MORE THAN 135 YEARS OF PRODUCING PAPER TUBES

**EXPERIENCE – RELIABILITY
FLEXIBILITY – QUALITY**

We produce tubes in parallel and spiral design.

We can make various types of tube printing. Your tube can be printed with the date, size, name of the company and its logo, both inside and outside of the tube.

We can make a colored surface, serrated (embossed), hydrophobized, silicone barrier and even with the application PE or double-sided adhesive tape.

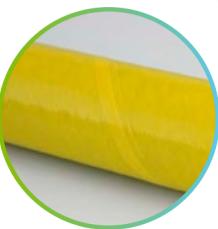

We produce tubes with different strengths and in different tolerances: length, inner and outer diameter. Your roll can be punched or cut through. We simply deliver exactly what you demand.

The inner diameter of our products begins at **6 mm** and ends at **628 mm**.

Length from **15 mm** to **8500 mm**.

The wall thickness of our products is possible from **0,6 mm** to **20 mm**.

UNIQUE PRODUCT – TAILOR MADE FORMING TUBES

Surface forming tubes inside and outside are adapted to customer requirements, including hydrophobic surface treatment.

We can provide forming tubes with directed waving, with a surface film or cord. Of course, there is our colour printing. Depending on the intended use, we can increase the life of the forming tube.

Our top know-how makes it possible to prepare and fulfill the customer's wishes while maintaining high quality and a favorable ratio of quality and price.
