

Calida Aqua Ltd.

Founded in 2020 as a geothermal consultancy by Dragutin Domitrović, a seasoned oil & gas and geothermal professional with: (a) more than 30 years of experience in various engineering and managerial positions, and (b) unique reference of having been a project manager of construction and putting into commercial operation the first Croatian geothermal power plant, Velika 1.

The company offers a palette of advisory services to developers and investors into Croatian geothermal sector, based on in-depth understanding and hard-won experience in both technical and administrative aspects of developing a geothermal project in Croatia: from the first review of geothermal potential in an area, all the way to commercial operation of a finished geothermal power plant.
