*Imagine a one-stop shop for all the pre-hospital emergency equipment any mission might need—**1S2SL** is that solution.*

THE CHALLENGES 1525L SOLVES

Streamlined Combat Casualty Care

On a constantly changing battleground the need for fast and effective Tactical Combat Casualty Care (TCCC) is a key factor to retain superior combat power.

If the TCCC equipment and training is not up to date it creates a risk of losses and a decrease in combat power. Data shows that poor TCCC is one of the biggest risks of decreasing combat power.

The **1525L** concept consist of any element within ROLE 1 and 2 imaginable, with the **unique key factor** to success – simplicity! Simplicity decreases the need of education – increasing the level of success.

1525L covers equipment, processes, adoption of doctrines and education. Everything with simplicity as key to focus on the methods of treatments instead of use of specific equipment. At the same time **1525L** ensures a solid interface between any current equipment, doctrines and communication.

1525L facilitates the mission planning with the right equipment and competences at the right place at the right time. With the high level of flexibility, **1525L** also easily adapts to the doctrines of allies and at the same time is based on standardized setups to create a highly scalable concept with fully prepacked equipment solutions.

The Challenge

Poor TCCC is one of the top risks on today's battlefield.

1525L+
ONE SYSTEM TO SAVE LIVES

The Outcome

Fully pre-packed, scalable mission solutions.

COMMITTED TO SAVING LIVES

Since 2004, AP Services has delivered advanced equipment, tailored solutions, and expert support to military, police, EMS, and global organizations. We're committed to saving lives, preventing disabilities, and elevating emergency care by equipping professionals and everyday individuals with the right tools in any environment.

Through rapidly deployable proven total solutions with high mobility within ROLE 1 and 2, the **1S2SL** concept (1 System 2 Save Lives) strengthens the Armed Forces' ability to reduce losses as well as maintain and recreate combat power during the high-intensity scenarios defined in **UDSYN 2024**.

ABOUT 1525L

Simplicity
Modularity
Scalability

A Modular Medical System
Designed to Save Lives Across
the Full Spectrum of Military
Operations enabling the Armed
Forces' ability to reduce losses as
well as maintaining and recreating
combat power.

Battlefield-Ready Care

1525L is built for modern military operations, enabling medical personnel to deliver critical care even in denied, resource-limited environments with extended evacuation times.

Modular & Scalable

Designed to function across the full spectrum of operations—from minor injuries to mass casualty and contaminated environments—**1525L** adapts to any mission's medical demands.

Everything Doctrine-Driven

Fully integrated with leading treatment guidelines like TCCC, RDCR, and PFC, **1525L** ensures the right interventions at the right time, every time.

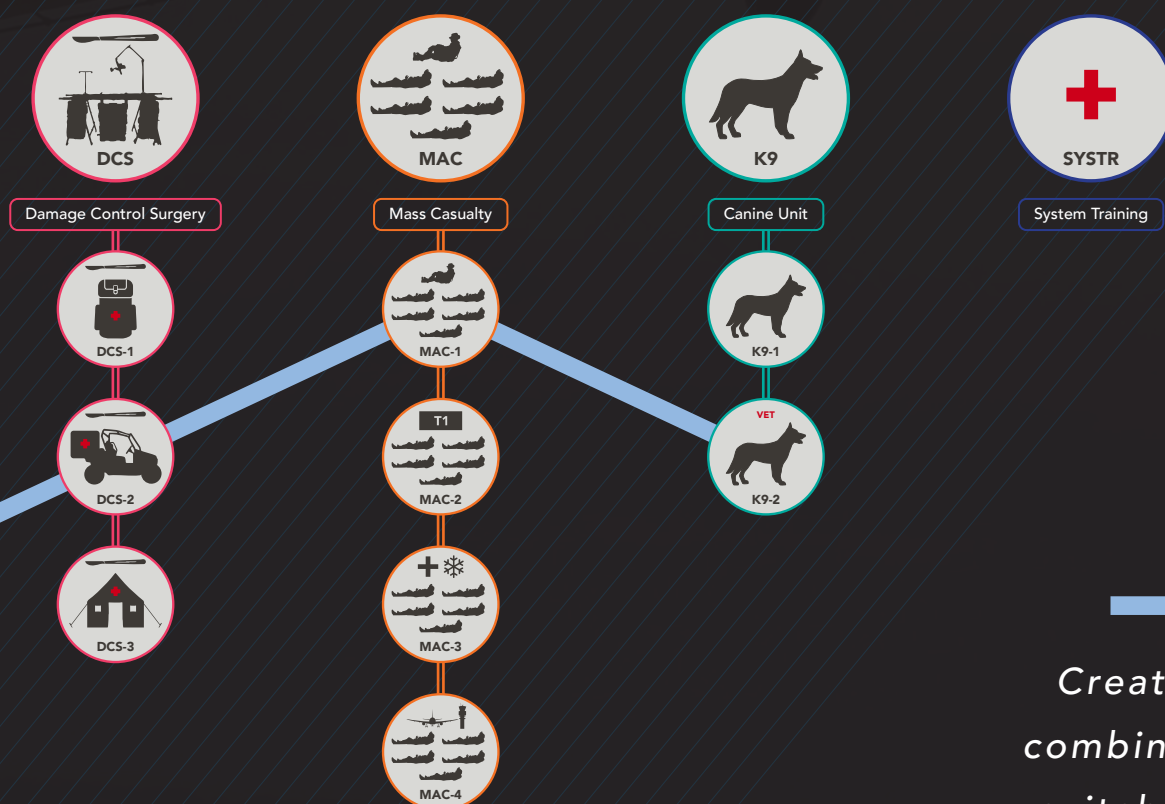

MORE THAN 11,500 WAYS TO CONFIGURE 1525L

OPERATIONAL IMPACT & VALUE

Based on the Danish Chief of Defence's military professional recommendations, within a heavy brigade build-up and procurement of soldier equipment to enforce resilience and **UDSYN 2024**, the effect and added value of a total **1525L** will be:

PARAMETERS	CURRENT LEVEL		FUTURE LEVEL WITH 1525L
Response time	Medium	→	High
Standardization of equipment	Medium	→	High
Interface security	Low	→	High
TCCC education	Basic	→	Confident
Readiness	Low	→	High
Logistik and maintenance	Advanced	→	Simple

Preserve Your Force*

ROLE 1 & 2: PERSONNEL, KIT & CAPABILITIES

● **ROLE 1** according to STANAG 2228, AJP-4.10

Personnel & Competencies:

- Combat Medic / Corpsman / Paramedic
 - Trained in TCCC (Tactical Combat Casualty Care)
 - Proficient in haemorrhage control, airway management, needle decompression
 - Medical Officer (Physician / Physician Assistant)
 - Triage, stabilization, limited resuscitative procedures
 - Primary care, preventive medicine
 - Medical NCO / Nursing Assistant
 - Wound care, vital sign monitoring, patient prep for evacuation
-

Key Equipment:

- Aid Bag / Medic Kit (IFAKs, haemorrhage control, airway tools)
 - Portable suction device
 - Defibrillator / AED
 - Oxygen supply (portable)
 - Evacuation gear: litters, splints, blankets
 - Communications gear for MEDEVAC coordination
 - Minimal diagnostics: pulse oximeter, BP cuff, thermometer
-

Capabilities:

- Immediate TCCC-based interventions
- Sick call and minor injury treatment
- Triage and stabilization for evacuation
- Psychological first aid
- Medical documentation and tracking
- 24-hour capability with limited holding (usually <12 hours)

● **ROLE 2** according to STANAG 2228, AJP-4.10

Personnel & Competencies:

- Medical Officer (General Practitioner / Emergency Physician)
 - Surgeon (trauma/general)
 - Anaesthetist / Nurse Anaesthetist
 - Operating Room Nurse / Surgical Technician
 - Emergency Nurse / ICU Nurse
 - Medical Laboratory Technician
 - Radiology Technician
 - Medical Logistics and Administration Staff
 - Evacuation Coordinator / Liaison Officer
-

Key Equipment & Infrastructure:

- Field Operating Theatre (sterile area, lights, operating table)
 - Anaesthesia machine, surgical instruments
 - Blood transfusion and fluids management
 - Laboratory capability (haematology, blood typing, infection screen)
 - Radiology (portable X-ray or ultrasound)
 - Medical resupply & refrigeration
 - Power supply systems, lighting, HVAC for climate control
 - Ambulances or CASEVAC platforms
 - Shelters or containers/tents (modular or hardened setup)
-

Capabilities:

- Damage Control Resuscitation (DCR) and Damage Control Surgery (DCS)
- Initial wound and fracture management
- Short-term patient holding (typically up to 72 hours)
- Basic diagnostic support (lab and imaging)
- Pharmacy support (essential medications, antibiotics)
- Coordination of medical evacuation (MEDEVAC/ CASEVAC)
- Medical records and reporting (NATO standard formats)
- Limited preventive medicine and environmental health surveillance

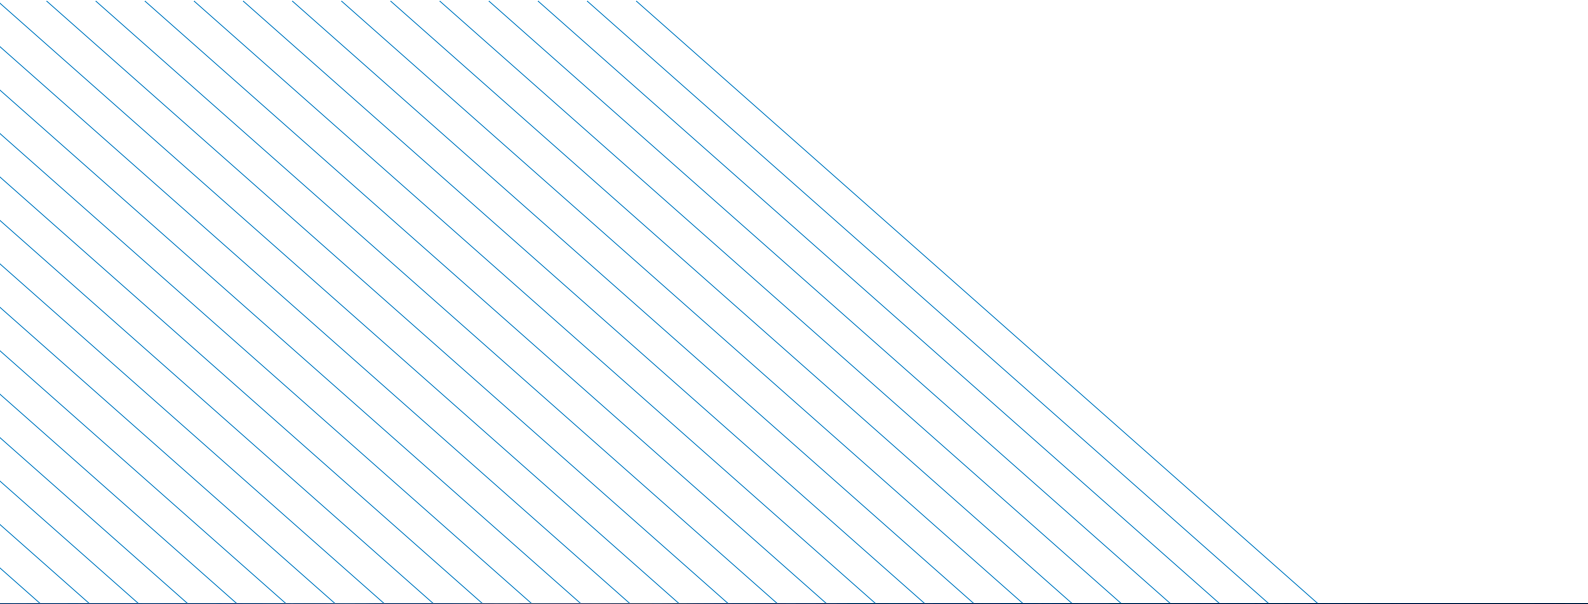

STRATEGIC STOCKHOLDING ...WE GOT YOUR BACK

It take a system to save lives.

An effective system needs an effective logistic set-up to perform and ensure security of supply.

As part of our commitment to ensuring uninterrupted supply and operational readiness, AP Services offer the Armed Forces the option of strategic stockholding at AP Services warehouse facilities in Denmark. AP Services will maintain a dedicated safety stock of the goods included in **1525L**, enabling rapid deployment and guaranteed availability, even in times of unforeseen demand or supply chain disruption.

AP Services' storage solution is secure, flexible, and scalable, and we can tailor stock levels to the specific operational requirements and lead time expectations. Inventory is managed with full traceability and transparency, with regular reporting and the possibility of integration with other logistics systems. This service ensures that critical items are always within reach—supporting the missions, reducing risk, and strengthening readiness.

OUR SUPPORT TO UKRAINE

Since the beginning of the conflict, we have actively supported Ukrainian defence and medical forces with critical equipment and life-saving solutions.

Many of the delivered products are our own **NORSE RESCUE®** brand, trusted for reliable, TCCC-compliant solutions in frontline trauma care.

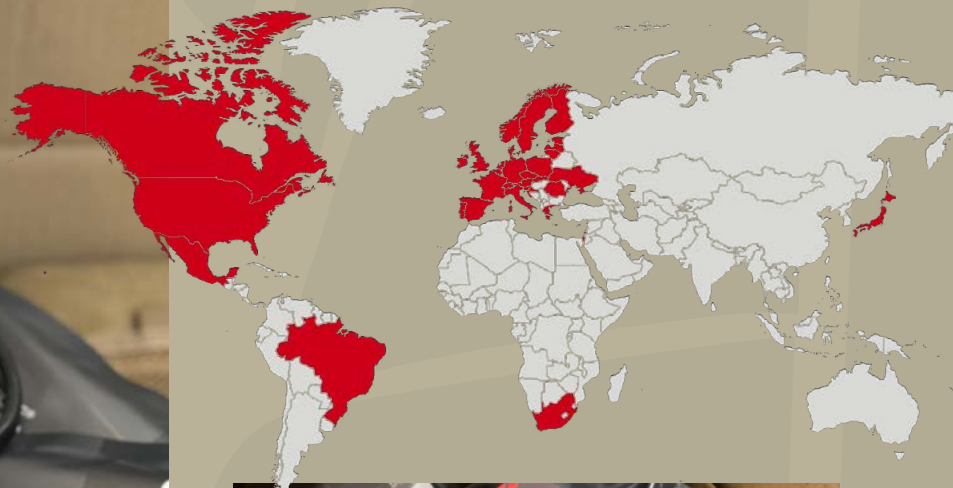

WHAT IS NORSE RESCUE®

*With **NORSE RESCUE®**, we provide our own line of reliable and affordable products—ensuring everyone can access emergency care solutions without compromising on quality.*

We have over **100 resellers** spanning **30 countries**

*We're here when
you need us—
reach out anytime.*
