Generative AI

At Virtual Nomad, we have always been keen on embracing AI innovations. Our journey with AI took a significant turn with the emergence of large language models (LLMs).

We not only use AI to improve our internal operations, but delivering comprehensive services for the development, implementation, and ongoing maintenance of enterprise-grade AI solutions tailored to your business requirements.

Cut development cost

Reduce time to market

Increase quality

Insure compliance with regulation

Analyst Centaur

Our AI-enhanced methodology that blends human expertise with advanced AI to transform how organizations capture, document, and refine project requirements - a solution shaped by two years of our top analysts' work and thorough testing and consistent improvement across a number of real projects.

+1 (833) 278-3946 hi@virtualnomad.agency

How It Works

Analysts collect interview recordings, documentation, and industry knowledge.

Our AI-tool turns the info into a clear Vision & Scope document.

Analysts can refine the document with the AI tool until it’s perfect. Requirements and User Stories follow the same smooth, efficient process.

+1 (833) 278-3946 hi@virtualnomad.agency

Methodology

Our methodology is built around three in-depth client workshops:

- ***Current Situation Analysis***
- ***Future Vision***
- ***Constraints Mapping***

> conducted over recorded Zoom sessions to answer 100+ critical questions and produce a comprehensive Vision and Scope document that aligns business goals, technical solutions, and project constraints.

+1 (833) 278-3946 hi@virtualnomad.agency

AI Enhanced Toolbox

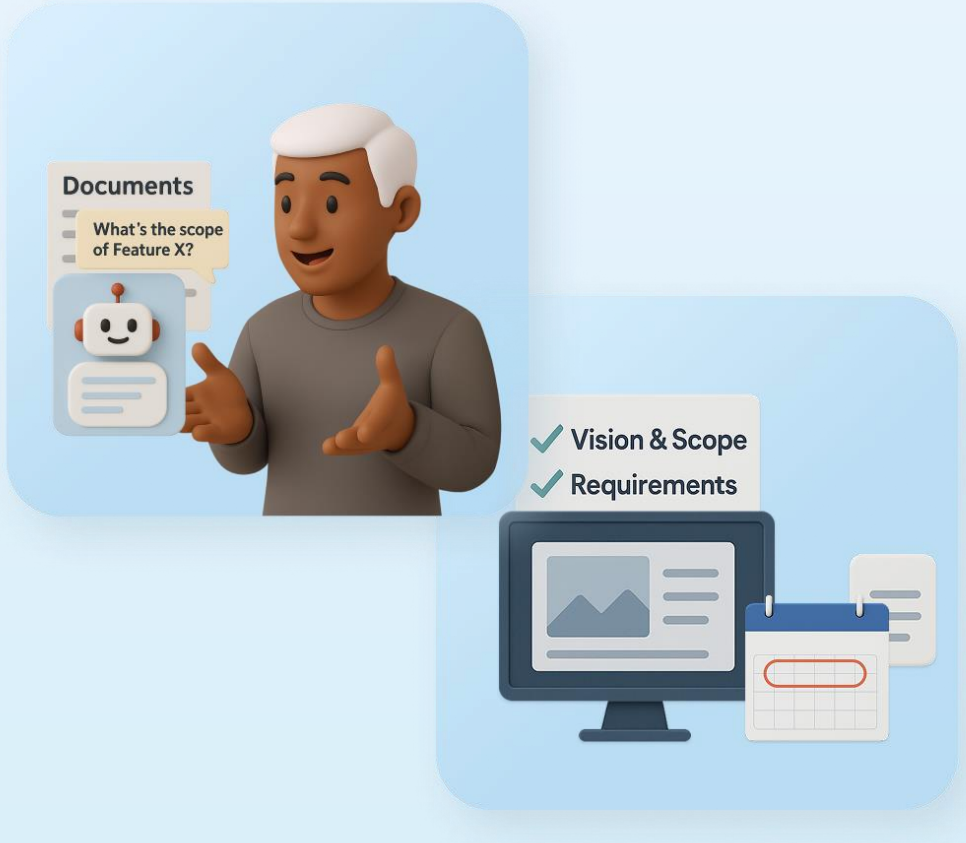
To implement our methodology, we've developed and use a set of proprietary tools:

- **Intelligent meeting processing tools**
- **RAG (retrieval-augmented generation) database**
- **Web based document generation system**
- **Consistency verification engine**
- **Gap analysis and enrichment solution**
- **Flexible LLM integration connector**

+1 (833) 278-3946 hi@virtualnomad.agency

What You Receive

- Comprehensive Vision and Scope Document
- User Stories and Requirements
- Product Requirements Capability Gap Report
- Complete Requirements Database
- Set of Customized Internal and External Presentations
- Integration with Task Tracking for Full Regulatory Traceability



+1 (833) 278-3946 hi@virtualnomad.agency

What Sets Our Approach Apart

Human-AI Collaboration

While AI accelerates and enhances the process, senior analysts remain in control.

Prompt-Based Corrections

Zero manual editing ensures documentation consistency.

Quality Assurance

Multiple verification mechanisms ensure the completeness and accuracy.

Customization

Methodology and output is adjustable for client's specific standards and needs.

+1 (833) 278-3946 hi@virtualnomad.agency

Strategic Outcomes

Compliance Demands	Knowledge Preservation	Vision Alignment	Consistency	Efficiency
Our methodology supports regulatory compliance.	The comprehensive knowledge base preserves institutional knowledge.	Ensures stakeholders' concept is captured before expensive phases begins.	Ensures consistency across complex projects with multiple stakeholders.	Dramatically reduces the time required for requirements engineering while improving quality.

+1 (833) 278-3946 hi@virtualnomad.agency

Conclusion

With Analyst Centaur, Virtual Nomad has transformed a critical requirements collection process by combining the best of human expertise with cutting-edge AI capabilities.
The result is much faster, more accurate, and more comprehensive requirements documentation that sets the stage for successful software development and implementation. In a world where software delivery timelines are constantly shrinking, this advantage can be transformative for your business.
