

GX-GeoShare

Your Own Digital Twin, & Map Data Platform
with AI & advanced capabilities

By

GEOXPERT

GX-GeoShare, an enterprise-ready GIS platform for drone, 3D and satellite image visualization.

Its robust and flexible architecture has been battle-tested across multiple industries: **Construction & Infrastructure, Building & Façade Inspection, Slope & Environmental Monitoring, Heritage & Archaeology Site Management, Power cable tower management**

Key Features & Opportunity:

- 1. On-Premise First:** Designed for full on-premise deployment, giving you complete control over data security and sovereignty—a critical need for many enterprise and government clients.
- 2. Engine Flexibility:** Works seamlessly with Cesium, Mapbox, OpenStreetMap, and other map engines.
- 3. Proven Foundation:** A solid, tested platform ready for its next stage of growth.
- 4. Country-based exclusive license/ partnership.**

This is a perfect opportunity for a GIS consultancy, engineering firm, or government contractor looking to add a secure, on-premise visualization tool to their portfolio without starting from scratch.
