

EMISSION-EYE OY

Climate-Tech (Emissions & Compliance)

Raising 500k€ in Q2-3/2026

Call/text: +358417216475 to meet while there.

OVERVIEW

Emission-Eye is building the intelligence layer for global decarbonization, starting with maritime. We combine industrial IoT, Digital Emission Twins, AI analytics, and blockchain immutability to turn emissions compliance into **transparent proof, fuel and emissions optimization**, and monetizable climate performance.

TRACTION & CURRENT STATUS

Emission-Eye is at **TRL 5–6**, with an in-house hardware–software MVP combining industrial IoT, high-frequency GHG measurement, AI analytics, and blockchain verification. We are preparing vessel pilots and have **secured 3 LOIs in Greece**: a 47-vessel shipping company, an ETS service provider, and a green-tech service provider working with names such as Hyundai. Traction also includes **A’Pelago**, **Aalto ecosystem** participation, **F6S #2 Cleantech/#4 Climate-Tech** in Finland, and Biocluster Finland shortlisting.

UNIQUE VALUE PROP

Emission-Eye replaces fuel-based estimation with direct high-frequency GHG measurement, AI Digital Emission Twins, and blockchain-verified audit-ready proof. We turn compliance data into fuel optimization, ETS cost reduction, regulatory trust, and monetizable climate performance.

KEY TEAM MEMBERS

Aras Mosafaei, CEO & Co-founder

Former marine chief officer, Master ticket
13 years at sea onboard oil tankers

LinkedIn: <https://www.linkedin.com/in/mhmosafaei>

Dr. Roger Hult, CTO & Co-founder

PhD in Computer Science and Machine Learning with 15 years industry experience with brand like Electrolux and GE Healthcare
LinkedIn: <https://www.linkedin.com/in/roger-hult-phd-22b4a641/>

Mathias Södermark, UI/UX & Product Design

UI/UX expert with over 10 years of experience,
including working with ALTEN and Avalanche studios
LinkedIn:
<https://www.linkedin.com/in/mathiassodermark>

NEXT MILESTONES & USE OF FUNDS

Funds will be used for conducting **5 paid pilots** by 2027, **secure required certification** and class approvals, and **finalize commercial products**.
