

# A brief overview of how we **support** our **business partners**

Qubiz was born in 2008 from a simple idea: we put people first, both clients and colleagues. We grew rapidly by cultivating a great company culture. We are proud that our culture, alongside our deep technical expertise, are consistently praised by our clients.

# As an innovation partner

We made it our mission to break through buzzwords and put together cutting-edge solutions that deliver concrete results today.

## ◆ Data science

Statistical Modeling | Anomaly Detection | Predictive Maintenance  
| Regression | Classification | Clustering | Generalization

## ◆ Image processing and video analytics

Scene Understanding | Object Identification | Image and video  
processing | Scene segmentation

## ◆ Natural language understanding

Chatbots | Natural Language Processing| Q & A | Sentiment  
Analysis | Neural machine translation | Document categorisation

## ◆ Augmented and virtual reality

Hololens | Unity | AR Foundation

# As a joint-venture investor

Partnering with today's visionaries who see better ways to satisfy market needs, we invest in new ventures through expert teams that bring any vision to reality in ways customers feel they're getting a top-quality product.

## ◆ New product development

We partner up on building a new product from scratch. Our investment consists of building the first version of the product that's ready to be launched in the market.

## ◆ Product pivot development

We partner up on adjusting a pre-existing product that requires a major redesign to fit an identified market need. Our investment consists of rebuilding the software to match the pivot requirements.

# Technologies and tools

# Why work with us

## Flexibility and Scalability

With a large platter of technical skills, scale your teams easily and on-demand as needs change or new ones appear.

## Broad Capabilities

As covering business needs requires smart use of diverse capabilities we've taken a one-stop-shop approach to help our client.

## Faster Time to Market

Assemble teams of any size with fast kick-off and delivery time and respond quickly to market needs with a true agile mindset.

## Quality and Innovation

We take consistent steps to define what quality means on a case by case basis. This also sets a solid base for innovating in high value areas.

## Consulting Approach

Close collaboration, challenging ideas and advising improvements in processes and way of working (not just simple execution) is how we ensure desired outcomes.

## Cultural and Mindset Fit

As a European Union member country, we play under the same rules. Furthermore, from a culture and mindset perspective, we're a fit.

## Trusted Partnership, One Team

Great retention rates mean that teams will know your business inside-out and leverage diverse resources to deliver added value - together as One Team.

## Excellent Value for Money

Focus on core business activities as our highly skilled engineers take great care in helping you achieve your operational and business goals.

# *We innovate together*

Organisations that have  
trusted us to become their  
technological partner in  
reaching their business  
objectives.

# A well-trusted partner
