## International

## Domestic

# Fintech Feature Catalog

Everything you need to launch a **crypto-native financial institution**

## Money Transfer

Domestic & cross-border transfers, global payouts, multi-rail routing

## Exchange

Spot trading engine (order types, market data, liquidity connectivity)

## Copy Trade

Strategy replication engine + governance tools

## Cards & Digital Pay

Plastic + virtual cards, NFC/tap-to-pay wallet provisioning, spend controls

## Risk & Limits

Collateral-aware dynamic limits, policy engine, real-time controls

## Channel

Dealership / franchise / agency operating system (roles, commissions, multi-branch)

## Wallets

Fiat + crypto wallets, multi-currency balances, funding sources, internal transfers

## Margin Trade

Margin trading module (risk rules, liquidation policies, leverage controls)

## Payments

Merchant acceptance (POS + online), checkout plugins, settlement tooling

## Treasury

Fiat stable conversion, liquidity routing, reconciliation outputs

## B2B

Escrow & milestone-based settlement, programmable contracts

## NFT / Tokenization

Fractional NFT buying module (issuance, marketplace, fractional ownership)

**Platform:** White-label, multi-tenant admin, APIs/SDKs, reporting & observability

# Featured Products

## In-house Request Management System

uses AI to organize and route requests across all departments.

## Your Company's GPT

A company-specific **GPT trained on your internal knowledge** enables employees **(within their permissions)** to get **fast, accurate answers** across **reporting, planning, HR, procurement, sales, and operations**. It **accelerates onboarding**, creates a **digital twin for leadership**, and **preserves institutional knowledge** when people leave.

## Whappio – Multi-Agent AI Chatbot + AI Voice Call Assistant (Text + Voice + Photo)

Whappio unifies conversations from WhatsApp, Instagram, Facebook, Email, and Telegram into **one inbox**, and delivers **24/7 AI auto-replies** that understand **text, voice notes, and photos**. It also includes an **AI Voice Call Assistant** that can **answer inbound calls and place outbound calls**, handle common requests end-to-end, and seamlessly **handoff to a human agent** when needed. Whappio routes and assigns conversations to teams/tags, supports **SLA-friendly escalation**, and adds **templates, campaigns, automation, and analytics**—so you can go live in days and scale support effortlessly.

## F&B APP - WhatsApp Ordering

Enables customers to place orders directly via **App & WhatsApp (and similar platforms)**, whether they're **at the table in your restaurant** or **ordering from home**. AI guides the flow, routes the order to the **waiter** and **kitchen**, and can also **collect payment** if desired.

## Meat & Dairy Traceability

**Meat & Dairy Traceability** – With a single QR scan, customers can see **which slaughterhouse, which animal, whether there are any drug residues, who performed the halal slaughter, which farm, and which certifications** apply to the meat or milk they ordered. The same traceability can also be tracked via **blockchain** for immutable records. If desired, you can extend the **same end-to-end tracking** to **other food categories** as well.

## Cowin App – Smart Farm Management & End-to-End Traceability Platform

Cowin App enables farms to manage operations in **one unified application**—including **herd management, veterinary/health records, breeding-treatment-medication workflows, milk & meat traceability, official compliance records**, and **financial/operational tracking**. On top of that, it provides **AI/GPT decision support** with anomaly/risk alerts and actionable recommendations, and—if desired—offers **blockchain-based immutable records** for transparent traceability across the supply chain.

We can quickly provide a PoC demo upon request.

# Featured Products

## Aesthetic & Health AI Super App

Super App for Wellness, Health, and Aesthetics.

## UpStage – Upload Your Music, Get Funded by Your Community

Upload your track, set a goal and supporter tiers, and let fans fund it **Kickstarter-style**. Once the goal is met, production and release kick off, rewards are delivered automatically, and the song **grows with the community**.

## Streaming Music Intelligence – AI-Powered Artist & Plays Analytics

Track **who's getting listened to, where, and how fast it's changing**—then let AI turn raw streaming numbers into insights: trend detection, audience segments, breakout signals, and actionable recommendations for release timing, promotion, and content strategy.

## AI-Driven Creator Affiliate Platform – Every Customer into an Influencer

A white-label, AI-powered affiliate infrastructure that helps retail brands convert **every customer into a micro-influencer** and drive performance-led growth. It centralizes **attribution, return-aware commission approvals, and automated payouts** in one panel—shifting spend from paid media to **sales-based creator revenue**, and optimizing marketing costs.

## AI Commerce Stack - B2B • B2C • B2B2C + C-Comm, Live&Social Comm.

One AI-native platform for **conversational commerce (C-commerce)**, **live commerce**, and **social commerce**—with **personalization, smart pricing, automated campaigns, fraud/risk control**, and **omnichannel orchestration** from chat-to-checkout-to-fulfillment.

## AI-Driven In-Store Retail Media & Shopper Intelligence

Manage your in-store screen network from a single panel, while running visitor analytics **on-device** so photos never leave the store—yet you still get **real-time audience insights**. Using these signals, **AI** makes **smart ad and promotion decisions**, matching the right creative to the right audience.

## Agriculture & Livestock Integrated AI Decision Support Platform

A TÜBİTAK-backed initiative that consolidates crop and livestock data into a single model and delivers **AI-driven decision-support modules** (forecasting, anomaly/risk detection, and operational recommendations). Built for **field pilots** first, then scalable rollouts with institutional partners for broader adoption.

## BiTarif – Cook, Share, Sell & Order Homemade Food

BiTarif brings food into one place: **share recipes**, connect with home cooks, **sell dishes**, or **order meals for delivery**. It also supports events, brand competitions, rewards, and a **HealthKit-enabled Health Mode**.

**bottomUP is a subscription-based social crypto trading platform that connects investors with analysts/traders and delivers trade ideas, news, and insights in one app.**

The screenshot displays the BottomUP mobile application interface. At the top, the BottomUP logo is on the left, and navigation links for Features, Join as an analyst, Status, Seed Capital Deployment, F.A.Q, and Contact us are on the right. The main content area features two overlapping smartphone screens. The front screen shows a trading interface for TIA/USDT with a +24.7% gain. It includes fields for Current Price (\$4,592), Entry Price (\$3,958), Take Profit (\$4,561), and Stop Price (\$4,636). Below this, a 'Monk Trade' section shows a BTC/USDT trade with a +29% gain, listing Current Price (\$58,722.24), Entry Price (\$54,722.24), Take Profit (\$66,928.4), and Stop Price (\$56,048.3). A 'Tradebucks' section is also visible. The background screen shows a 'Back to setups' screen for a 'Monk Trade' with a +29% gain, listing Current Price (\$58,722.24), Entry Price (\$54,722.24), and Profit details: 45% @ \$7,928.4, 35% @ \$66,928.4, and 20% @ \$52,110.24. At the bottom of the app interface, there are buttons for 'Download on the App Store' and 'GET IT ON Google Play'.

- CTOaaS & CPOaaS & CINOaaS

**An AI-powered, fun and educational platform for K-12 kids to learn coding.**

The screenshot displays the user interface for a student named Aras Basar, Level 24. The interface includes a top navigation bar with 'Live Lessons', a notification bell with 3 alerts, and a menu icon. The main content area is divided into several sections:

- My Journey:** A vertical timeline showing progress in 'Basic Loops' (3 stars), 'Functions' (2 stars), and 'Loop the Galaxy' (1 star).
- Current Mission:** 'Loop the Galaxy' (Level 5) with a description: 'Help Robot-X collect star fragments using loop commands!' and a 'Start Mission' button.
- Daily Quests:** Three quest cards with progress bars: 'Complete 3 Missions' (50 XP, 3/3 completed), 'Finish 5 Programs' (25 XP, 1/3 completed), and 'Earn 100 Coins' (10 XP, 2/3 completed).
- Home Works:** Two cards for 'Debug Challenge' and 'Code Race', each with a 'Play Now' button.
- KodBot:** A section featuring a robot character and a message: 'Hey there, future coder! Ready to start your amazing journey?' with an 'Open KodBot' button.
- Quiz Challenge:** A section with a brain icon and a message: 'Test your knowledge with interactive quizzes!' with a 'Start Quiz' button.

## What We Delivered?

- Audit & Diagnosis
- User Experience Design
- Development & Delivery
- Curriculum-based learning with topics and levels
- Practice & assessments (tests + homework)
- Teacher-student workflow (teacher code + "Ask the Teacher")
- Progress tracking & leaderboards (parent view + gamification)
- Partnership & Support
- CTOaaS & CPOaaS & CINOaaS
