

**4SENIOR**

**TOBO<sup>®</sup>**

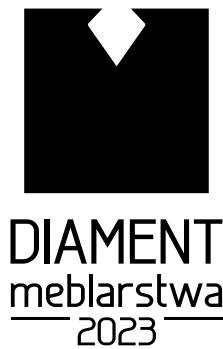

The primary purpose of the furniture is to aid mobility and adapt the environment to the needs of older people. The furniture has been fitted with castors and handles that allow the furniture to be repositioned without the need to bend down. The handles can provide support when sitting down and standing up, and also allow a walking stick to be hung up. In addition, their high contrast colour is more visible for people with poor eyesight. All the furniture has high wooden frames, which help to make cleaning easier, as well as for robotic cleaning. The furniture details have been rounded to avoid angular elements.

Bed 90x200

4SL1

Dimensions

width 204,6 cm  
depth 94,8 cm  
height 98,5 cm

The '4Senior' bed has a comfortable height suitable for the elderly, making it easy to get up, and friendly, curved edges to prevent accidental injuries. On both sides of the bed, there are auxiliary handles that make it easier to get up and stand up. In addition to their support function, the handles also act as protection against accidental falls. Their contrasting colour is visible even to people with poor eyesight. The bed is mobile, allowing it to be moved freely from place to place, depending on the needs of the senior and their carers, and to be easier to keep clean. The high spaces under the bed also allow cleaning with intelligent cleaning robots.

### Bedside table

4SSN

#### Dimensions

width 31,8 cm

depth 36 cm

height 69 cm

### Mobile table

4SSM

#### Dimensions

width 67,8 cm

depth 51,4 cm

height 92 cm

Especially noteworthy is the mobile table, equipped with auxiliary handles that allow you to move freely with the furniture. The table helps to carry objects and meals over shorter distances. It also functions as a table for dining and, for example, working on a laptop. It can be comfortably pulled up to, for example, an armchair or sofa.

**Chest of drawers**

4SK

**Dimensions**

width 80 cm  
depth 46 cm  
height 102 cm

The '4Senior' wardrobe is equipped with a clothes bar and one capacious 3/4-extension drawer with a soft-closing mechanism. It has black, distinctive handles, which are definitely more visible for older people with poorer eyesight. The high frame allows for easier maintenance.

The '4Senior' chest of drawers has four drawers and a practical top surrounded on three sides by raised walls that prevent objects from falling. The chest of drawers has comfortable handles in a contrasting colour, which are more visible for people with poorer eyesight. The wooden frame allows for easier cleaning, as well as cleaning with smart cleaning robots.

**Wardrobe**

4SSZ

**Dimensions**

width 80,1 cm  
depth 60,1 cm  
height 177 cm

**Mobile helper**

4SKM

**Dimensions**

width 38 cm  
depth 40 cm  
height 93 cm

Another interesting feature is the four-wheeled mobile assistant, which has been enriched with a practical handle that helps with mobility and also serves as a place to hang up a walking stick. Two shelves in the form of trays make it possible to safely store a variety of essentials, which at the same time are always within easy reach. The trays are easily removed for easier cleaning.
