Revolt

01

Expertise

Revolt specializes in consulting and developing **innovative Data Intelligence solutions**.

Through the application of **Data Analysis** and **Artificial Intelligence**, Revolt supports its partners to achieve multiple goals:

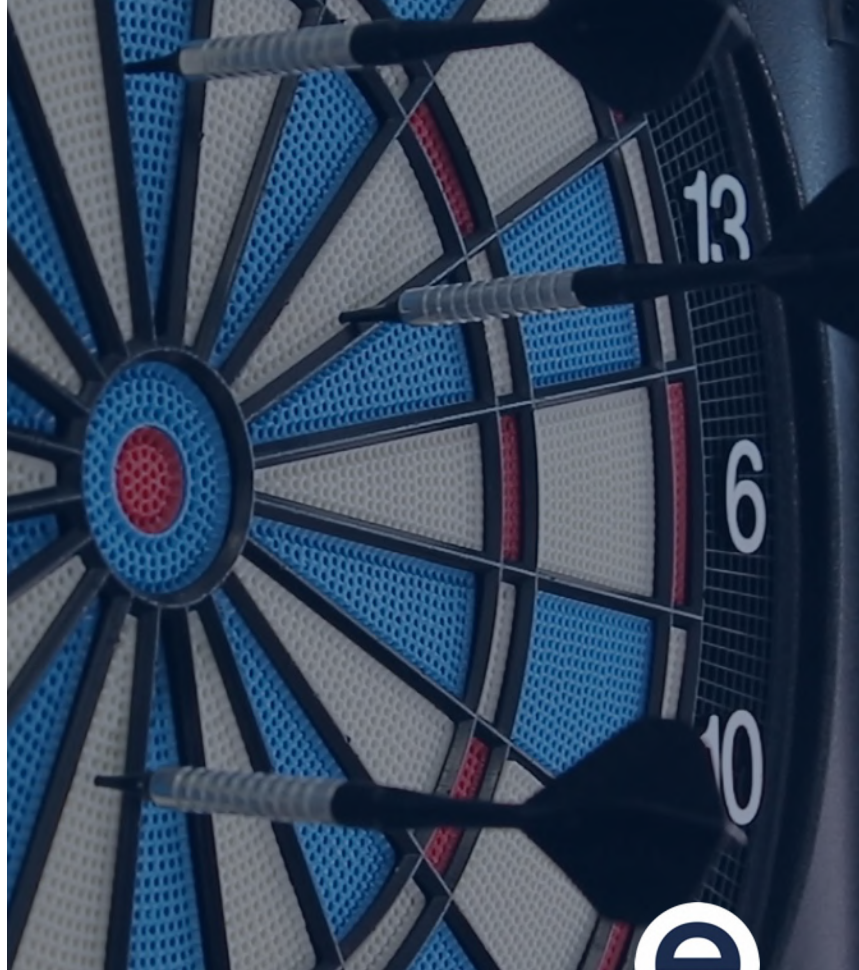

- Improve, simplify and streamline business processes and services;
- Manage risks and support corporate decision-making processes;
- Identify new market opportunities.

REPOWER

History

Solutions

#1

Development of **tailor-made solutions** with integration into **existing business processes** (without any replacement).

Developed **modules interact directly with your data visualization tool** (PowerBI, Splunk, Tableau, etc.)

BI studio

Revolt development framework that allows to manage the entire **end-to-end process**.

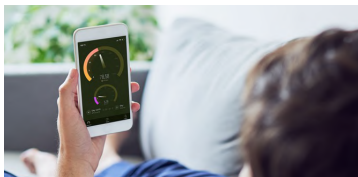

- **100% customizable** product
- 3 main modules – data **integration**, data **analysis** and data **visualization**
- **Cloud solutions** or **on-premise management**

#2

Reference Markets

Banks and Finance Automated processes for central and peripheral banking functions, from macroeconomic and risk scenario analysis to studying the impact and reputation on social channels.

Telecommunications Predictive analysis solutions on service quality and user experience, from churn rate analysis to customer base profiling.

Energy and Utilities Descriptive and predictive analysis solutions in the energy sector, from monitoring energy consumption to designing energy communities and related services for user engagement.

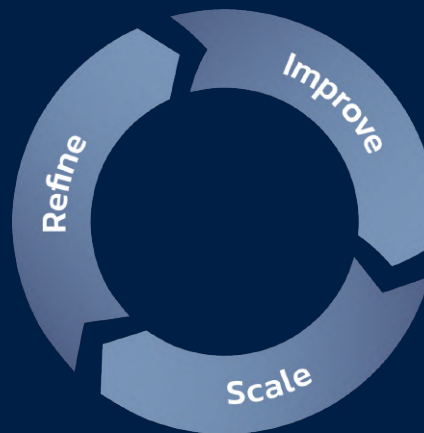

Other Markets Tailored and flexible solutions – entire end-to-end process or integration into existing processes – leveraging data analytics and Artificial Intelligence (Machine Learning, Generative AI, LLM).

Approach

Open Innovation project flow:

1. **Definition of needs and use cases**
aimed at identifying an optimal solution
2. **Rapid design of a Proof of Concept** to
test and validate the feasibility and
effectiveness of the entire process
3. **Development of the Minimum Viable
Product** to make the solution usable
and deployable in production
4. **Continuous monitoring and improvement**
of the developed solution to meet growing
needs and requirements

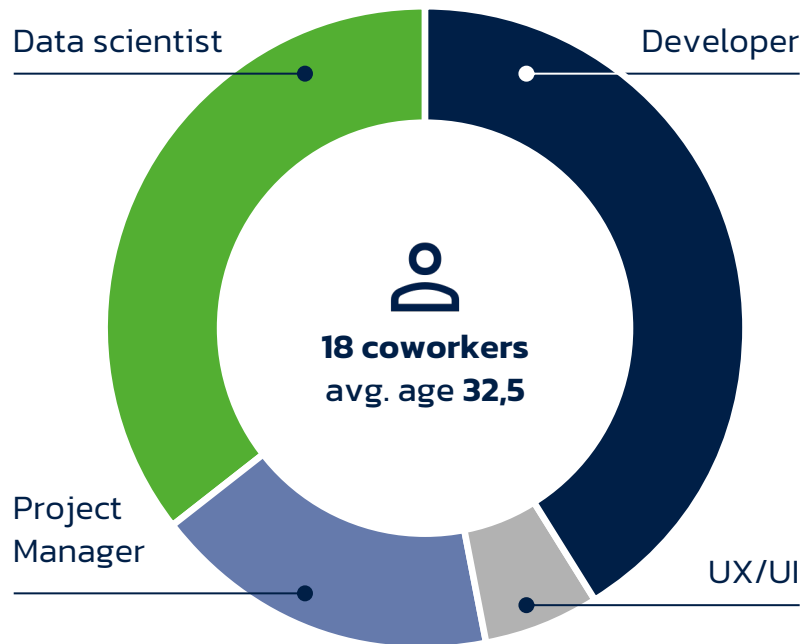

Team

02

Composition

Revolt is exactly the sum of the people who make it up: we believe in **the value of the team**, in **cooperation** and in **openness to dialogue and comparison**. When a person in our group grows, Revolt grows with them, increasing their value.

We are young activators of a process of revolution in which, at the base, there is a single strong will: to **solve problems through innovation**.

Skills

Backend

Docker **Kubernetes** Dapr
.NET Framework **C#** Python **Java**
Django **SQL** NoSQL

Frontend

Typescript **Javascript** Angular **HTML** CSS

Data science & Artificial Intelligence

Large Language Models **GenerativeAI**
Scikit-learn **MATLAB** Splunk **Excel** Simulink
Labview Tensorflow **Keras**

Products

03

**Discover the real power of data;
meet your business needs.**

Blstudio is the **Revolt development framework** that allows you to extract value from business data: a **100% customizable** product, shaped to meet the needs of your company. Without limits.

3 main modules – data **integration**, data **analysis** and data **visualization** – all in one. Artificial intelligence and Machine Learning to achieve your business goals supported by the Revolt Team.

And what about data ownership? In addition to **cloud solutions** you can choose **on-premise management**, to ensure complete respect for your governance and exclusive possession of the data.
