

Who we are

SAGITTARIUS unites experts across 5 countries and 26 cancer centres to personalise post-surgery treatment decisions for people with colon cancer.

What we are working on

A clinical trial that combines liquid biopsy and tumour genomics to identify who needs treatment and tests personalised alternatives to standard chemotherapy.

What's the one thing we need next

We need strong patient, clinician and oncology-community engagement to complete the trial and translate robust results into European guidelines and practice.

**5 years Mission Cancer:
Stronger Through Connection**

BRUSSELS

29 SEPTEMBER – 01 OCTOBER
