

Reconstruction of a communal building for housing for IDPs

The goal is to reconstruct the building of the former polyclinic on the St. Kemsogo, 69 in the Korosten city to create 50 apartments for internally displaced persons

It is planned to carry out work on the modernization of the facade of the building, carrying out measures to insulate the facade, implementing energy-efficient measures, re-planning offices for small-family apartments for 150 people, replacing communications, internal repairs, arranging a shelter (repair of the basement)

What does the community need?

- development of design and estimate documentation
- conducting an energy audit
- search and attraction of additional financing

Description of the building:

- the building has not been used for a long time
- the total area of the building is 3,883.9 sq.m
- number of floors – 4
- the area of the first floor is 764.8 square meters
- the area of the second floor is 777.3 sq.m
- the area of the third floor is 771.4 sq.m
- the area of the fourth floor is 782.9 sq.m
- basement area - 787.5 square meters, basement height - 2.9 m
- building height - 13.36 m
