OUR SERVICES

High Level Service

It is important to note that we do not only supply metalworking machines, but also help with their installation, commissioning and maintenance. Our own design bureau and constant expansion of production capacities allow our company to meet customer needs quickly and, most importantly, efficiently

Sheet metal bending

- Storozhuk LLC uses high-precision automated machines, including those with a maximum bending length of 6000 mm to form metal parts and sheets into various shapes and angular configurations
- High accuracy of order fulfilment is ensured by the use of advanced sheet bending equipment

Waterjet cutting

- Our production facility is equipped with waterjet machines that have the technical capability to cut metal up to 150 mm
- Special steels, titanium, and aluminium and its alloys, stainless steel, copper, glass, granite and a number of other materials

Laser Cutting

- Our production is able to cut parts of sheet metal up to 40 mm thick, while maintaining accuracy and quality of the cut
- Laser cutting of metal greatly facilitates the manufacturing of parts of complex shapes, non-standard elements and products with original designs

Laser Welding

- We have many years of experience in manufacturing of ready-to-go steel structures and are responsible at every stage of the order
- Our company uses only modern laser technologies and constantly cares about the high quality and compliance of our work

CONSTRUCTIONS

We have our own design office, which is able to realize orders of any complexity and scale.
