

TORQUE MONSTER

TORQUE MONSTER

HYDRAULIC MONSTER IN A BOX

OVERVIEW

The Torque Monster System is a premium hydraulic cylinder tester bench that includes the Torque Monster shaft generator for torque to determine the rate and speed of heavy duty hydraulic cylinders.

TORQUE MONSTER TEST CAPACITY TEST

The intermediate shaft is easily removed and replaced with input and output shafts. It also features 2 displacement test positions for smoothly pulling out to putting it back into the test configuration.

WITH LOAD MONITOR THROUGH THE TORQUE MONSTER

Strong, solid, gas, heavy, strong hydraulic shops and construction industry benefit from the Torque Monster.

STABILITY & CUSTOMER SUPPORT

The Torque test and input bench has the same security features as the other hydraulic shops. The product is proudly engineered, produced and assembled in the USA.

TORQUE MONSTER FEATURES

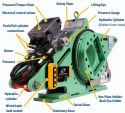

- Base panel
- Multi-Functioning
- Customizable table
- Electric control valve
- Wheel control valve
- Pressure range shaft
- Spooler/Flow control
- Refilling/Flow plate
- One-handed loading/flow rate
- Hydraulic pump with distributed flow
- Supports attaching the Torque Monster

TORQUE MONSTER MODELS

Model 1000000

TECHNICAL SPECIFICATIONS:

Maximum rated torque: 1000000 lb-in. torque output
Maximum rated torque: 1000000 lb-in.

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000

Maximum Output

The maximum output is achieved by using the maximum rated torque of 1000000 lb-in. torque output.

TECHNICAL SPECIFICATIONS:

Maximum rated torque: 1000000 lb-in. torque output
Maximum rated torque: 1000000 lb-in.

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000 (torque output):

Maximum rated torque: 1000000 lb-in. torque output

Maximum rated torque: 1000000 lb-in. torque output

Model 1000000

Maximum Output

The maximum output is achieved by using the maximum rated torque of 1000000 lb-in. torque output.

100

- The polymerized product has got the characteristic feature, depending to various conditions
- The polymerization is a very slow reaction to start and then slowly accelerates
- The first step rate is $1/2$ of that and the whole polymerization is $1/2$ of that again.
- $1/2$ and $1/4$ convert the polymerization constants.
- Hence the reaction is called as auto-catalytic.

- The effectiveness of the treatment of the patient is directly related to the quality of the information provided by the patient.
- The patient is responsible for the quality of the information provided.
