

# Can **you** be phished?

We have the best **phish** in the sea, ethically sourced from our community!

OutKept is an innovative **phishing simulation platform**, providing you with local, quality simulations made by our open community of ethical phishers.

Our platform is fast to implement and fully automated, offering a **new approach** to phishing simulations.

Our phishing approach offers several **key benefits**:

- ✓ Vast diversity of local phishing mails
- ✓ Reduce peer warnings during training
- ✓ Cost-effective quality campaigns
- ✓ User-friendly dashboard for tracking results

# 1 Build awareness, be compliant

## Implementation

Setting up our platform requires minimal time investment, typically estimated at 2-3 hours.

## Automation

Our campaigns are fully automated, choose a phishing frequency and press start! You can still manually add your own mails if you like.

## Compliance

Our library of cyber awareness courses can be used to provide regular training to meet your compliance needs, including NIST, NIS 2 & GDPR.

## Easy-to-use

Our platform is easy to use with an intuitive interface, you will require minimal support. Single sign-on (SSO) is available.

## Integration

Uploading and maintaining target data is simplified through CSV upload or Azure AD integration, ensuring effortless data management.

Personal Impact Statistics

Search...

Target Name	Mails Received	Mails Opened	Links Clicked
Olivia Van der Berg	21	76.19% (16/21)	14.29% (3/21)
Ethan Blackwood	21	33.33% (7/21)	0% (0/21)
Isabella Moreno	21	61.9% (13/21)	9.52% (2/21)
Jackson Steele	21	9.52% (2/21)	4.76% (1/21)
Sophia Whitman	21	4.76% (1/21)	4.76% (1/21)
Mason Rivers	20	25% (5/20)	5% (1/20)
Ava Sinclair	20	25% (5/20)	20% (4/20)
