

QuickPDA

MARITIME TECHNOLOGY

Maritime Technology for Smarter Port Calls

QuickPDA digitalizes port call operations, cost intelligence and agency workflows from first estimate to final disbursement.

THE CHALLENGE

Port calls still rely on fragmented spreadsheets, manual calculations, email chains and disconnected operational records - slowing decisions and adding unnecessary workload.

THE QUICKPDA APPROACH

One digital environment for port cost calculations, operational workflows, reporting and smart alerts - designed around the real daily needs of shipping agencies and port call teams.

Core Platform Capabilities

PORT COST INTELLIGENCE

PDA calculations, tariff logic and structured cost items for faster, more consistent estimates.

OPERATIONAL WORKFLOWS

Track arrival, berth, departure and key port call actions in one operational flow.

SOA & SMART ALERTS

Capture operational events and trigger timing-based or missing-action warnings.

PDA / FDA / SOA

Manage the commercial flow from proforma estimates through final disbursement and statements.

DOCUMENT TRACKING

Keep required operational documents visible and organized throughout the port call.

WEB + MOBILE

Access key workflows and operational notifications from the office or in the field.

WHY QUICKPDA

- Faster estimates
- More consistent calculations
- Better operational visibility

Built for the maritime ecosystem

Shipping Agencies • Shipowners & Managers • Port Call Teams • Maritime Service Partners

OPEN TO PARTNERSHIPS

We are looking to connect with maritime technology companies, shipping agencies, shipowners and ecosystem partners interested in smarter, more efficient port operations.

Let's connect
