Sphynx

Sphynx SPA Suite
Your comprehensive shield to cyber risk

Robust cyber risk management for enterprises

The Sphynx SPA Suite is a comprehensive platform, designed to deliver a holistic and fully customisable solution for security and privacy assurance. With asset and threat modelling at its core and a wide array of components, the Sphynx SPA Suite enables a seamless approach to identifying, assessing, and mitigating risks across the entire spectrum of the systems of an enterprise.

Security tools

To streamline effective risk management, the Sphynx SPA suite leverages a range of in-house developed security tools, enabling comprehensive asset and threat modelling, asset vulnerability assessments, ingestion of cyber threat intelligence, penetration testing, user and entity behaviour security analytics, financial and technical risk evaluation and automated incident response.

The SPA suite has been designed to deliver a holistic solution for security and privacy assurance that can be fast and easily customised to the needs of individual clients and integrated to existing client systems and infrastructures.

The SPA suite embodies the outcomes of the extensive R&D experience of Sphynx in international projects to equip our clients with cutting-edge cybersecurity technology, including Generative AI and machine learning.

SIEM, Realtime Monitoring and Security Analytics

Hybrid Technical & Financial Assessments

Cyber Threat Intelligence

Assets and Threat Modeling

Penetration Testing

Incident Response

Vulnerability Assessment

Security Operation Centre Services

Leveraging the advanced capabilities of the Sphynx SPA Suite and its team of in-house engineers and cyber security analysts, Sphynx delivers Security Operations Centre (SOC) services structured in a comprehensive portfolio of Managed Security Services (MSS).

This portfolio includes a comprehensive range of SOC-as-a-Service plans, which provide clients with the necessary flexibility to select and tailor security services to their specific needs.

Key Benefits

The Sphynx SPA Suite is an integrated platform designed to empower organisations to manage their cybersecurity risk across the entire spectrum of IT & OT systems. The tools embedded in the Sphynx SPA Suite allow organisations to:

Monitor

Continuously monitor their assets (systems, data, processes and users) and strengthen their cybersecurity posture through automated detection of threats, vulnerabilities, attacks and indicators of compromise

Mitigate

Proactively mitigate identified vulnerabilities and threats through penetration testing, cyber threat intelligence, advanced AI enabled security analytics and hybrid assessments
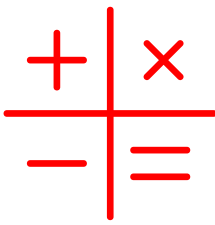

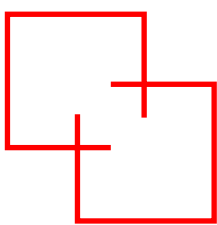

Quantify

Optimise decision-making through cyber risk quantification and risk assessments in both financial and technical terms
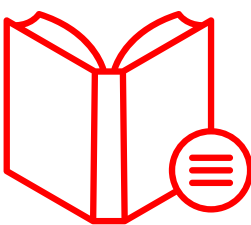

Stay Ahead

Keep defences up to date against emerging threats with the integration of cutting-edge predictive and diagnostic AI models and automated cyber threat intelligence

Respond

Orchestrate incident response activities through tailored and automatically executed CACAO playbooks

Evaluate & Prepare

Enhance response capabilities and operational readiness by updates of security monitoring, analytics and incident response processes and use of training based on Sphynx's Cyber Range platform for security training

Service Plans

Offerings	Bronze	Silver	Gold	Platinum
Baseline asset and threat modelling, and risk analysis	●	●	●	●
Regular vulnerability assessment & penetration testing	●	●	●	●
Continuous monitoring (SIEM)		●	●	●
Continuous and hybrid technical & financial risk assessments		●	●	●
Continuous CTI updates			●	●
Managed alarm monitoring and incident investigation			●	●
Managed incident response			●	●
DPO as a Service				●
