

The **POLE FORMATION UIMM BRETAGNE** is a network of 7 Breton vocational training centers that provide training at both Leaving Certificate and Higher Education levels, funded by French industry.

The Institute of Technology of the **UNIVERSITY OF WESTERN BRITTANY** (UBO) is a public university welcoming over 25,000 students between 3 Breton cities offering a wide range of programmes and several training courses.

The **NATIONAL MARITIME INDUSTRIES CAMPUS** (CINav) is a joint initiative between public organizations and private industrials bringing together French coastal regions, industrial contractors of the maritime sector, trade federations and Ministries. It supports the maritime industry sector in meeting the challenge of entrenching a qualified workforce.

Together, we specialize in training apprentices in the following fields:

- **Boilermaking, Welding, Machining**
- **Electrical trades**
- **Industrial Maintenance**

Our **International Mobility** project, funded by the **EU Erasmus+ programme**, the **French government**, the **region of Brittany** and **Brest métropole**, is focused on the Maritime Industries, including:

- Naval and Nautical shipbuilding and maintenance
- Offshore Renewable Energy

Our objective is to develop **long-term partnerships** with Finnish and worldwide companies for the placement of interns:

- **2-week internships anytime during the year**  
(Professional Baccalaureate level/Vocational Leaving Cert)
- **3-to-6-month post graduate internships, from October/November/January**  
(Higher Education 2 year course level)

These internships come at no cost for host companies, all expenses (journey, accommodation and food) being paid for.

Through this collaboration, we aim to foster and promote the exchange of technical expertise and skills within the EU, contributing to the circulation of talent and competence across borders.
