CR14

The force multiplier for cyber defence

CR14 is based on more than 10 years of military-grade cyber range experience and provides a wide range of cyber range solutions, including cyber range training, exercises, testing and validation.

CR14 is an official NATO partner organisation, cyber defence R&D hub and DIANA program testing centre. CR14 and its multiverse of cyber ranges help its public, private and research partners achieve their goals and improve their cyber security.

We know cyber defence.

WHAT WE DO

Cyber exercises

CR14 hosts the biggest live-fire cyber exercises in the world for NATO CCDCOE (Locked Shields, Crossed Swords) and the British Army (Defence Cyber Marvel). We also conduct smaller, tailored exercises for the defence sector, to test and prepare their cyber defence capabilities.

R&D projects

With the help of our global partners, we bring forth next-generation cyber defence solutions. From space technology to cyber exercise protocols - we help to shape the cyber defence of tomorrow.

Testing

Through our Open Cyber Range, we help to test, validate, and prepare defence industry solutions to safeguard them against cyber attacks and possible data breaches.

Capabilities

Key interest areas	Key capabilities	Key development solutions
Multi-domain operational exercises	Multiverse of cyber ranges & a highly experienced exercise team	Live-fire and tabletop cyber exercises
Cyber innovation	Cyber R&D hub	Innovation projects and NATO DIANA test centre TEVV
Cyber defence enhancement	Enterprise-specific development platform	Cyber security testing, development, experimentation and education

Multiverse of cyber ranges

CR14 — Estonian Cyber Range
National training
Defence training
Bi-lateral trainings

LOCKED SHIELDS · CROSSED SWORDS · DCM4 DEFENCE CYBER MARVEL

CR14 — NATO Cyber Range
Collective training, validation, experimentation
NATO CP 9C0121

STEADFAST DUEL 2024 · CYBER COALITION · CWIX

CR14 — Open Cyber Range
Supporting development of new technologies
Setting a new standard for cyber exercises creation
Open directly to the defence industry

NATO/OTAN · Norway grants · eis enterprise estonia

CR14 — Classified Cyber Range
NCCR
Collective training, realistic context & scenarios, mission rehearsal, OPS analysis & wargaming
Realistic Cyberspace OPS in MDO

CR14 — Space Cyber Range
Partnership with European Space Agency in ARTES 4S programme
Allows for testing space technology, trainings and enhancing cyber defence capabilities.
