Lojer Group – from Finland to the world, supporting healthcare with over a century of experience

Lojer Group is the largest manufacturer of hospital and care equipment in the Nordic countries and a responsible developer of healthcare solutions. Our 100+ years of experience, continuous product development and customer-centric approach make us a reliable partner for all aspects of care work. Our products support healthcare professionals, improve patient comfort and endure year after year even in demanding use. We are a proudly Finnish company and a significant employer, boasting a growing team of 260 professionals!

Made in Finland – used worldwide

The Lojer Group consists of Lojer Oy and Merivaara Oy. We manufacture our products at the Lojer and Merivaara facilities in Sastamala, Hollola and Kempele. Our group also includes sales companies Medema in Sweden, Fysiopartner in Norway, Merivaara AB in Sweden and Lojer Medical LLP in Kazakhstan. Together we serve our clients in over 115 countries.

Sustainability in action

For us, sustainability means action, not just words. We use carbon-neutral electricity in our production, and our goal is to become fully carbon-neutral by 2035 (Scope 1–3). Long-lasting client relationships and fair partnerships are important in our daily operations, reflecting our genuine care for both people and the environment.

Lojer products have been granted the Key Flag Symbol, indicating that they are made in Finland and their domestic content is at least 50%. The Key Flag Symbol is a sign of

reliability and Finnish work. It communicates quality and sustainability to our clients, assuring them that their purchases support Finnish work and expertise.

Four business units – one end-to-end service

- **Hospital & Nursing**
Supports clinical work, patient safety and ergonomics in a diverse range of care environments.
- **Operating Room Products**
Provides intuitive operating tables, lights and integration systems that streamline procedures and support patient safety.
- **Physical Therapy Equipment**
Offers comprehensive solutions for different stages of rehabilitation, combining in-house production with international quality brands.
- **Medical Service**
Ensures the safety and reliable operation of the equipment throughout their life cycle – from financing and maintenance to recycling.

Lojer – For Easy Care

Our mission is to make care work easier. That is why we design products that are simple to learn, use and maintain. We make it easy for our clients to do business with us – we listen, we understand and we develop solutions together. Our goal is to be a reliable partner across all stages of care work.

LOJER MEDICAL SERVICE

Lojer Care contracts

Lojer Care contracts are tailored to meet client needs and preferences. The scope of these contracts varies from regular preventive maintenance to an end-to-end service covering spare parts and travel costs as well.

Maintenance and spare part services

We provide statutory annual maintenance, repair services and spare parts to our clients across Finland. Our professional maintenance extends the lifespan of your equipment while reducing life cycle costs.

Reliable maintenance across the entire life cycle of the equipment! Explore our maintenance and spare part services or request us to contact you: www.lojer.com

LOJER®

SERVICE

HOSPITAL BEDS

Balancing ease of use and patient comfort, our wide range of hospital beds is designed for primary healthcare and specialised medical care. Made in Finland, our hospital beds are known for their sturdy, dependable and ergonomic design. Thousands of Lojer hospital beds are in use in Finland alone, with some of the oldest models in service for over 25 years.

SCANAFIA X ICU L HOSPITAL BED

HOSPITAL BEDS

The ScanAfia X ICU L hospital bed is highly suitable for a variety of hospital wards. The bed's exceptional height adjustment range improves ergonomics for healthcare professionals and supports patient self-sufficiency. In addition to a handset, the nurse control panel (supplied as standard) allows for securing the bed's functions so that the patient cannot use them. It also enables specialised electronical functions, including the Trendelenburg, CPR and cardiac positions. The sliding mechanism in the back section prevents the patient from slipping toward the foot-end of the bed and improves comfort. Quick-release locks at the head and foot of the bed allow for the rapid detachment of end frames in emergencies. Despite the substantial 340 kg safe working load (SWL), the standard 150 mm twin castors make ScanAfia X ICU L easy and effortless to move around.

The bed is designed for long-term use in hospital environment, and it is available with a width of 80 cm or 90 cm. A washable version of this hospital bed model is also available, complete with a wash cycle counter.

ScanAfia X ICU L fulfils all requirements set for medical devices: IEC 60601-2-52, IEC 60601-1-2 (EMC) and SFS-EN 60601-1.

Product shown with optional accessories

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Very high load capacity: SWL 340 kg
- 2 Large twin castors (150 mm) and lightweight design make the bed effortless to move around
- 3 Impressive 20° anti-Trendelenburg and Trendelenburg adjustment
- 4 Integrated mattress platform extension

Specifications

Factory-installed options:

- 5th castor for easier manoeuvring
- Various castor sizes available
- Wash cycle counter
- Led or lithium-ion battery
- Chrome-plated side rails and end frames
- Raised rails

Other accessories:

- Handset holder
- Grab handle
- Headboard
- IV stand
- Lifting pole
- Overbed dining table
- Urine bag holder
- Monitor and writing stand
- Oxygen cylinder holder
- Accessory mounting rail

SCANAFIA XS HOSPITAL BED

HOSPITAL BEDS

A reliable choice for inpatient wards

The ScanAfia XS hospital bed is a safe and reliable choice for inpatient wards. This patented hospital bed is designed to meet the needs of healthcare professionals at hospitals, health centres and private clinics. The bed's design is optimised for both nurse and patient ergonomics. The sliding mechanism in the back section prevents the patient from slipping toward the foot-end of the bed.

The bed's exceptional height adjustment range makes it easier for healthcare professionals to work with the patient while improving patient self-sufficiency when exiting the bed. ScanAfia XS fulfils all requirements set for medical devices: IEC 60601-2-52, IEC 60601-1-2 (EMC) and SFS-EN 60601-1.

*Excellent ergonomics, great mobility
and a wide range of adjustments*

CARENA PLUS HOSPITAL BED

HOSPITAL BEDS

Redesigned high-end hospital bed

The Carena Plus hospital bed with an improved, straightforward design enables rapid frame cleaning and better hygiene management. The ergonomically advanced design supports the well-being of both patients and professionals. The extensive height adjustment range increases safety and self-sufficiency for patients of various sizes. This hospital bed has a safe working load (SWL) of 330 kg, yet it is extremely effortless to move around.

Carena Plus fulfils all requirements set for medical devices: IEC 60601-2-52, IEC 60601-1-2 (EMC) and SFS-EN 60601-1.

The optional nurse control panel improves the usability of the bed, enabling various postures and memory-stored positions. Supplied as standard, the quick-release locks for securing the bed's head and foot ends are designed to ensure quick and easy operation in emergencies. A washable version of this hospital bed model is also available, complete with a wash cycle counter.

STRETCHERS

The multi-purpose stretchers are suitable for various uses, including patient transfers, first aid, recovery rooms, minor procedures and even intensive care. The robust and safe stretchers withstand heavy loads and demanding use.

We have several models of Emergo stretchers available for various purposes.

EMERGO STRETCHERS

The multi-purpose Emergo stretchers are suitable for various uses, including patient transfers, first aid, recovery rooms, minor procedures and even intensive care. The wide range of accessories and adjustment options improves the efficiency of patient transfers and enhances healthcare professionals ergonomics. The adjustable mattress platform ensures a comfortable resting position in the recovery room, for example. Also, the patient does not need to be transferred from the trolley to a seated position, as the Emergo can be easily adjusted to a variety of positions. The broad selection of accessories meets a wide variety of changing needs for years to come.

EXAMINATION TABLES AND CHAIRS

Lojer's modern, user-friendly examination tables have been designed in collaboration with healthcare professionals to meet their needs in both healthcare and specialised medical care. To ensure high quality, we manufacture the examination tables in Finland, leveraging the latest designs and technology.

The examination tables adapt to a wide variety of examinations and procedures, and they support a range of accessories for flexible integration. And to fully meet the client's needs, a variety of upholstery options provide the finishing touches.

4040X GENERAL EXAMINATION TABLE

EXAMINATION TABLES AND CHAIRS

Safe and versatile general examination table

The 4040X General Examination Table is designed to meet the needs of various healthcare facilities. Thanks to the table's design and exceptionally low minimum height, both children and the elderly can get onto the table effortlessly. An optional grab handle further enhances safety and comfort during access. The table is lightweight and easy to move around. The table includes advanced safety features: it automatically stops and rises when movement is obstructed, it can be locked using any of the controls, and emergency manual lowering of the back section is available as an option.

The exceptional height adjustment range and high load capacity allow for ergonomic working positions and enhance safety during patient examination and transfer situations.

The table's height and back section tilt can be adjusted by foot from either side using the optional hands-free foot control.

Product shown with optional accessories

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Exceptional height adjustment range, 40–95 cm
- 2 Streamlined design enables easy cleaning and a high level of hygiene
- 3 With a new safety feature, the table automatically stops and rises when movement is obstructed

Specifications

Factory-installed options:

- Dual-function handsfree foot control (height and back section adjustment)
- Manual Trendelenburg
- Electronic Trendelenburg and anti-Trendelenburg with battery
- Battery operation (emergency use)
- 125/150 mm twin castors with central locking
- Face hole
- Emergency manual lowering of the back section
- Single- or dual-function foot control
- Thicker upholstery
- Mattress platform width options 80 cm and 90 cm

Other accessories:

- Side rail
- IV stand
- Adjustable armrest
- Neck cushion
- Examination light
- Push handles
- Adapter for accessories
- Accessory mounting rail, 380 x 10 x 25 mm
- All accessories mounted on the side rail
- Anaesthesia frame
- Grab handle
- Bumpers

4040XL HEAVY DUTY EXAMINATION TABLE

EXAMINATION TABLES AND CHAIRS

The innovative Lojer 4040XL heavy duty examination table is designed for the demanding requirements of the treatment of larger and bariatric patients. Thanks to the patented design, substantial 300 kg safe working load (SWL) and exceptionally low minimum height, patients can effortlessly get onto the table even from a wheelchair. The exceptional height adjustment range improves ergonomics for healthcare professionals when examining and transferring patients. The 4040XL heavy duty examination table features an extra wide and thick mattress platform, making it more comfortable for heavier patients.

The table is equipped with a safety feature that detects obstructions, stops the movement, and slightly raises the table to ensure the obstruction is released safely. The examination table is suitable for ECG examinations.

Innovative examination table for demanding use

4050X GYNAECOLOGICAL EXAMINATION TABLE

EXAMINATION TABLES AND CHAIRS

The 4050X Gynaecological Examination Table is the most versatile examination table in our range. While it is especially well-suited for gynaecological examinations, it can also be used for minor procedures and general examinations. The 4050X Gynaecological Examination Table features a three-section upholstery platform with adjustable seat, middle and back sections. Two different models are available: 4050X M offers a smaller range of features. The more extensively equipped 4050X F includes, for example, a foot control integrated to the end of the table, a handset with memory slots and a motorised seat section.

Model: 4050X M

User-friendly, high-hygiene examination table for a wide range of uses

The table's height and back section tilt can be adjusted by foot from either side using the optional hands-free foot control.

Model: 4050X F

Integrated as standard at the end of the model F table, the foot control is designed to enable more hygienic and efficient work

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Easy to adjust without hands, improving hygiene and efficiency in professionals work
- 2 While the table is designed specifically for gynaecological examinations, it is also well-suited for minor procedures and general examinations
- 3 With a new safety feature, the table automatically stops and rises when movement is obstructed

Specifications

Factory-installed options:

- Electronic Trendelenburg and anti-Trendelenburg with battery
- Ø125 or Ø150 mm castors with central locking
- Ø 150 mm conductive twin castors with central locking
- Dual-function handsfree foot control (height and back section adjustment)
- Floor-placed foot control
- Battery operation (emergency use)

Other accessories:

- Pair of calf supports, white plastic (for minor procedures). Includes quick-release locks and padded securing straps.
- Pair of calf supports, black moulded padding (for longer procedures). Includes rotation rod clamps and padded securing straps.
- IV stand
- Accessory mounting rail
- Quick-release lock, Ø 20 mm
- Side rail
- Anaesthesia frame
- Push handles
- Examination light (secured to the accessory mounting rail or frame)
- Neck cushion

MEDICAL CHAIRS

Lojer's range of medical chairs includes options for both primary healthcare and specialised medical care. For example, the Lojer Capre RC and MC chairs provide a top-quality, customised solution for post-operative recovery in ambulatory surgery, dialysis and cytostatic treatments and general examinations. The versatile Capre chairs are designed to support both patient comfort and practical operations at the clinic.

The Medical Chair 6801 is designed for examinations, sample collection and patient transfers. The Lojer Geriatric Chair is a highly versatile product, featuring good cleanability, side supports that increase the sense of safety and a wide range of accessories.

CAPRE RC RECOVERY CHAIR

MEDICAL CHAIRS

Care-optimised medical chair

The luxurious Capre RC Recovery Chair has been designed in collaboration with surgeons to meet the requirements of modern care processes in post-ambulatory surgery recovery. The chair is used in place of a traditional hospital bed to promote patient alertness.

Elegant upholstery, individual adjustments and comfort features, such as a reading light and tablet holder, support the smooth daily routine of the surgical unit and provide comfort for patients during their recovery. The chair's height, back section, seating angle and leg sections can be adjusted, electrically and independent of each other. Furthermore, both the head section and the split leg sections feature a length adjustment mechanism.

The chair features the Trendelenburg position and three pre-programmed care positions (sitting, reclined and supine) along with one position that can be freely programmed by the user.

The chair can be adjusted to positions such as the supine or CPR position with a single push of a button.

Compared to beds, a broader range of adjustment options to meet patient needs

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Modern design and anatomically contoured upholstery increase patient comfort
- 2 Four pre-programmed positions and one position freely programmed by the user
- 3 Adjustable multi-function arm support (height and angle adjustment as well as rotation)

Specifications

Factory-installed options:

- Electric foot control
- Upholstery in one or two colours
- Armrests for sampling (wide, longer and with contoured upholstery)
- Battery (emergency use)
- Handset, standard model

Other accessories:

- Tray
- Tablet holder with a flexible arm
- IV stand with one-hand adjustment
- LED light (USB)

Future

Dimensions and adjustments

CAPRE MC MEDICAL CHAIR

MEDICAL CHAIRS

Patient comfort for demanding care procedures

The Capre MC Medical Chair has been designed in collaboration with healthcare professionals to meet modern care requirements in areas such as dialysis and cytostatic treatments. Due to its modular structure, the chair is also suitable for use as an examination chair. The chair features the Trendelenburg position and three pre-programmed care positions (sitting, reclined and supine) along with one position that can be freely programmed by the user. The chair can be adjusted to positions such as the supine or CPR position with a single push of a button.

This model differs from the Capre RC Recovery Chair in that the leg section is motorised and single-piece, and it includes an adjustable footrest as an option.

Excellent ergonomics – wide range of adjustments and easy adaptability

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Modern design and anatomically contoured upholstery improve patient comfort

6801 MEDICAL RECLINER CHAIR

MEDICAL CHAIRS

Medical Chair 6801 is designed for examinations, sample collection and patient transfers. Special attention has been paid to the design, adjustability and ergonomics of the seat, from the perspective of both the caregiver and the patient. Thanks to the 125 mm castors, the chair offers excellent maneuverability. The stepless adjustments of the chair's backrest and leg sections facilitate care work. Assisted by gas springs, the chair easily tilts into a fully supine position, and it can be hydraulically elevated to the desired height.

Scan the QR code or go to www.lojer.com for more information

Key features

- 1 Wide adjustment ranges (adjustable back section, calf section, head support and height)
- 2 Patient chair with seamless upholstery for easy cleaning
- 3 The contoured upholstery provides excellent seating comfort

Specifications

Factory-installed options:

- Calf support adjustability (length adjustment) 130 mm

Other accessories:

UPHOLSTERY MATERIALS AND COLOUR OPTIONS

Future

Fire-resistant Future is an elegant Lojer upholstery material which features a slightly pearlescent finish. Thanks to its antibacterial, antimicrobial and anti-mould properties, Future is an excellent choice for demanding conditions. The material features cutting-edge coating technology that remains on the surface and does not wear out even when cleaned. It simultaneously prevents odours and growth of bacteria that cause stains, prolonging the service life of upholstered parts.

This extremely wear-resistant material is 3–6 times more durable than traditional faux leather materials (with a Martindale rating exceeding 300,000 cycles) and highly resistant to general deterioration, such as cracking, splitting and loss of flexibility. It is also waterproof and fade-resistant.

The vinyl coating of the Future material and specifically its performance and durability have been designed for the healthcare industry where bacteria, abrasions and stains can be particularly challenging. The material is easy to clean and must be cleaned regularly. Material composition: top coat 81% vinyl | backing 19% polyester.

Nature

Durable, high-quality Nature represents a new generation of environmentally friendly materials. It complies with the Oeko-Tex standard, and therefore does not include any heavy metals or phthalates. Thanks to its biocompatibility (EN ISO 10993-5+10), the material is safe for skin. Nature feels very comfortable and warm on the skin compared to regular faux leather. It is especially suitable for medical devices and wellness products used in physiotherapy. Material composition: approx. 50% renewable raw materials | approx. 30% natural raw materials | approx. 20% raw materials derived from crude oil

Skai Conductive

Skai Conductive is a high-quality faux leather material with the feel and appearance of real leather. In addition, the material is electrically conductive, so it is recommended for medical products in which electrostatic discharges are to be avoided (e.g. heart function tests). Material composition: approx. 90% PVC compound | approx. 10% knitted CO/PES fabric

INSTRUMENT AND WASTE/LINEN TROLLEYS

Our range includes a number of trolleys to suit various needs, whether you are looking for instrument, ward, service, courier, laboratory or linen trolleys. All our trolleys are made from high-quality materials, and they are highly durable.

Waste/linen trolleys are available in three different waste bag and soiled linen variations, all made of steel.

Instrument Trolley with Castors 3402

Frame is made of chrome-plated steel tube. Two detachable stainless steel trays (40 x 60 cm). With 75 mm castors, the trolley is very easy to move. The trolley can be placed under an 80 cm worktop. It has a safe working load (SWL) of 50 kg. Size: 75 x 60 x 40 cm (H x L x W). 75 mm castors.

Instrument Trolley with Castors 3401, incl. accessory box

Frame is made of chrome-plated steel tube. Two detachable stainless steel trays (40 x 60 cm). With 75 mm castors, the trolley is very easy to move. There is an easy-to-clean, plastic accessory box underneath the upper tray, featuring drawer stoppers and opening to both sides. The trolley can be placed under an 80 cm worktop. It has a safe working load (SWL) of 50 kg. Size: 75 x 60 x 40 cm (H x L x W). 75 mm castors.

Ward Trolley 262

Frame made of chrome-plated steel tube, includes a push handle. Two fixed stainless steel trays (40 x 60 cm). With large 100 mm castors, the trolley is very easy to move. Comes with an accessory box made of easy-to-clean plastic. The box can be opened on both sides. Size: 78 x 60 x 40 cm (H x L x W) / Size with push handle: 92 x 69 x 40 cm (H x L x W). 100 mm castors.

Service Trolley 285

Frame is made of stainless steel. Fixed stainless steel trays with elevated edges to prevent items from falling (55 x 80 cm). Push handle. Large 125 mm castors, corrosion-resistant material, with two locking castors. It has a safe working load (SWL) of 100 kg (50 kg / tray). Size: 90 x 80 x 55 cm (H x L x W). 125 mm castors.

Courier Trolley 265

Frame is made of chrome-plated steel tube. Push handle. Baskets (2 pcs) made of steel wire with powder and epoxy coating. Large 100 mm castors. Top basket with 6 sections. Size: 75 x 94.2 x 50 cm (H x L x W) / Size with push handle 94 x 94.2 x 50 cm (H x L x W). 100 mm castors.

Service Trolley 266

Frame is made of chrome-plated steel tube. Push handle. Baskets (2 pcs) made of steel wire with powder and epoxy coating. Large 100 mm castors. Size: 75 x 94.2 x 50 cm (H x L x W) / Size with push handle 94 x 94.2 x 50 cm (H x L x W). 100 mm castors.

Laboratory Trolley 255

Frame is made of chrome-plated steel tube. Push handle. Detachable plastic trays with elevated edges. Size: 85 x 62 x 37.8 cm (H x L x W). 75 mm castors.

Linen trolley 270

Frame is made of chrome-plated steel tube. Four twin baskets made of epoxy-coated steel wire, designed for both mechanically and manually folded linen. Size: 128 x 101 x 47 cm (H x L x W) / Size with push handle 137 x 101 x 47 cm (H x L x W). 100 mm castors.

Waste/linen trolley 290

Trolley for two bags. Features base supports and a bag fastening mechanism. Frame is made of chrome-plated steel tube.

Designed for 100–150-litre fabric or plastic bags.

Size: 107 x 80 x 46 cm (H x L x W). Ø100 mm castors.

Accessories: Lid

Waste/linen trolley 291

Trolley for one bag. Features a base support and a bag fastening mechanism. Frame is made of chrome-plated steel tube. Push handle.

Designed for a 100–150-litre fabric or plastic bag.

Size: 100 x 53 x 46.5 cm (H x L x W). Ø175 mm castors.

Accessories: Holder for a 30-litre waste bag. Lid.

Waste/linen trolley 292

Trolley for one bag. Features a base support, a top and a foot pedal.

Frame is made of reinforced chrome-plated steel tube.

Push handle and 2 castors.

Designed for 100–150-litre fabric or plastic bags.

Size: 100 x 53 x 46.5 cm (H x L x W). Ø125 mm castors.

PATIENT AND BEDSIDE CABINETS

A high-quality bedside cabinet can significantly improve patient comfort and make nursing work easier. A stylish bedside cabinet also serves as an interior design element. Lojer's range of bedside cabinets represents quality Finnish workmanship and matches well with different types of beds.

Product shown with optional accessories.

Ada Bedside Cabinet

Modular Ada is a durable and safe bedside cabinet designed for heavy use in any hospital. Featuring a modern design, the Ada cabinet includes a stepless height adjustment for the dining table which can also be switched from one side to another without any tools. Thanks to locking 75 mm twin castors, the cabinet is light and easy to move but also locks steadily into place. The frame is made of epoxy-coated steel while the side panels, the dining table and the top are made of laminate. The cabinet comes with two drawers, and the top one can be locked. Colours: standard grey for the top and the side panels, white for the front panels.

Size (W x D x H): 475 mm x 600 mm x 900 mm.

Accessories: Top and side panels: birch or beech melamine | Light blue front panels | Table top cover: ABS plastic | Slipper rack | Magazine basket | Bottle or waste bag holder | Intercom holder

Bedside Cabinet 2020

The frame of the cabinet is made of white epoxy-coated steel. Drawer front panels are available in IKI high-pressure laminate, solid birch or beech. Cover surfaces are made of IKI high-pressure laminate with rounded edges. The height of the meal tray is easy to adjust and can be switched from one side to another without any tools. The cabinet has four locking castors and a drawer stopper. Size (W x D x H): 49 x 57 x 90 cm.

Accessories: The dining table can be tilted and used as a reading stand | Side basket | Lock for top drawer

Product shown with optional accessories.

Bedside Cabinet Nova with Reading and Dining Table

The Nova bedside cabinet is a practical and elegant aid for hospitals and care homes. Featuring two-way drawers, the cabinet can be used effortlessly on either side of the bed. The cabinet is easy to handle and keep clean. Standard colour is light grey melamine, with stained beech melamine available as an option. Well-balanced construction also makes the cabinet safe to use with a reading stand and a dining table. Angle for reading stand and dining table can be adjusted. Also available with a low-rise lower frame.

Size (W x D x H) 66 x 45 x 86 cm.

Accessories: Table top cover, ABS plastic, Top drawer lock

Reading and Dining Table Nova 2680

The Nova 2680 reading and dining table is a practical solution for hospital or nursing beds. The table extends far enough over the bed, making it comfortable to use. The product is easy to stow away: when the dining table is folded down, you can easily line up the tables.

Also available with a low base frame that fits more easily under different hospital beds, as for example Carena and Scanafia hospital beds.

The low base frame height is 75 mm.

Size (W x D x H) 78 x 45 x 78–106 cm.

SHOWER EQUIPMENT

Developed together with healthcare professionals, Lojer shower equipment is a safe and ergonomic choice for patient handling during hygiene procedures. Made of stainless steel, our long-lasting, easy-to-use shower trolleys are suitable for hospitals and other care facilities.

Shower Trolley Veera 4310

The sturdy shower trolley features hydraulic height adjustment with foot pedals and a range of 54–89 cm. The trolley is fitted with heat-insulated padding and a pillow. The rails can be easily adjusted from both ends. The frame is epoxy-coated stainless steel. Equipped with durable, high-quality 150 mm waterproof castors and directional locks (both standard features), the trolley ensures smoother transfers through hospital corridors. The trolley can be tilted for drainage with a gas spring, and it is also equipped with a drainage hose, complete with drip prevention and storage hooks.

MATTRESSES

Suitable for Lojer's hospital beds, our mattress solutions have been developed together with industry leading manufacturers. Our mattresses have been designed in accordance with applicable hospital bed standards. They are suitable for low- and medium-risk patients, and, per product specification, for long-term patients in both home and hospital care.

FlexCare hygienic mattress

FlexCare is an excellent mattress for patients with low risk of pressure ulcers in settings such as hospitals, nursing homes and home care. The FlexCare hygienic mattress is designed for mobile patients who are not at risk of developing pressure ulcers. The mattress is 13 cm thick and made of fire-resistant, durable and high-resistant foam (density 40 kg/m³), with grooves on both sides. The grooved profile improves breathability and articulation of the mattress as the bed is adjusted to different positions.

The hygienic cover is made of PU coated polyester fabric which is impermeable to fluids while still maintaining its breathability. The material is Oeko-Tex certified, flexible in four directions, antibacterial and fire-resistant. The zipper is protected by a drip flap to prevent moisture from entering the inside of the hygienic cover. The easy-care cover can be washed in 70–95 degrees, turned inside out.

The FlexCare hygienic mattress is also available with a rescue cover. The fixed rescue cover is designed for rapid patient evacuation in case of fire, for instance. The top fabric of the rescue cover is made of the same material as the hygienic cover. The base material is made of smooth, water-resistant Oeko-Tex-certified PU-coated polyamide. The rescue cover has integrated pull handles on both ends. Long sides are equipped with velcro straps for securing the patient. Dedicated pockets are provided for stowing away the straps, ensuring they do not interfere with making the bed.

The mattress is available in the following sizes:
75/80/85 x 200 x 13 cm
78/88 x 205 x 13 cm

HighCare antidecubitus mattress

HighCare is a high-quality static antidecubitus mattress designed as a pressure ulcer-preventing lying surface for patients with low-to-medium risk of pressure ulcers in settings such as hospitals, nursing homes and home care.

The mattress is used as part of a prevention treatment programme for pressure ulcers. With a thickness of 5 cm, the upper layer of the interior is made of fire-resistant, softly conforming viscoelastic foam (density 50 kg/m³)

that balances tissue pressure and prevents pressure ulcers. With a thickness of 8 cm, the base is made of fire-resistant, high-resistant foam (density 50 kg/m³), which supports the patient and makes healthcare professionals work easier during patient positioning and patient transfers.

The hygienic cover is made of PU coated polyester fabric which is impermeable to fluids while still maintaining its breathability. The material is Oeko-Tex certified, flexible in four directions, antibacterial and fire-resistant. The zipper is protected by a drip flap to prevent moisture from entering the inside of the hygienic cover. The easy-care cover can be washed in 70–95 degrees, turned inside out.

The HighCare antidecubitus mattress is also available with a rescue cover. The fixed rescue cover is designed for rapid patient evacuation in case of fire, for instance. The rescue cover has integrated pull handles on both ends. Long sides are equipped with velcro straps for securing the patient.

The mattress is available in the following sizes:
75/80/85 x 200 x 13 cm
78/88 x 205 x 13 cm
78/88 x 215 x 13 cm
118 x 205 x 13 cm

Baby Mattress

For Baby Crib 381

A good, safe standard mattress for newborns, suitable for Baby Crib 381. The interior of the baby mattress is made of high-resistant foam, which is tested for fire safety. The easy-care cover is made of PU-coated hygiene fabric, which is impermeable to fluids while still maintaining its breathability. The material is flexible in four directions and protected against bacteria and mould (active ingredient zinc pyrithione). The zipper is protected by a drip flap. The cover can be washed in 70 degrees, turned inside out. Tested for fire safety (SL 1), flame and smouldering cigarette test IMO FTPC part 9. Size: 38 x 62 x 5 cm.

Antistatic stretcher mattresses

For Emergo Stretchers

Stretcher mattresses have been designed for transport and x-ray stretchers. The interior of the mattress is made of high-resistant foam, which is tested for fire safety. The interior of model 51701 (10 cm) consists of two layers. The softly conforming, viscoelastic surface layer alleviates tissue pressure, and the cover is made of PU-coated antistatic black hygiene fabric which is impermeable to fluids while still maintaining its breathability. The material is bi-elastic and protected against bacteria and mould (active ingredient zinc pyrithione). The zipper is protected by a drip flap. The mattress features velcro on its underside and 4 velcro straps at the sides for secure placement.

Available models include 51781 (8 cm) and 51751 (5 cm).

The easy-care cover can be washed in 70–95 degrees, turned inside out. Tested for fire safety (SL 1), flame and smouldering cigarette test IMO FTPC part 9. Sizes: 65 x 193 x 5/8/10 cm.

IV STANDS

Lojer's IV stands are used for numerous applications in hospitals, health centres, private clinics and home care. They can be attached to various Lojer beds and examination tables or moved between locations on their own castors. Lojer IV stands feature standard single-handed quick adjustment, making nursing work significantly easier. Lojer's IV stands are manufactured by Provita GmbH, a German company.

AI2110:

IV stand, straight model with castors. Chrome-plated steel, 4 hooks, capacity 4x2 kg.

Single-handed height adjustment 126–211 cm. 5x80 mm castors, 2 of which can be locked. Stand base diameter 63.5 cm.

60124H:

IV stand, elbow model with castors. Chrome-plated steel, 4 hooks, capacity 4x2 kg.

Single-handed height adjustment 148–188 cm. 5x80 mm castors, 2 of which can be locked. Stand base diameter 63.5 cm.

AI2120:

Heavy duty IV stand with castors. Stainless steel, 4 hooks with a capacity of 4 x 2 kg.

Single-handed height adjustment 150–235 cm. 5x75 mm twin castors, 2 of which are antistatic and can be locked.

Heavy duty base, stand overall weight 11 kg. Stand base diameter 63 cm

60129MRI:

Aluminium IV stand for MRI with castors. 4 hooks, capacity 4x2 kg,

height adjustment locked with screw. 5x50 mm twin castors. Stand base diameter 63.5 cm.

I-HA4130

Rainbow/yellow colours, airplane-shaped castors, capacity 4x2 kg, height adjustment with screw 135–200 cm. 5x50 mm castors, 2 of which can be locked. Stand base diameter 63.5 cm. Other models available include the I-HA4125 with rainbow/red colours and the I-HA4126 with rainbow/green colours and mouse-shaped castors.

A wide selection of handle options available as accessories

Push handle. Sliding handle for all mobile systems. Ergonomic design – easy to use, comfortable grip. Material: stainless steel.

Push handle. Optimal hygienic properties. Ergonomic design – easy to use, comfortable grip. Material: stainless steel.

MEDICAL LIGHTS

Merivaara's Q-Flow surgical light has received several design awards. Now the family has grown with two compact lights: Q-Flow 1 and Q-Flow 2 utilise the technology of the large Q-Flow surgical lights, where excellent tissue colour rendition is an essential feature. Merivaara's Q-Flow 1 examination light and the Q-Flow 2 minor surgical light are particularly suitable for smaller operations performed outside main operating rooms. The light heads can be easily connected to arms optimised for different procedures, improving the ergonomics of the healthcare staff.

The new lights of the Q-Flow product series can be used with one hand: this improves patient safety, as the user can keep the other hand clean for patient care. Disposable sterile handle covers are also available – they offer a hygienic and effortless alternative for sterilisation. Smooth design of splash proof enclosure ensures efficient cleaning of the product.

Q-Flow offers many benefits

USER-FRIENDLY WORKING CONDITIONS

- Single-handed use
- Detachable sterilisable handle
- Simplified user interface

EXCELLENT COLOUR RENDERING

- Close to perfect overall colour rendering properties
- Illuminates even minor differences in red coloured tissues
- Excellent skin colour rendering

ENABLES ASEPTIC WORKING CONDITIONS

- Elegant design combined with easy maintenance

CHAIRS AND SEATS

Our upgraded chairs and seats have been designed for healthcare professionals, and they were selected for our range in cooperation with occupational physiotherapists. The chairs and seats are made in Finland.

As part of the upgrade, we have improved the chairs and seats by reducing their base diameter – without compromising on their sturdiness. In addition, the chairs can now be fitted with, for instance, our new highly durable and stylish Future material, a white base and white castors. Saddle chairs can be equipped with a so called Pilates feature, which promotes active sitting and reduces back fatigue, eliminating the need for additional angle adjustment.

Ask for more information about chair accessories, which can vary by model.

Easy Rider Saddle Chair CH1100

Popular saddle chair with seamless upholstery. The chair can be fitted with our new, elegant and highly durable Future material (14 colours), with the Nature material (5 colours) or with optional black leather. The chair features seat angle adjustment and gas spring-assisted height adjustment, as well as a gas spring cover matching the base colour. The seat is 50 cm wide and 35 cm long. It has a safe working load (SWL) of 150 kg. Standard product configuration: polished aluminium base: Ø 528 mm | height adjustment range: Medium (54–74 cm) | black 65 mm castors | upholstery: Future or Nature

Featured product fitted with Future Plum upholstery and the following options: white base Ø 610 mm, backrest and white 65 mm castors.

Easy Rider Saddle Chair CH1100S (stock item)

Popular saddle chair available for fast delivery. Seamlessly fitted with our new, elegant and highly durable Future material, available in Carbon colour. The chair features seat angle adjustment and gas spring-assisted height adjustment, as well as a black gas spring cover. The seat is 50 cm wide and 35 cm long. It has a safe working load (SWL) of 150 kg. Available only with the following configuration: polished aluminium base: Ø 528 mm | height adjustment range: Medium (54–74 cm) | black 65 mm castors | upholstery: Future, colour: Carbon

Easy Rider FIT CH1200

New saddle chair with a narrower seat and seamless upholstery. The chair can be fitted with our new, elegant and highly durable Future material (14 colours), with the Nature material (5 colours) or with optional black leather. The chair features seat angle adjustment and gas spring-assisted height adjustment, as well as a gas spring cover matching the base colour. The seat is 45 cm wide and 35 cm long. It has a safe working load (SWL) of 150 kg. Standard product configuration: polished aluminium base: Ø 528 mm | height adjustment range: Medium (54–74 cm) | black 65 mm castors | upholstery: Future or Nature

Featured product fitted with Future Pistachio upholstery and polished aluminium base (Ø 528 mm) and the following options: black 65 mm locking castors and foot height adjustment

Easy Rider PRO Saddle Chair CH1300

Saddle chair with a 2-part adjustable seat. Seat width can be adjusted between 42 to 48.5 cm. Seamlessly fitted with our new, elegant and highly durable Future material (14 colours), Nature material (5 colours) or optional black leather. The saddle chair features seat angle adjustment and gas spring-assisted height adjustment as well as a gas spring cover matching the base colour. Seat length: 42 cm. It has a safe working load (SWL) of 150 kg. Standard product configuration: polished aluminium base: Ø 528 mm | height adjustment range: Medium (54–74 cm) | black 65 mm castors | upholstery: Future or Nature

Featured product fitted with Future Lagoon upholstery, polished aluminium base (Ø 528 mm), black 65 mm castors and with the following options: foot support ring

Step Anatomic Chair with Backrest CH1400

Anatomically shaped chair with a backrest. The chair can be fitted with our new, elegant and highly durable Future material (14 colours), with the Nature material (5 colours) or with optional black leather. The chair features backrest angle adjustment and gas spring-assisted height adjustment, as well as a gas spring cover matching the base colour. Seat length and width: 39 cm. It has a safe working load (SWL) of 150 kg. Standard product configuration: polished aluminium base: Ø 610 mm | height adjustment range: Medium (50–70 cm) | black 65 mm castors | upholstery: Future or Nature

Featured product with Future Sunrise upholstery and polished aluminium base (Ø 610 mm) and the following options: foot support ring and 50 mm ESD castors

Round Seat CH1500

Round seat that can be fitted with our new, elegant and highly durable Future material (14 colours), with the Nature material (5 colours) or with optional black leather. The seat features gas spring-assisted height adjustment as well as a gas spring cover matching the base colour. Seat diameter: 37 cm. It has a safe working load (SWL) of 150 kg. Standard product configuration: polished aluminium base: Ø 528 mm | height adjustment range: Medium (50–70 cm) | black 65 mm castors | upholstery: Future or Nature

Featured product with Future Sapphire upholstery and polished aluminium base (Ø 610 mm) and the following options: backrest and 50 mm brake loaded castors
