

MUSIQUENE TECHNOLOGIES
be creative!

Empowering creators with **AI-driven, science-backed**
no-code tools for interactive, **user-centered** solutions

Musiquene Technologies offers:

MUSIQUENCE TECHNOLOGIES
be creative!

Empowering Healthcare Professionals!

Healthcare practitioners can leverage the Musiquence Creative Edition to create engaging cognitive, music, and reminiscence-based stimulation activities, which can be seamlessly integrated across diverse technological platforms, including:

- 1. Augmented Reality** (for an immersive experience with real-world objects).
- 2. PC** (utilizing mouse and keyboard interaction).
- 3. Tablets and interactive tables** (compatible with both Android and Windows).
- 4. Sensor Technology** (supported by Kinect, Real Sense, and Leap Motion for enhanced interactivity).
- 5. Virtual Reality** (For an immersive virtual experience with a head-mounted display.)

This versatile approach allows for a holistic and adaptable approach to patient care and therapy.
