Rocinha Tech

Environmental
education action within
a municipal school

Class with the highest points to
be rewarded with prizes

Waste collection and disposal

Who does the collection?

**Partner cooperatives
of Flori Tech**

*and we monitor
the entire process from start to finish.*

If your company or event already has a partner for waste collection, we can integrate them into the operation of our machines.

Where does it go?

**Registered and licensed
Recycling Centers**

*located closest to the machine's
operating area*

Flori Tech machines optimize the process at recycling centers, delivering waste already sorted and providing an efficient collection service.

Besides a collection point, there is much more included

1. Intelligent sensing for real-time monitoring.
2. Integration with APIs for operation automation.
3. Impact reports on the operation.
4. Flori Tech platform for remote management.
5. Continuous software and hardware updates.
6. Training for facilities teams.
7. Scheduled collection according to usage volume.
8. Proper disposal of waste.
9. Remote or on-site maintenance (preventive and corrective).
10. Environmental management, issuance, and monitoring of reports.

Turning waste
into data and engagement
