

**YOUR PARTNER IN
INDUSTRY SOLUTIONS**

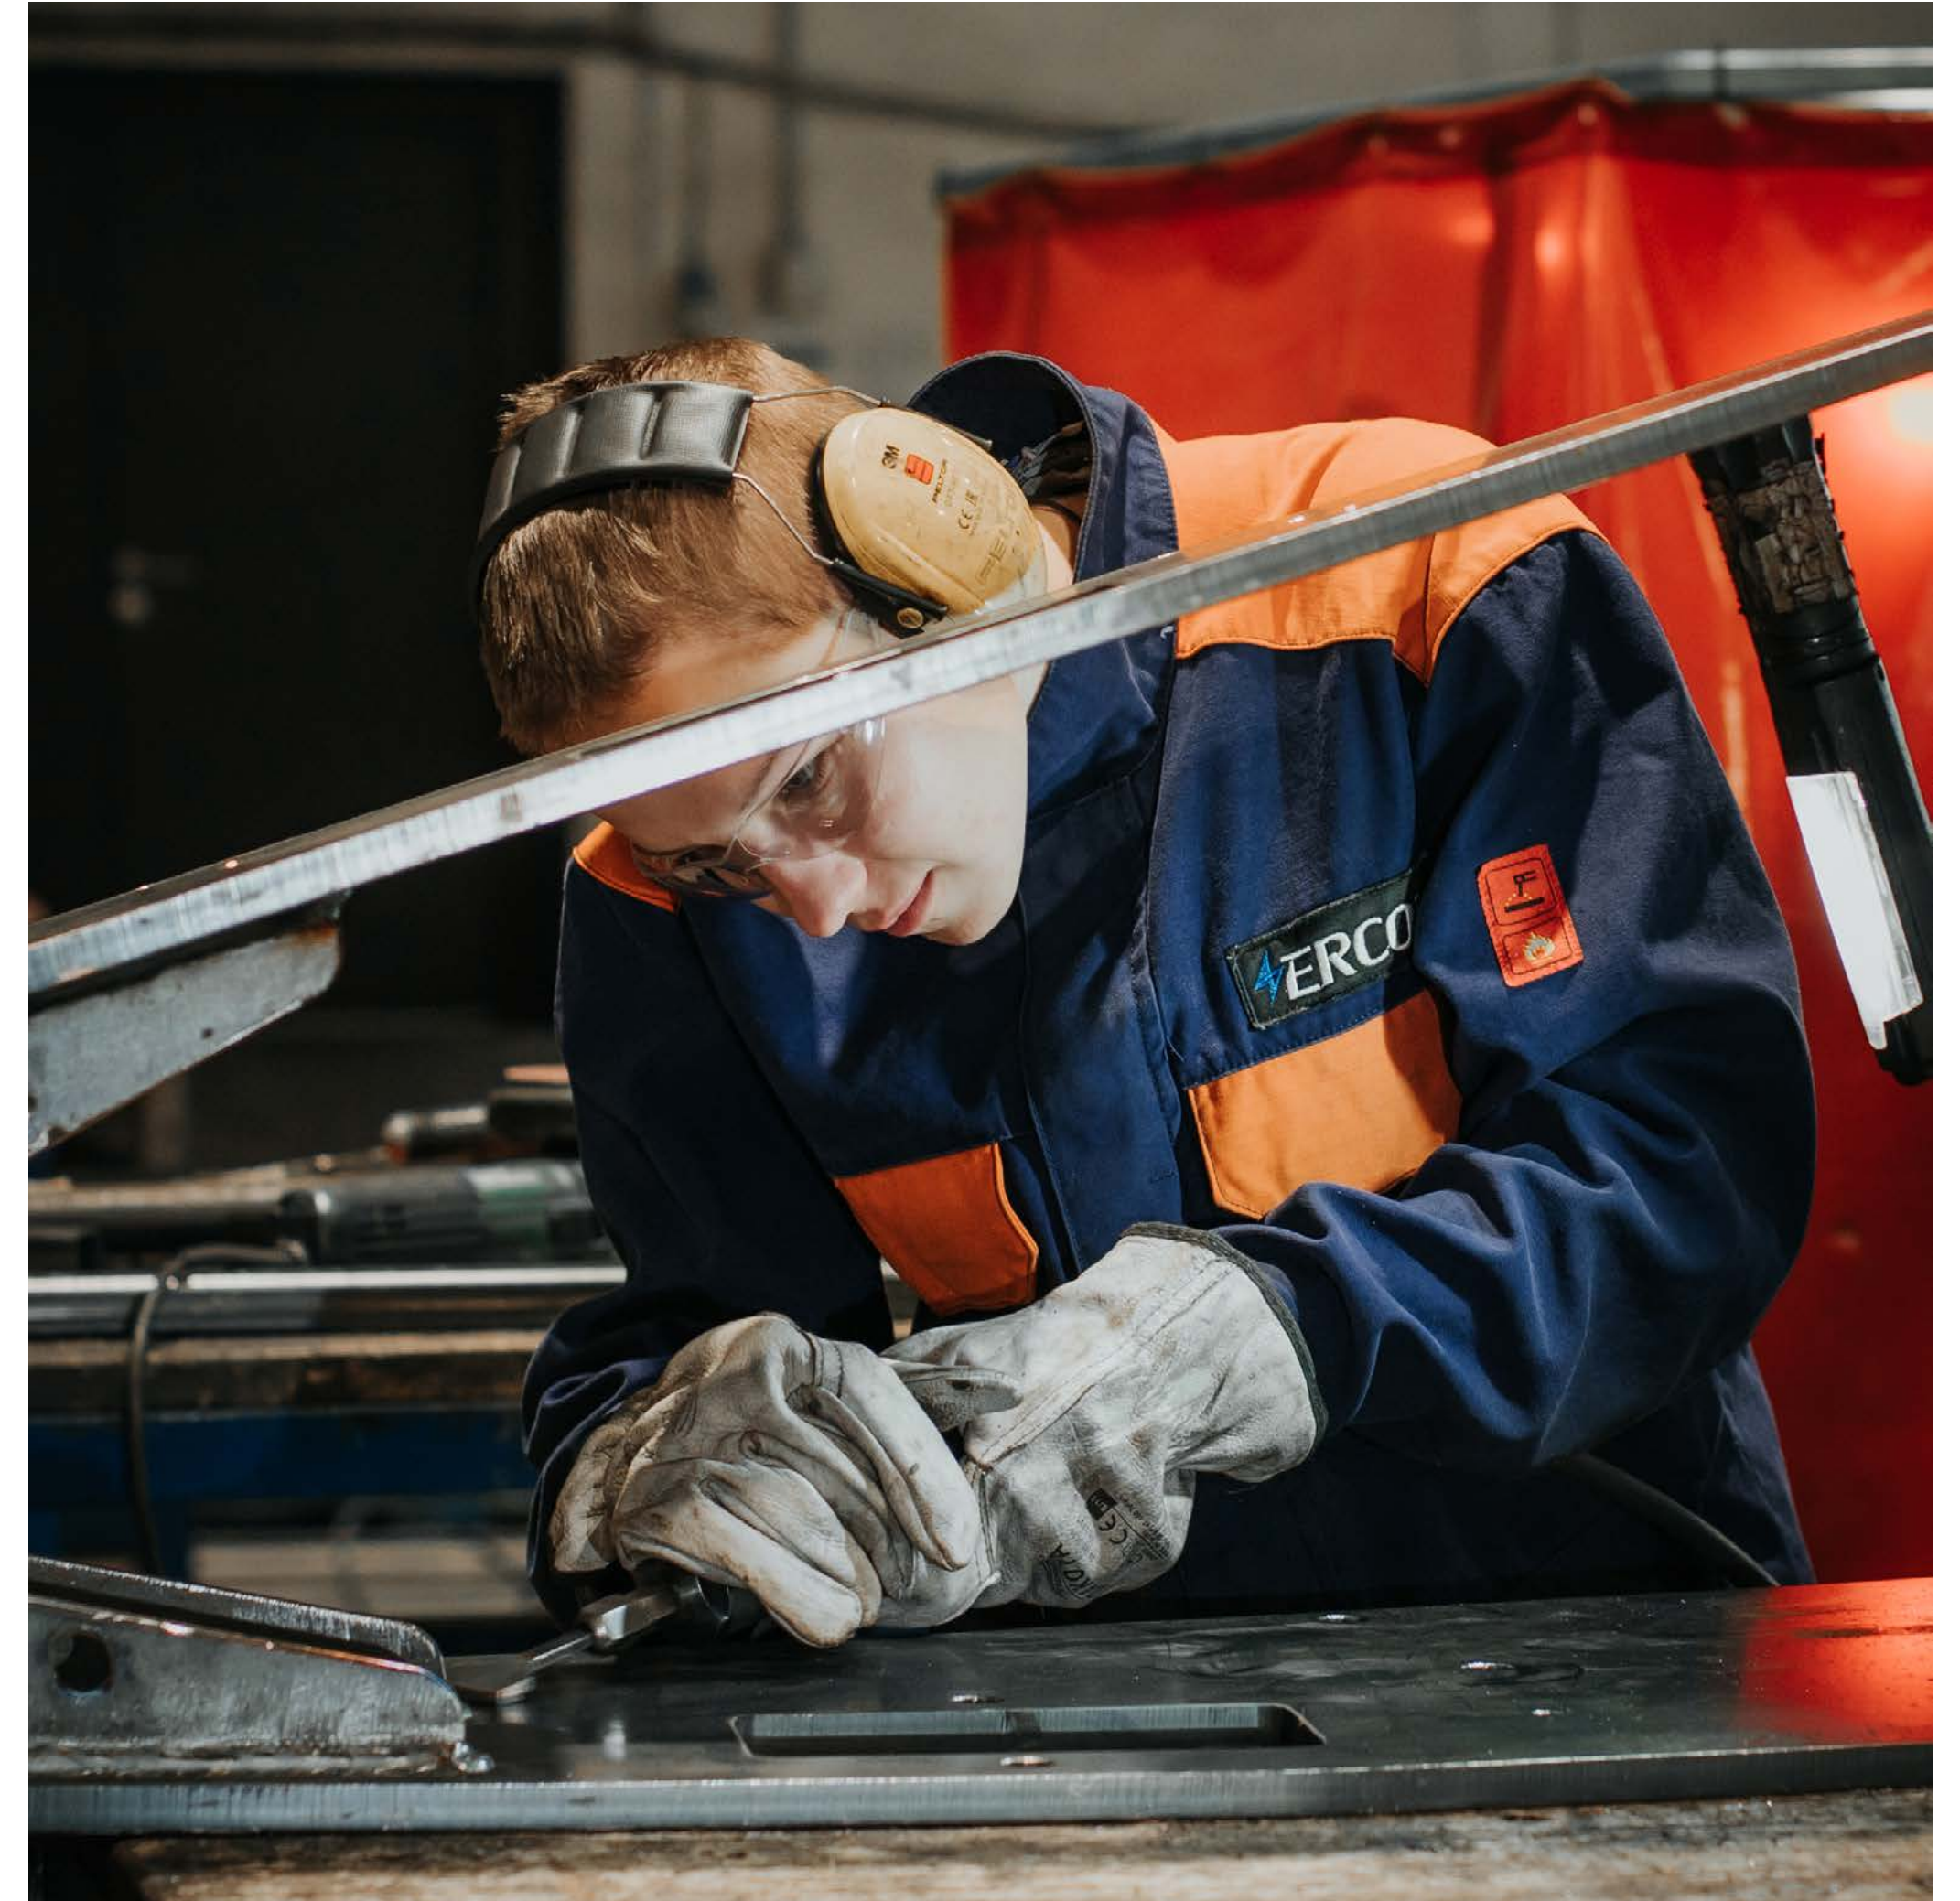

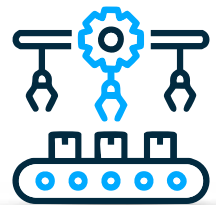

ABOUT COMPANY

ERCON is a Latvia-based family-owned company, passing down knowledge and expertise through generations.

With over 30 years of operational history, the company has become a dynamic and competitive force in the metal industry.

Timely delivery of high-quality work consistently remains our primary commitment.

OUR MISSION

To be a trusted partner in the metalworking industry and supply top-level goods and services.

ERCON UNTIL 2025

Founded

IN 1993

Manufacturing premises

5000 M2

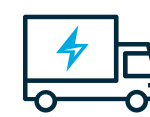

Of space fully equipped with modern equipment and bridge cranes

+4000 m² under development

No. of employees

140

Volume of exported products

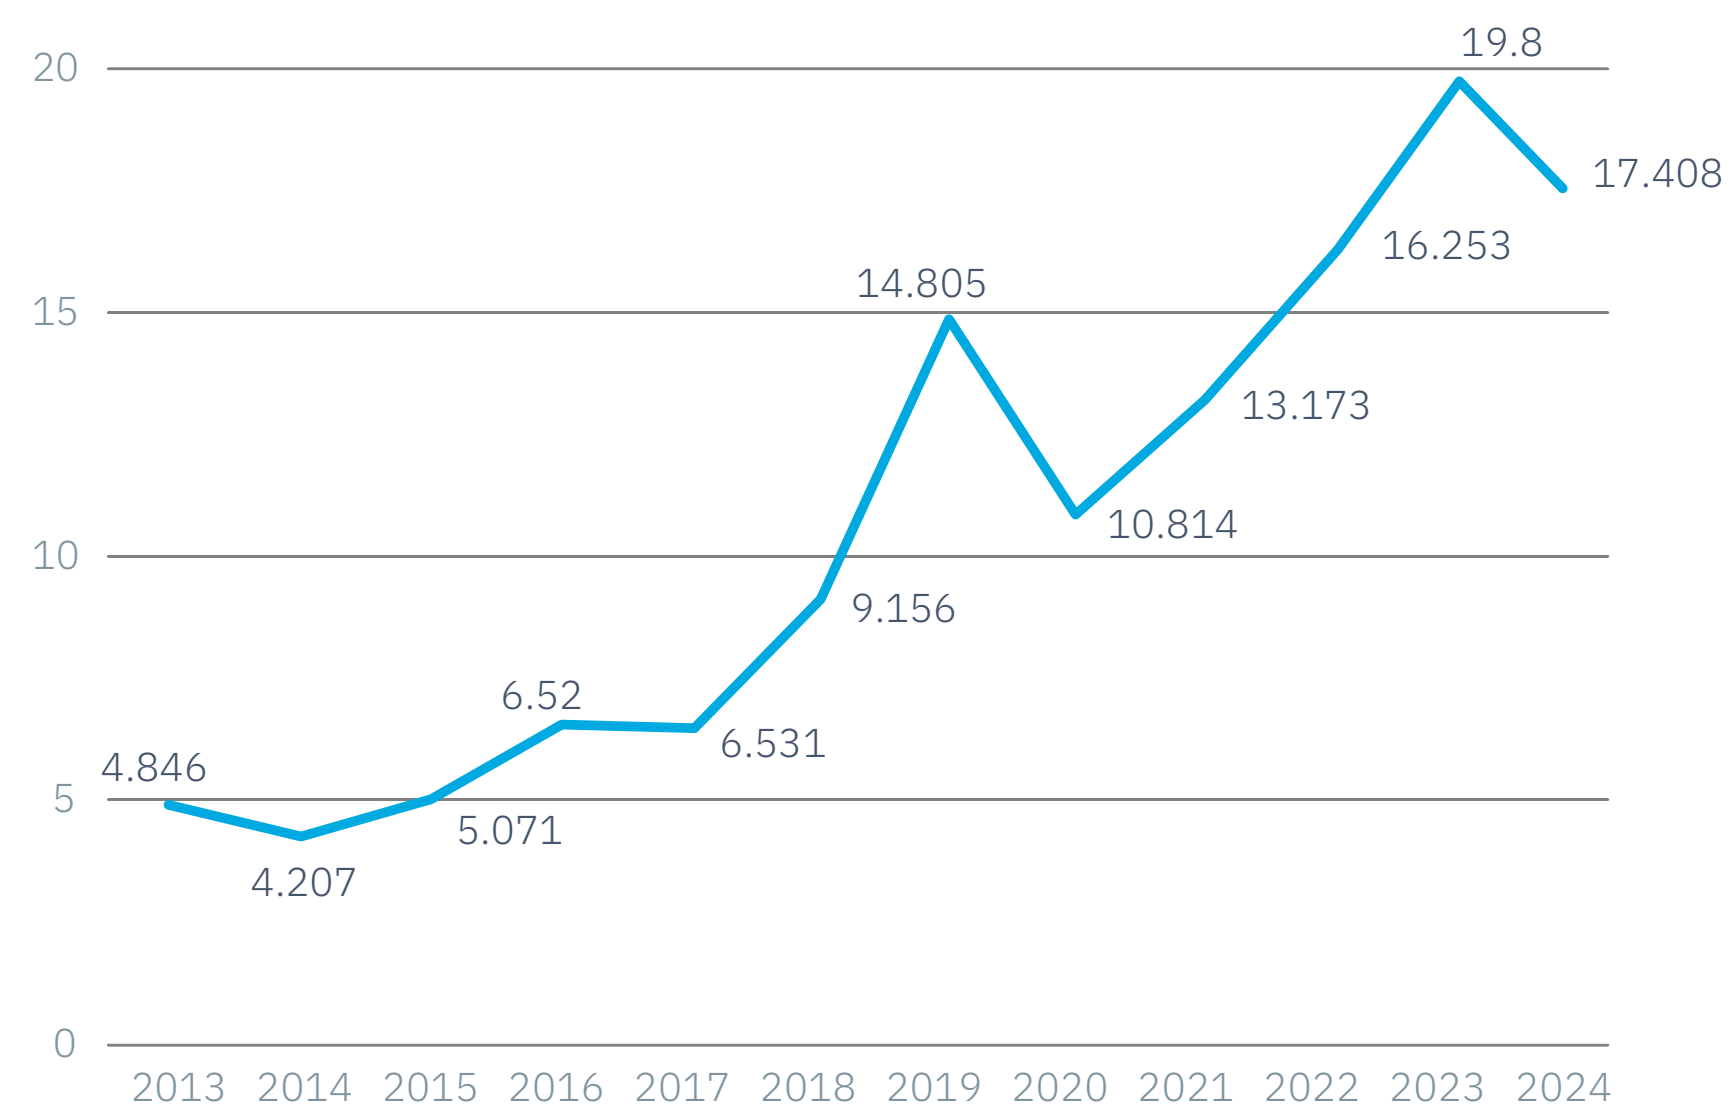

100%

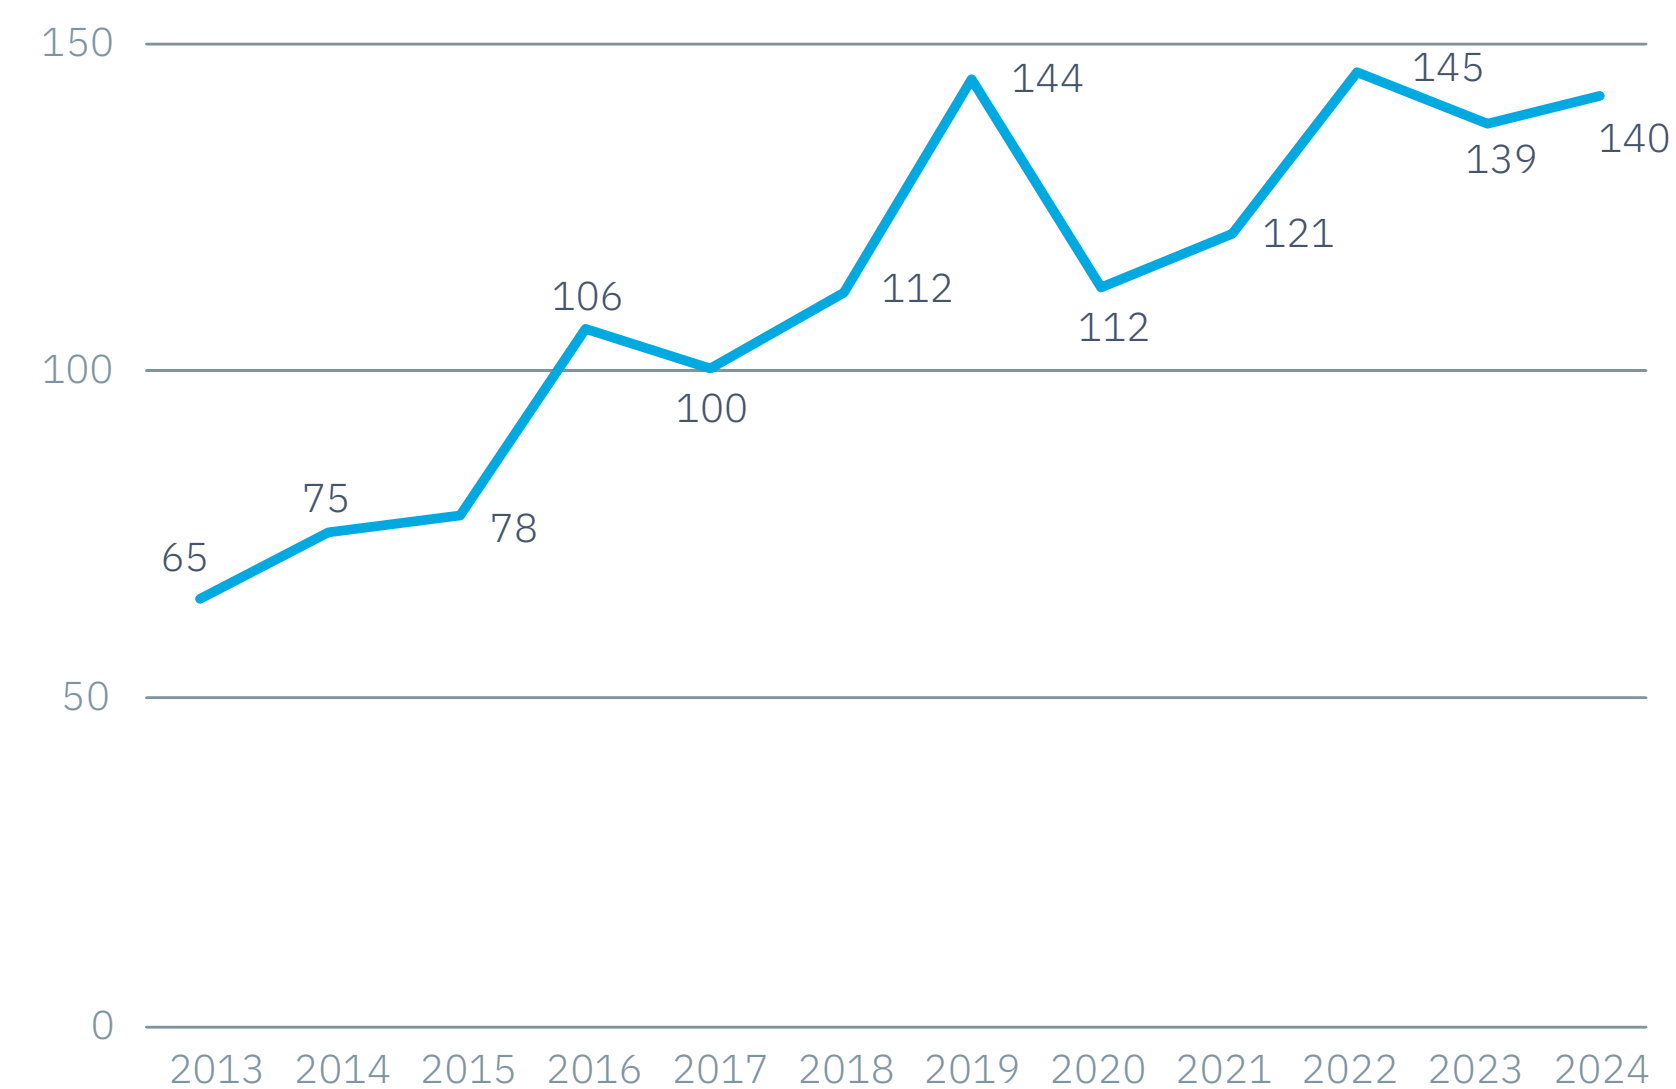

STATISTICS

⚡ Turnover EUR, millions

MARKET SEGMENT

INDUSTRIES AND PRODUCTS

⚡ Railway

Wagon parts
and components

⚡ Food processing

Stainless steel construction
and pipe racks

⚡ Pulp and paper

Industrial equipment
Bunkers and tanks

⚡ Steel plants

Special machines
and equipment

⚡ Mining

Conveyors and chutes
Special machines and equipment
Hoisting systems

⚡ Log handling

Sawmill equipment
Log handling machine parts as
chassis, booms, grapples etc.

⚡ Industrial buildings

Structural steel
Service platforms,
railings and gratings

⚡ Industrial equipment

Special machines
and equipment

⚡ Agriculture

Machine parts welded
components
Drawbars and platforms

⚡ Wood handling

Special machines
and equipment
Moving floor systems

⚡ Lifting

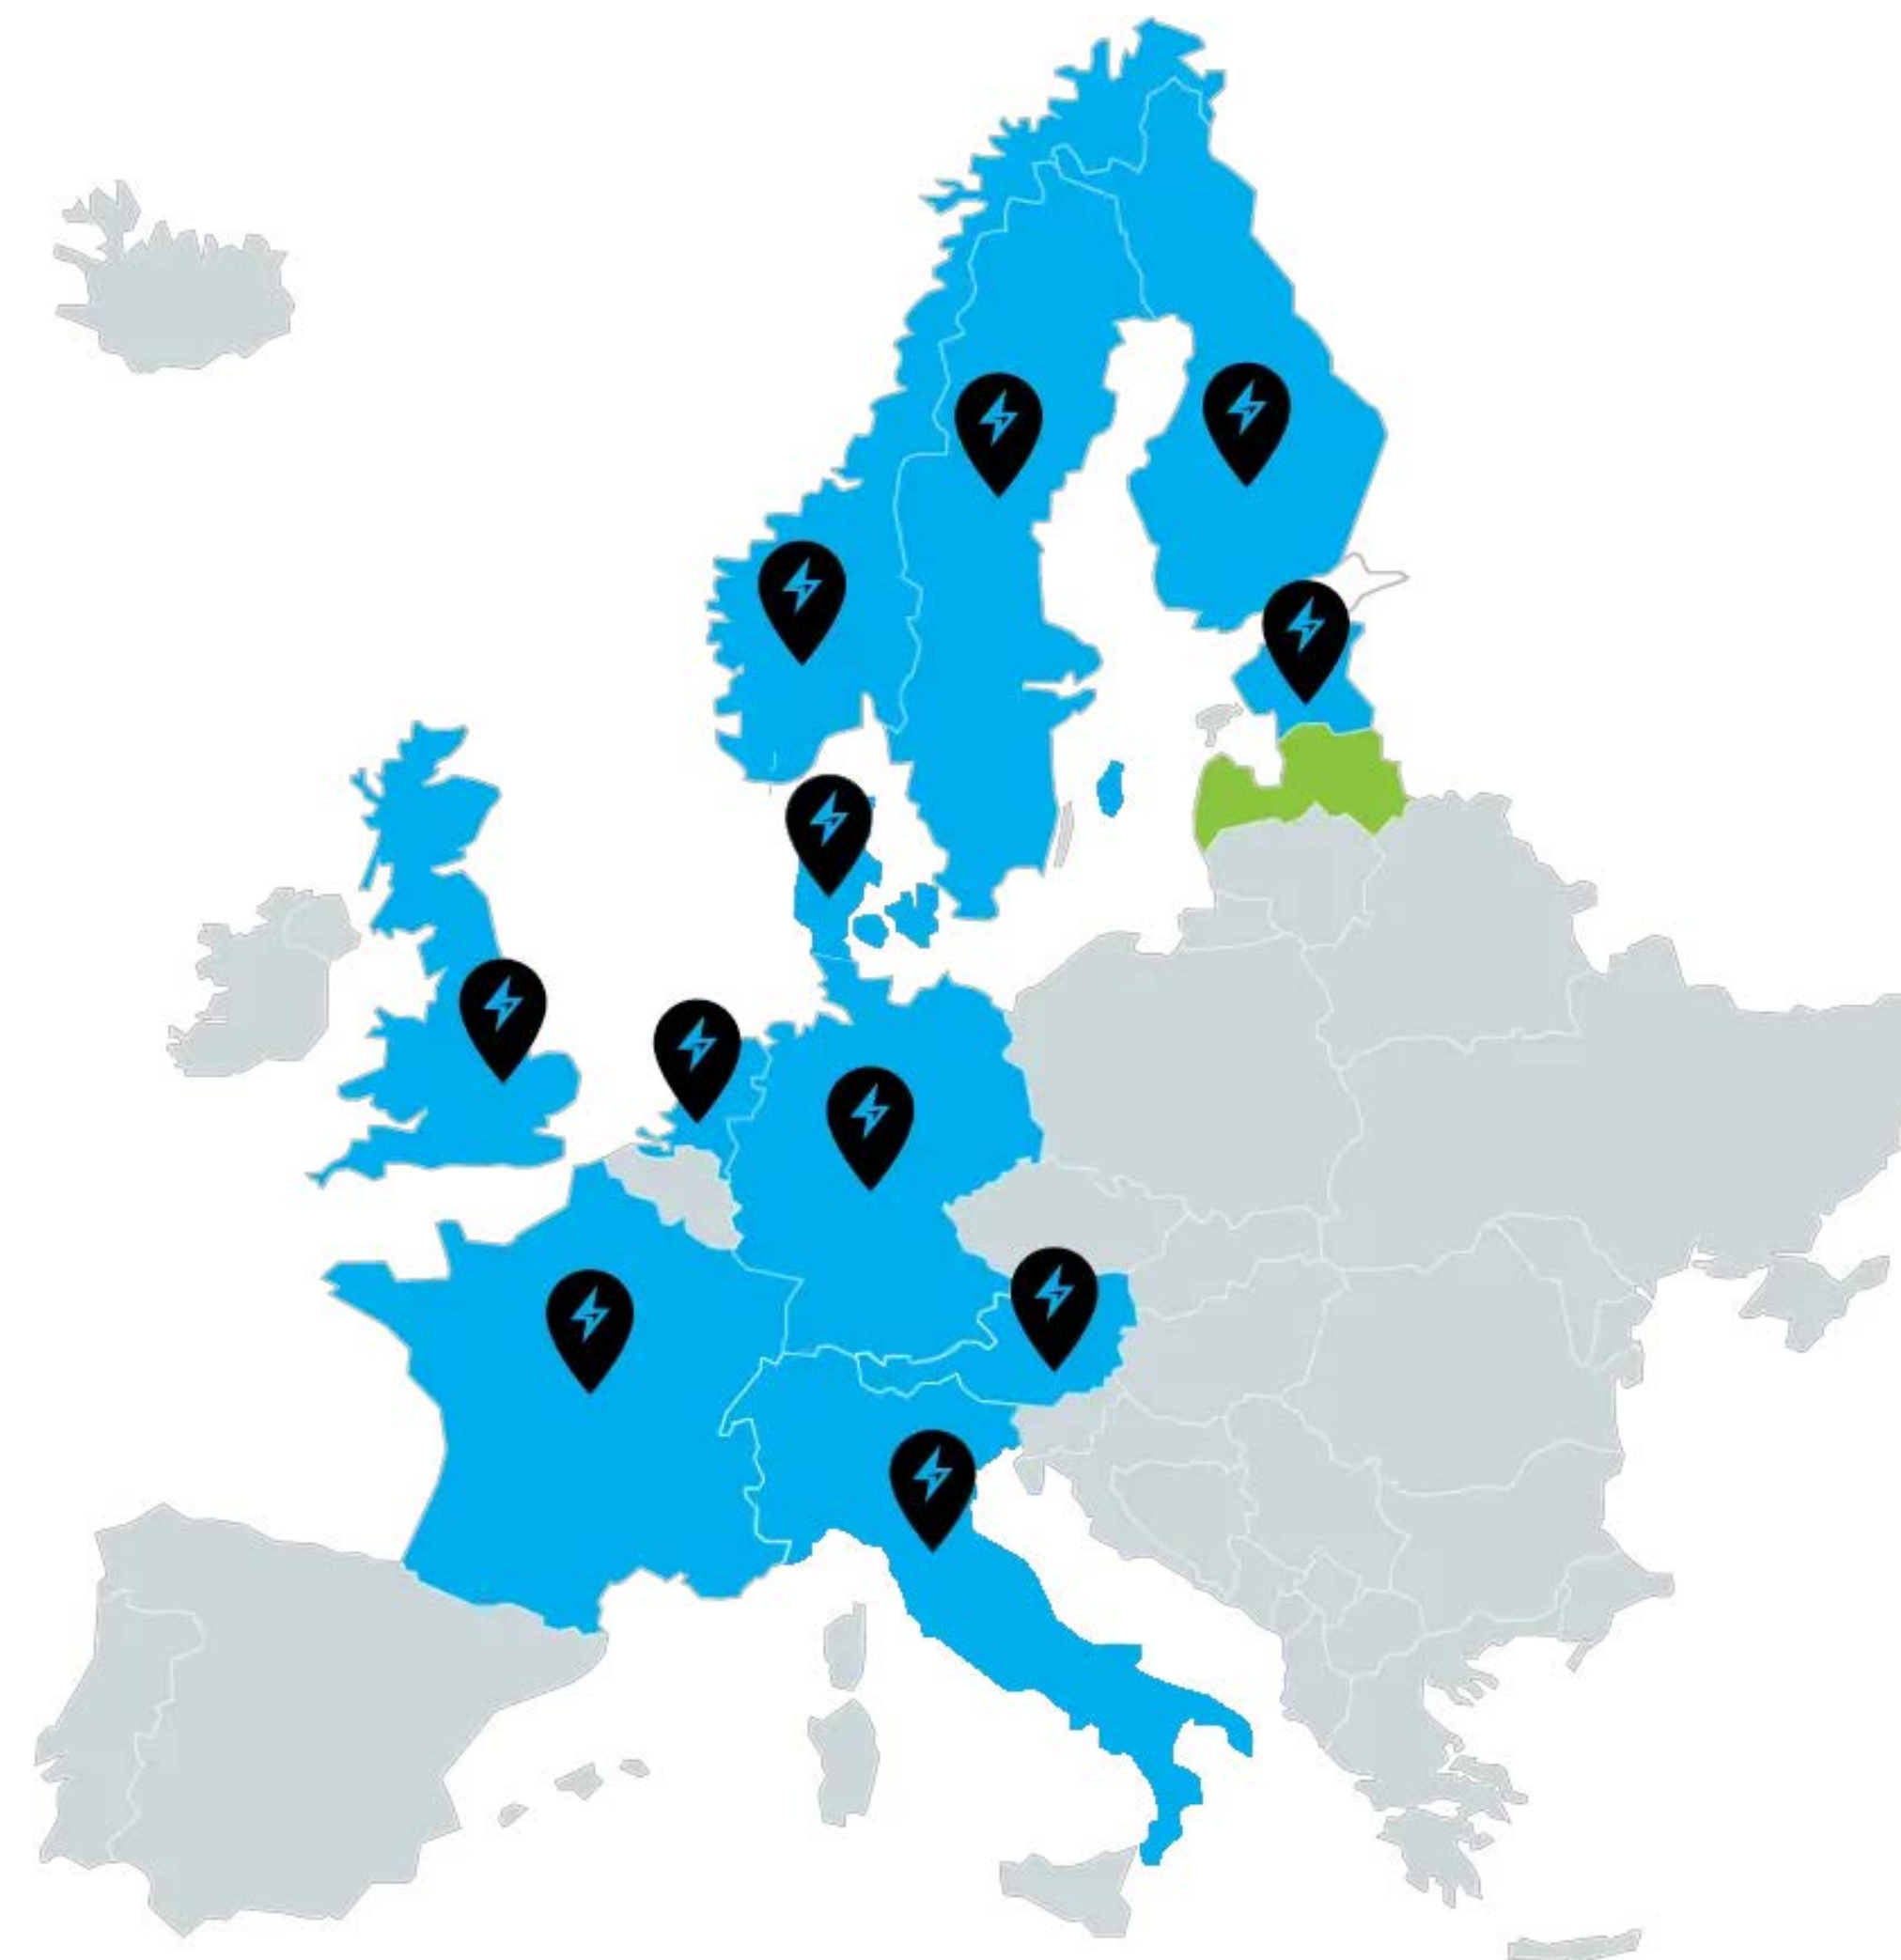

Lifting equipment

⚡ Automotive

Transport racks
and pallets
Lifting equipment

EXPORT COUNTRIES

- ⚡ Denmark
- ⚡ Germany
- ⚡ Sweden
- ⚡ Netherlands
- ⚡ Estonia
- ⚡ Finland
- ⚡ Norway
- ⚡ United Kingdom
- ⚡ France
- ⚡ Austria
- ⚡ Italy

WHAT DO WE OFFER

QUALITY

- ⚡ ISO 3834-2
- ⚡ ISO 9001
- ⚡ ISO 45001
- ⚡ ISO 14001
- ⚡ EN 1090 EXC – 4 Certified
- ⚡ In house IWE Welding Engineers
- ⚡ In house NDT Inspectors
- ⚡ Frosio Inspector Level-2
- ⚡ Integrated quality control system

PROJECTS MANUFACTURING

ERCON handles full production cycle, from sketches to delivered products.

We offer diverse advanced equipment and tailor solutions for complex projects. We closely monitor production stages, continuously enhancing systems for consistent quality and on-time delivery.

- Engineering and drawing preparation
- Manufacturing and welding
- Non-destructive testing for welded seams
- Surface treatment for steel structures
- Assembly with components
- Factory Acceptance Test
- Packing up to customer requirements and delivery

PROJECTS MANUFACTURING

Product portfolio

- Conveyors and material handling equipment
- Log handling machines and sawmill equipment
- Mining equipment
- Structural steel and building structures
- Service platforms, towers, railings and gratings
- Machines and equipment for steel plants
- Pulp and paper production equipment
- Railway wagon parts and components
- Lifting equipment
- Stainless steel constructions

SERIAL PRODUCTION

⚡ Jigs and fixtures used in production

- Develop and establish manufacturing process flow
- Guarantee consistent quality of manufactured products
- Efficiently optimize costs for serial production
- Offer flexibility for both small and high-volume series

⚡ Up to 8 ton per single part

⚡ Robotic welding

Robotic welding processes allows for the efficient production of larger batch quantities while ensuring consistent quality and efficient production flow.

⚡ Low to large quantities

Adapting to customer-required order quantities is a key to optimizing production and storage costs for enhanced efficiency.

⚡ Prototype manufacturing

- Advise on design optimization for production capacity
- Cost optimization for serial production and final design
- Significant cost savings by avoiding expensive in-house prototype manufacturing

⚡ Consistent quality

Quality control procedures and well-maintained welding jigs guarantee consistent excellence in our products.

⚡ ERP System used in production

- Resources, Workflow and Procedures in one system
- Detailed overview and good planning
- Fully traceable operation and material flow

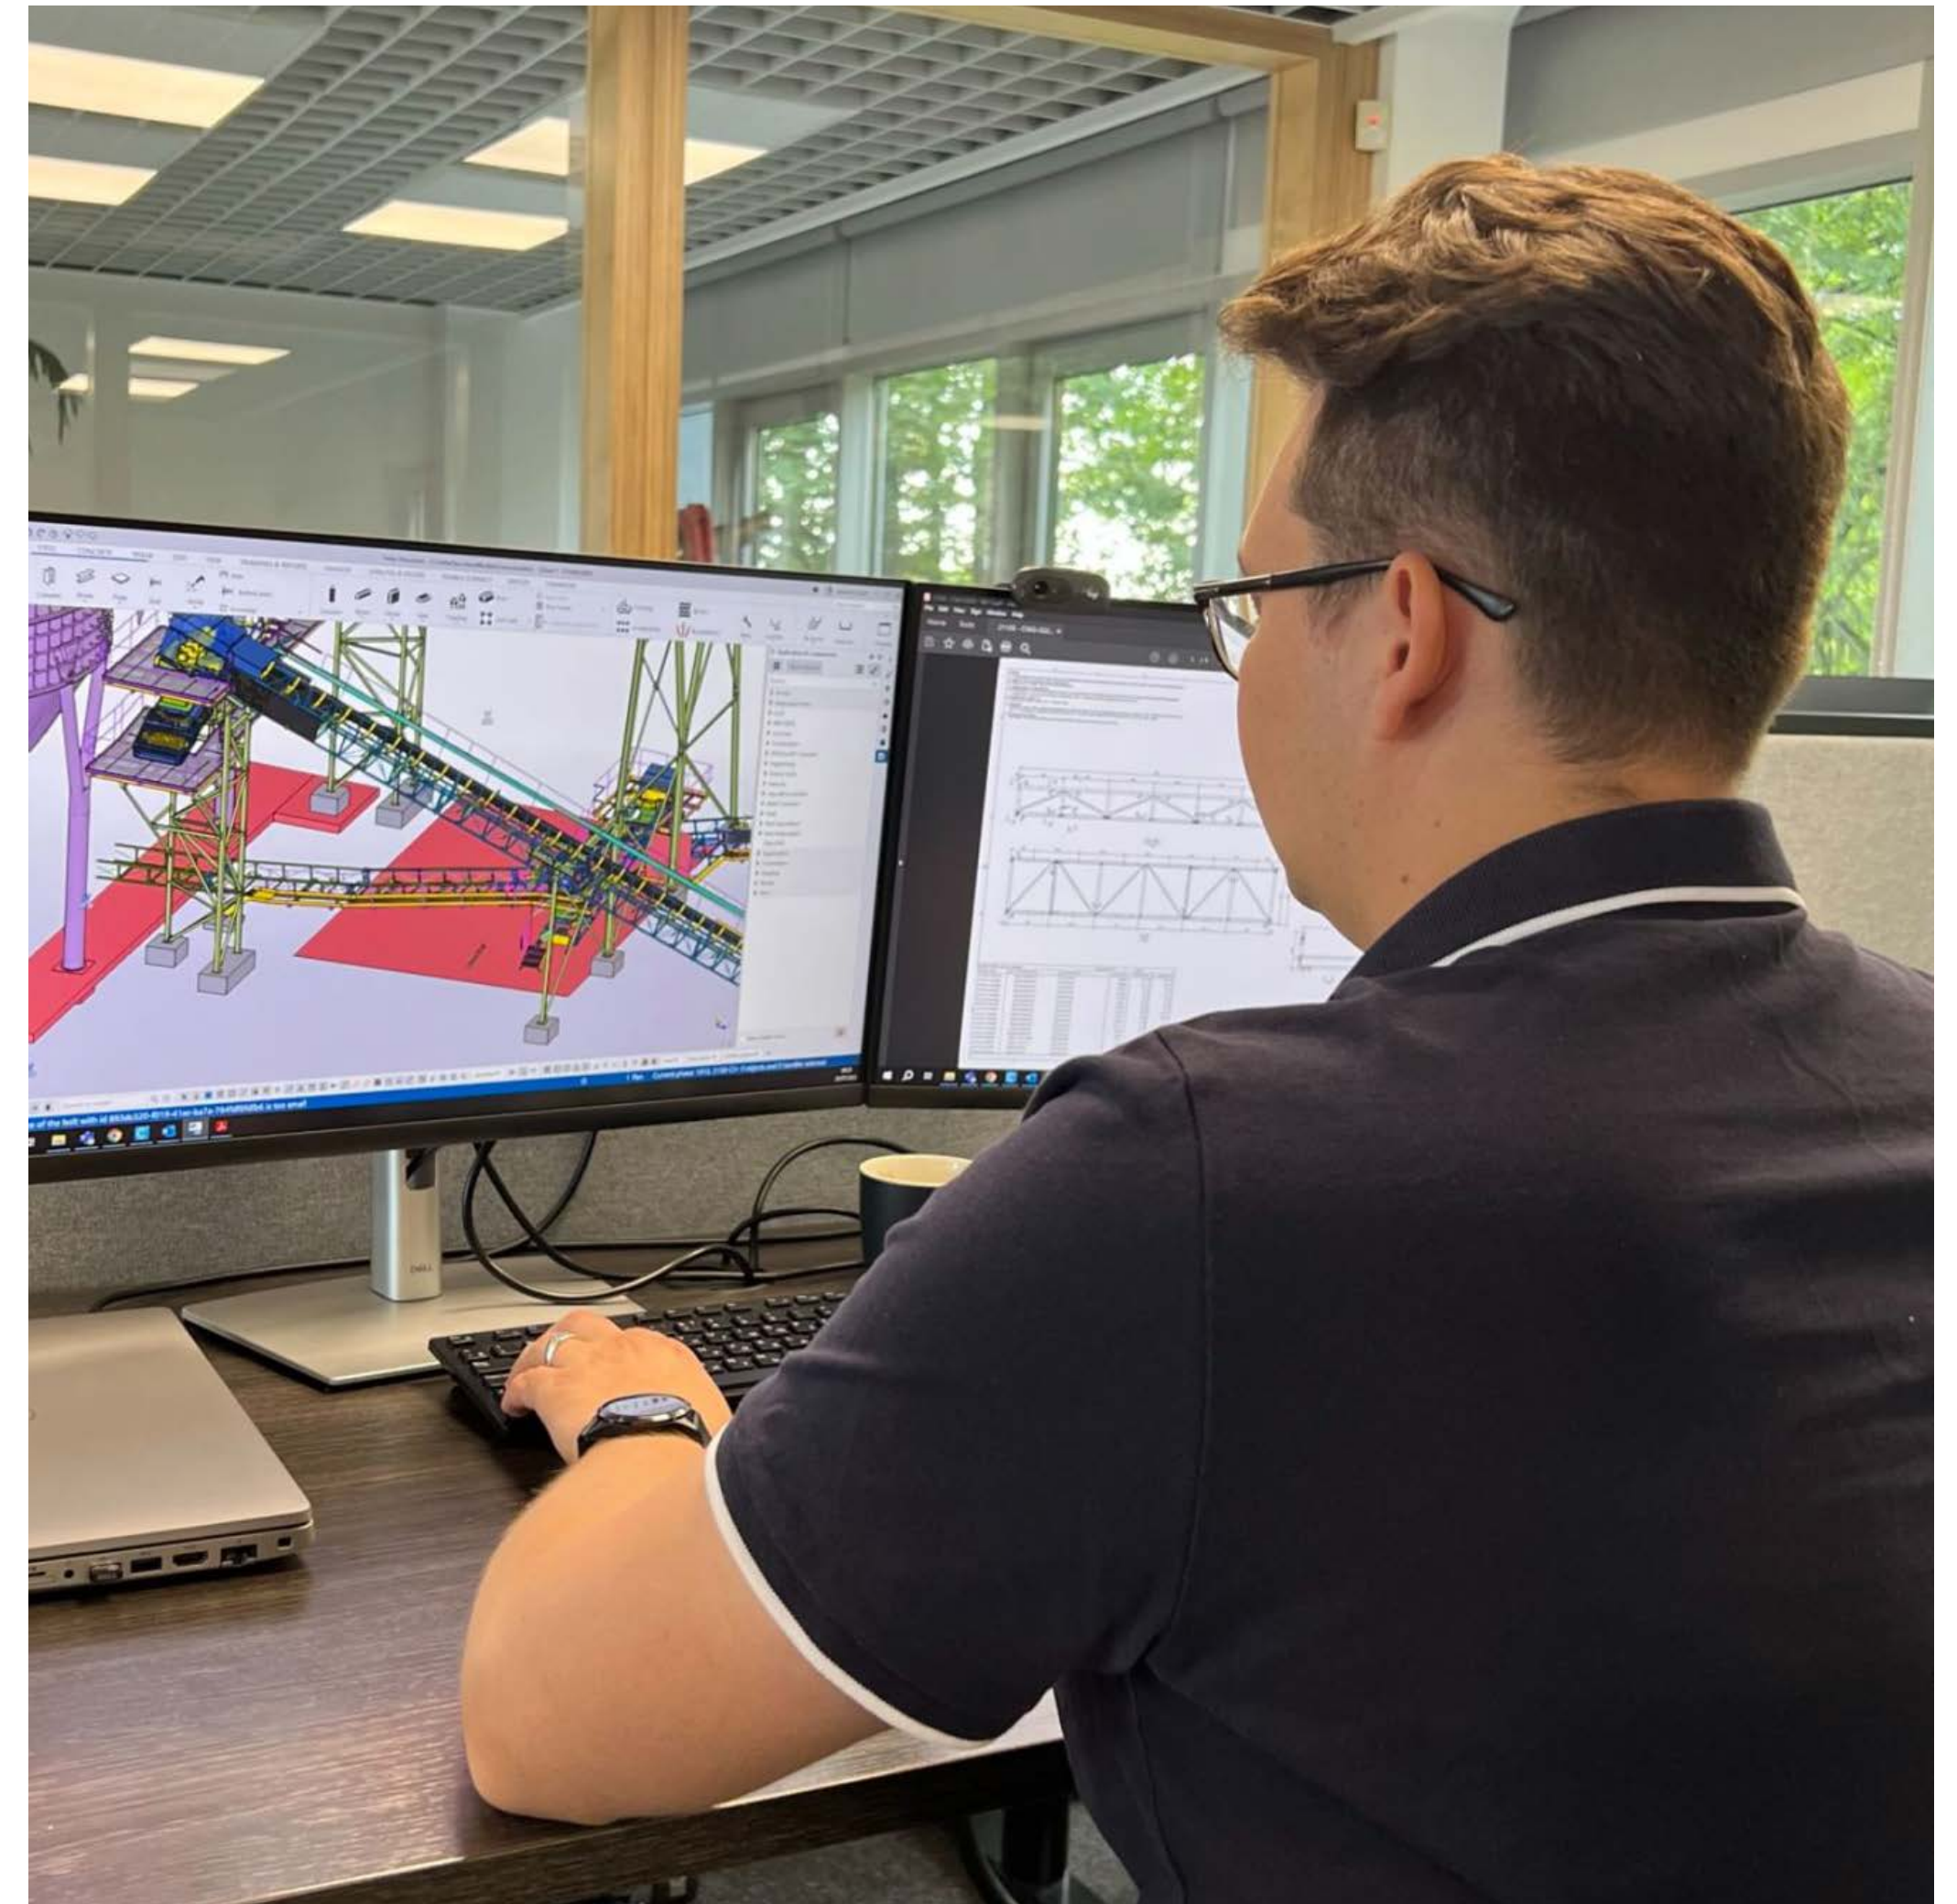

ENGINEERING

We're a team of tech, mechanics, and design experts offering customized solutions.

Our specialty is precise mechanical design, always delivered with top-notch quality, on time, and within budget. Our goal is to lead in engineering and construction, using the latest methods, tech, and resources.

- Basic / Concept design
- Mechanical Engineering Calculations
- FEA analyses
- Manufacturing files (PDF, DXF, STEP, DWG)
- 3D Detail design
- Part drawings
- GA drawings
- Welding / Assembly drawings

WORKFORCE SOLUTIONS

ERCON is your trusted partner for skilled workforce solutions in welding, assembling, and construction.

Our customized services provide options for temporary staffing or comprehensive project teams, guaranteeing the presence of proficient professionals right from the start.

- Experienced specialists
- Workforce selection based on client needs
- Documentation in line with State and client requirements
- Flexible and fast staffing for short and long-term project need
