, making a strong entry into HR services.

2025.01

**Huiying Jingcheng Patent Agency**

Further completing the sci-tech service chain — two patent firms newly joined the Group.

Foundation  
2011–2017

Formation  
2018–2019

Development  
2020–2023

Transformation  
2024–

2017.03

**Laig Technology Services Co., Ltd.**

Refined services began, gradually extending into sci-tech services; office property in Dazhou was acquired the same year.

2014.04–2015.04

**Sichuan IICG Engineering Consulting Co., Ltd.**

Our focus shifted to project consulting on a professional path; in 2016, Sichuan Park Engineering Consulting Co., Ltd. was established in Chengdu.

2019.01

**Chengdu Park Asset Appraisal Firm established**

2019.07

The Group secured several million RMB in Series A financing; its subsidiary Gongxin Chuangfu received seed-round investment. The Group began setting up its own angel funds, planning investments in Zhongneng Jugong and Guizhou Consulting Big Data Research Institute; the public brand was gradually unified as IICG Consulting.

2022.10

**Yunnan Jihai CPA became a new member of IICG Group**

2023.10

**Sichuan Biaozhao Engineering Technology Consulting Co., Ltd. established**

To better align with building a unified national market, the Group advanced its transformation from resource dependence to market-oriented operations.

2022.12–2023.06

**Group headquarters in self-owned property, HQ apartments and Dazhou apartments put into use**

2025.05

**Took the lead in establishing the Dazhou Hi-Tech Zone Sci-Tech Services United Trade Union Committee**

2025.06

**Initiated the establishment of the Dazhou Association for the Promotion of Sci-Tech Innovation**

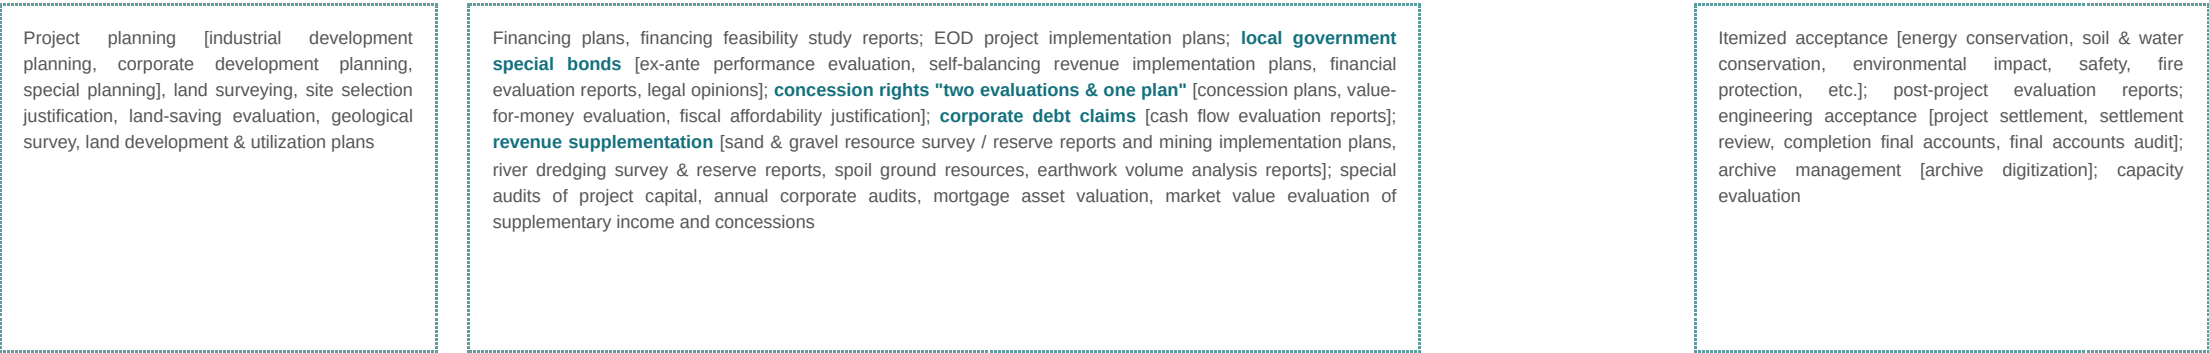

2025.10

**Guizhou IICG SME Service Co., Ltd.**

A joint venture with Qiandongnan Hi-Tech Innovation Development Group to co-build a public service platform for SMEs.

# CORE MEMBER

## Core Members

Whole-Process Construction Project Consulting | Project Financing | Engineering Cost | Tendering & Bidding Agency

### Sichuan IICG Engineering Consulting Co., Ltd.

Founded in 2014, it is a third-party institution integrating engineering consulting, engineering cost and project management. It is a registered entity on the national online approval & supervision platform for investment projects, a member of the China Engineering Consulting Association, a National High-Tech Enterprise and an SRDI enterprise. The company has more than 20 registered consulting engineers (investment) and cost engineers on staff, with branches in Henan, Guizhou and Hainan. It has long been engaged in the construction, municipal, energy, medical, education, agriculture and highway sectors, and has passed AAA-level enterprise credit certification.

### Sichuan Biaozhao Engineering Technology Consulting Co., Ltd.

A professional institution engaged in whole-process tendering & procurement consulting, providing personalized customized services and integrated project solutions. Its main businesses include tendering & procurement agency [price verification, demand justification, government procurement performance evaluation, government procurement agency, SOE tendering agency, military procurement agency, construction project tendering agency, international tendering agency, PPP project agency, bid document review], project consulting [PPP consulting, engineering consulting, financing consulting, investment & financing consulting, procurement management consulting, tendering & procurement training], engineering technology consulting, cost consulting, asset evaluation, and import & export trade.

Sci-Tech Integrated Services | Scientific Research | Technology Transfer & Commercialization | Sci-Tech Training | Technology Incubation  
Technology Market | Intellectual Property | Sci-Tech Talent | Sci-Tech Evaluation & Authentication

Guizhou IICG SME Service Co., Ltd. was established with the special approval of the Qiandongnan Hi-Tech Zone Administrative Committee as a joint venture between Qiandongnan Hi-Tech Innovation Industry Development Group and IICG Group to operate the SME comprehensive service platform, located in Building 2 of the Ethnic Cultural & Creative Park, Qiandongnan Hi-Tech Zone. The company plays three roles — policy translation, resource routing and enterprise services — turning enterprise-benefiting policies into tangible, visible and accessible dividends through digital means. It organizes policy lectures, park tours, expert clinics, public welfare training and other activities; conducts research on SME development; conveys enterprises' voices and suggestions; and puts forward recommendations to relevant departments, creating a favorable environment for the healthy development of enterprises.

### Dazhou Branch of the National Technology Transfer Southwest Center

Based at the Dazhou Municipal Science and Technology Bureau and co-established with the Sichuan Provincial Technology Transfer Center and other participating institutions, the branch takes "introducing intelligence and capital" as its starting point to build a one-stop technology transfer service chain.

### Dazhou Association for the Promotion of Sci-Tech Innovation

A social organization established under the guidance of the Dazhou Municipal Science and Technology Bureau. As a core sci-tech service platform in northeastern Sichuan, it promotes the mission of "linking innovation elements and empowering industrial upgrading". It now has more than 200 member units covering universities, research institutes, high-tech enterprises and SRDI SMEs, with core functions including resource integration platforms, enterprise empowerment services and talent cultivation programs.

### Huiying Jingcheng Patent Agency (General Partnership)

A comprehensive intellectual property service institution approved by the China National Intellectual Property Administration. The firm specializes in full-chain services including patent agency, trademark registration, copyright registration and IP rights protection. Its team consists of more than 10 senior patent agents with technical backgrounds in machinery, electronics, chemical engineering and biomedicine, serving universities, research institutes and technology-based enterprises — with outstanding performance in cultivating high-value patents in Southwest China.

### Laig Technology Services Co., Ltd.

A provider of full-lifecycle sci-tech integrated services, founded in 2017, dedicated to technology transfer, intellectual property, policy consulting and sci-tech finance. With a professional team and rich resources, it has built an online-offline service platform through the "Internet + Technology Transfer" model, serving more than 470 SMEs and facilitating financing exceeding RMB 1 billion. The company has received numerous honors and qualifications, and is a provincial outstanding technology transfer demonstration institution and an SRDI enterprise.

### Dazhou Zhixin Technology Transfer Center

Founded in 2020, it is a technology transfer demonstration institution recognized by the competent authorities, focusing on the commercialization of sci-tech achievements and industry-university-research collaborative innovation. Relying on local universities and research institutes, it has built a full-chain service system of "evaluation – incubation – transaction – implementation", with cumulative registered technology contracts exceeding RMB 100 million, serving more than 150 enterprises.

### Sichuan IICG Human Resources Outsourcing Service Co., Ltd.

A comprehensive enterprise specializing in full-chain human resources services. Its core businesses cover five major segments: human resources management, labor dispatch, service outsourcing, archive digitization and security services. It has provided professional solutions to more than 300 enterprises and public institutions, with cumulative dispatched employees exceeding 12,000 person-times. It has passed ISO14001:2015, ISO45001:2018 and ISO9001:2015 system certifications.

Valuation & Audit | Asset Valuation | Financial Audit

## Chengdu Park Asset Appraisal Firm (Limited Partnership)

Founded in 2019, it is a professional and authoritative valuation institution registered with the Sichuan Provincial Department of Finance and supervised by the Sichuan Asset Appraisal Association. It provides a full range of valuation and audit services, including enterprise value assessment, individual or combined asset appraisal, financial evaluation, tax base assessment, value consulting, judicial appraisal, special assessment, engineering cost and financial audit. The firm has more than 10 professional asset appraisal practitioners on staff, plus over 20 other professionals with intermediate and senior titles, and has established the Asset Appraisal Department, Business Review Department, Business Development Department, Risk Control & Audit Department, Administration Department and other functional departments.

## Yunnan Jihai Certified Public Accountants (General Partnership)

Founded in 2012, it is a partnership accounting firm approved by the Yunnan Provincial Department of Finance, located at 26F, Tower A, Baifuqi Commercial Plaza, No. 32 Wujing Road, Guandu District, Kunming Area of the Yunnan Pilot Free Trade Zone. The firm strictly observes professional standards and, with flexible and innovative management experience and an excellent industry reputation, has accumulated a stable and high-quality client base, with business covering all regions of the country.

## Angel Investment | Business Incubation

IICG Venture Capital is a venture capital institution focusing on seed-stage investment. It has established four investment platforms — Gongxin No. 1, Gongxin No. 2, IICG Nengtou and Lingtou Capital — investing in intelligent manufacturing, life sciences and high-tech service projects. IICG Venture Capital brings together interdisciplinary talent with innovative thinking and rich operational experience in finance and investment. With a deep industry background, leading enterprise management concepts and a professional financial service team, it has successively invested in start-ups such as Banma Industrial Design, Zhongneng Jugong, Haiji City Renewal and Linsen Traditional Chinese Medicine.

# LOYAL TO THE PARTY

Loyal to the Party ▶

## CPC Branch Committee of Sichuan IICG Engineering Consulting Co., Ltd., Dazhou Hi-Tech Zone

The CPC Branch of Sichuan IICG Engineering Consulting Co., Ltd. (the "IICG Branch") was founded in June 2017 and now has more than 10 Party members, probationary members and active applicants. Aiming to build a service-oriented Party organization and guided by the principle of "one member, one responsibility; one member, one banner", the branch follows the requirement of "strengthening organizational building, improving member quality and promoting business work", leading all members to strengthen their communist ideals and beliefs, remember the Party's purpose, fulfill their duties and give full play to their vanguard role. The IICG Branch also actively responds to the Party's call by organizing and participating in various public welfare activities, demonstrating corporate social responsibility. Its members have repeatedly been honored as Annual Outstanding Party Affairs Workers and Annual Outstanding Party Members.

## Dazhou Hi-Tech Zone Sci-Tech Services United Trade Union Committee

The United Trade Union (the "Union") is an important force uniting and leading employees of the regional sci-tech service industry. It widely covers numerous sci-tech service enterprises and has drawn large numbers of employees from sci-tech service positions. Adhering to the purpose of serving employees and promoting enterprise development, the Union actively organizes various skills training and competition activities to enhance employees' professional quality and support enterprise technological innovation. At the same time, it spares no effort in safeguarding employees' rights and interests and enriching cultural life, continuously strengthening employees' sense of belonging and cohesion. With outstanding performance in uniting employees and advancing industry progress, the Union is becoming a solid backbone for the vigorous development of the local sci-tech service industry, continuously contributing to local sci-tech innovation and industrial upgrading.

## Political Consultation · Democratic Supervision · Participation in State Affairs

To date, several employees of Sichuan IICG Group have been appointed members of municipal (district) CPPCC committees, all representing the science and technology sector. Through the CPPCC platform, they actively participate in the deliberation and administration of state affairs, offering suggestions for sci-tech innovation and development.

# CASE COMPILATION

## Case Compilation

### IICG's Growth Is Far Beyond Expectations

To date, IICG Group has undertaken more than 30 research projects at various levels; built and operated 5 provincial and municipal public service platforms, innovation & entrepreneurship platforms and expert/academician workstations; secured over RMB 100 million in policy-based funding for client enterprises (including a single grant of RMB 150 million+ for a "vacate-and-relocate into industrial park" project); planned financing exceeding RMB 100 billion for local government platforms; and paid cumulative taxes of over RMB 7 million (average annual tax payment: RMB 1.5 million+).

## Open the Gateway to Mutual Success and Co-Create the Path of Progress

**Profile:** Mr. Ai Ruquan — non-partisan; Bachelor of Laws; MBA; doctoral candidate; Senior Engineer; Senior Corporate Compliance Officer; external graduate supervisor at Southwest Minzu University; member of the 4th and 5th CPPCC Dazhou Municipal Committees; Executive President of Sichuan IICG Group.

**Http://www.airuquan.cn Tel: +86-18080821211**

In this era full of opportunities, Sichuan IICG Group extends its most sincere welcome to partners and new colleagues! To like-minded industry partners: with mature industrial chain resources, innovative technical solutions and the core values of "professionalism as our foundation, integrity for the long haul", we look forward to building strategic cooperation with you, making every handshake a starting point for mutual success. To new colleagues with dreams: we offer customized development paths, a mentorship system and cross-departmental rotation mechanisms, so that "respecting individuality and achieving value" is more than a slogan. As industry explorers carrying forward the Sichuan Army spirit, we firmly believe that the wisdom of our partners and the innovative energy of fresh talent will converge into a mighty current driving industry progress. Now, with fine tea and wine prepared, we sincerely invite you to seek development together with us — for this is not merely a business choice, but a resonance of values. The door of IICG is always open; may we join hands to write a brilliant chapter beyond expectations!
