Nesprit Ventures

We are a pre-seed / seed-stage VC focused on CEE.

At Nesprit, we're driven by the simple idea of leveraging technology and innovation to foster growth and sustainability in Central and Eastern Europe's emerging markets. We believe in the power of pioneering technologies and sustainable solutions across ClimateTech, WaterTech, FoodTech, and IIoT sectors to shape a future where progress and prosperity go hand in hand. Our work isn't just about putting money into businesses; it's about building a community where smart, creative people can come together, share ideas, and make cool things happen that help everyone. We believe there's so much potential in this region that hasn't been fully discovered yet, and we're here to help make those big ideas come to life.

nesprit

Professional offer

We offer comprehensive strategy, finance, IT, HR, and sales support to startups, focusing on growth acceleration, financial modeling for funding, IT optimization, team development, and global sales expansion.
