## DOC Network

## Doc Servizi: the first cooperative in Italy specialised in music, entertainment, events

Founded in 1990, Doc Servizi is the first cooperative enterprise in Italy specialised in the entertainment and events sectors, with the **aim of offering concrete and effective solutions to those professional fields characterised by a complex regulatory framework and discontinuous working conditions.**

Today, within the **Doc Network**, it acts as a single interlocutor offering agencies, companies, organisations and institutions organised professional services and products for the events, cultural, creative, entertainment, communication and innovation sectors, **guaranteeing competence, safety and quality** thanks to a **network of 10 companies and a capillary structure throughout the country.**

## ABOUT US

Thanks to our structure that covers the entire chain of professions in the cultural and creative industries, we have in-house all the solutions to offer multiple experiences with integrated and tailor-made planning for every type of event and service: from creation to production, business consultancy, integrated project communication and administrative management.

Funded budget: **200.000 €**

# Construction Agile 5.0

## Next Generation EU – PNRR

### INEST Spoke 4 – CITY, ARCHITECTURE AND SUSTAINABLE DESIGN

CASCADE FUNDING for Veneto and Friuli Venezia Giulia Regions (Italy)

Years: 2024-2025

ANCE Verona Costruttori Edili, as lead partner of the Consortium (6 partners)

### DOC Servizi as consultant for the project design and project reporting

Keywords: **agile – processes construction digitalization – sustainable construction – smart home and thermoregulation – agile factory – effective industrial production.**

Funded budget: **199.495,44 €**

*Through this project we intend to carry out Industrial Research aimed at defining the methodology for applying the Agile Method, which focuses on process effectiveness in industrial production, to the construction sector. Agile represents an Agile-based mode of physical product development that integrates Lean, Waterfall and other practices, removing the barriers between office and shop floor to make them an elastic, creative and human craft system that can quickly transform ideas into valuable and successful products.*

*The Research phase leads to the development of a software to be placed on a cloud platform, applicable to all phases of design, building construction, and smart home system integration. This platform will be tested to evaluate its effectiveness and consequently introduced into the market.*

# DumBO – shared creative regeneration

Project developed in 2021: <https://dumbospace.it/?lang=en>

DumBO (which stands for Distretto Urbano Multifunzionale di Bologna) is a **temporary urban regeneration space**. In Bologna, almost 40,000 square meters of the old freight yard Ravone, owned by FS Sistemi Urbani, are available to the city.

Sheds and open areas, in via Casarini 19, destined **to culture, art, social activities, music and sport** for mixed and always different activities, in close relation with the territory. A place where associations, business companies and citizens **collaborate and cooperate together**.

*The Doc Network collaborates in the events organisation and in the development of projects inside the space.*

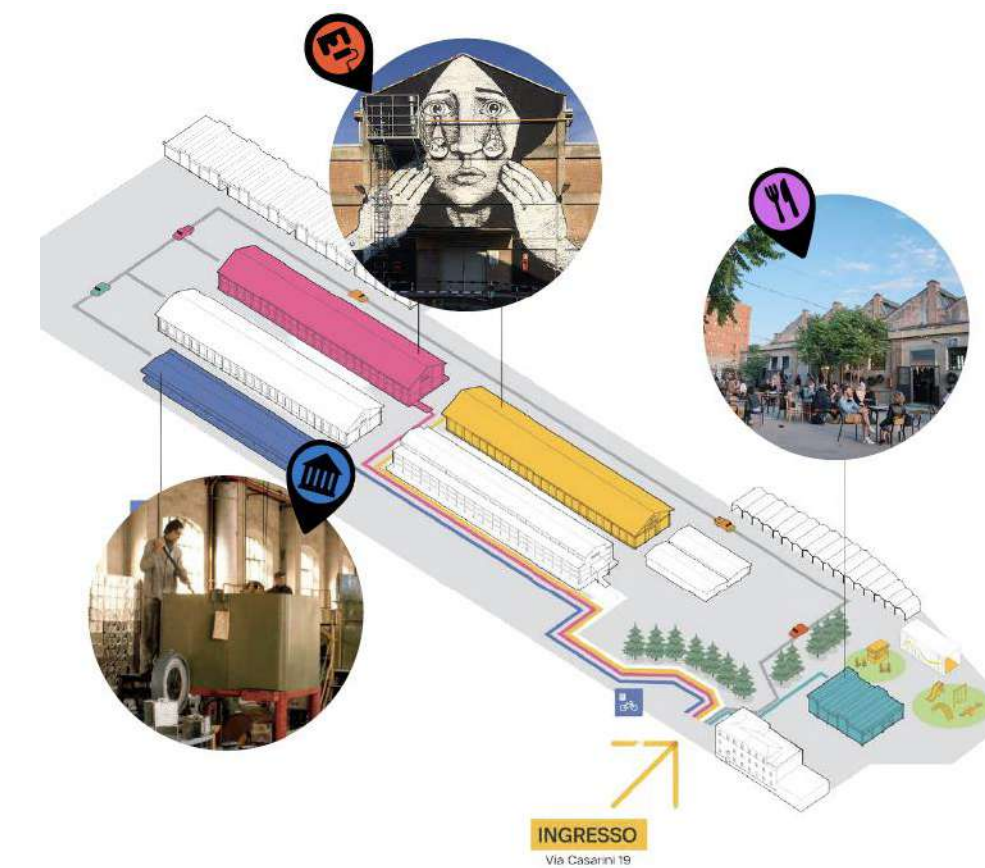

# RAVONE – Comunità di mestieri

Developed by Power UP team <https://power-up-team.com/en/homepage/>

The proposal for an **itinerant museum itinerary**, using the potential of new **digital technologies**, was born with the idea of making the spaces of today speak through the objects and protagonists of yesterday, highlighting the opportunities and social conflicts that innovation has generated.

The project result will be an **app** to offer an engaging and educational experience that combines past and present in a single digital platform (main targets are youngsters).

**The app is designed to explore and enhance the Ravone district inside DumBO space**, an area **of urban regeneration where businesses, associations, institutions and citizens coexist, collaborate and influence each other.**

*We are looking for  
funding opportunities*

## Song of the Land - SOTL

Developed by Power UP team <https://power-up-team.com/en/homepage/>

Song Of The Land is a fast-paced third-person **spellcasting roguelike** set in a fantasy universe strongly inspired by **European folklore**. The procedurally generated 3D world reflects various European regions and emerges from a cataclysmic event that merges dream and reality, unleashing mythical and threatening creatures.

Throughout the **game**, players can interact with mysterious towers that shift large sections of the world, adding a dynamic layer to the experience. The protagonist offers us a unique perspective on the world around her, as she is shaped by traits of **autism spectrum disorder**, which influence her perception of the things.

Song of the Land is designed for a **hardcore action roguelike audience** but also seeks to attract a broader player base through a **compelling narrative that introduces European folklore in a fresh, reinterpreted way**.

PowerUp Team relies entirely on its resources, including experienced developers in Unreal Engine and professionals in marketing and game commercialization, ensuring technical self-sufficiency.

*Doc Creativity submitted a project proposal for the call **CREA-MEDIA-2025-DEVVGIM**.*

*Information about the selected projects are expected to be in July 2025*

# Podcasts Projects

## E tu di che regno sei?

*(and what kingdom are you from?)*

PNRR-funded project for IC Muzio Montessori school in Bergamo (Italy)

Year: 2025

Keywords: **nature, animals, environment**

Link:

<https://open.spotify.com/episode/3lCdoecljGMg0zLTgKS47j?si=81012284a92a428e&nd=1&dlsi=6abde1ee453c4e33>

## Boomcast

podcast of Booming Contemporary Art Show, Bologna (Italy)

In partnership with Artnomade Milan and Mikipedia

Year: 2023

Keywords: **contemporary art, festival**

Link:

<https://open.spotify.com/episode/3t5fwUjFyaiPDDoUXJQ1NC?si=979e506783af4b03>

# Sustainable Events Management Hub - SEMH

Objective: **To promote the capacity of the arts supply chain to cope with security in the management of events in correspondence with climate change.**

Description: Through a process of **workgroups, needs analysis, validation of pathways and identification of good practices, new forms of event creation will be explored** which take into account protocols with a view to environmental sustainability, job security, inclusiveness and financial sustainability.

Keywords: **mitigation** of the environmental impact of events – green festivals network – metaverse tool.

*We are looking for  
funding opportunities*

# Festivals

<https://www.futurefilmfestival.it/en/home/>

24 FRAME Future Film Fest has been exploring the evolution of **contemporary animation** at both national and international levels since 1999, with a special focus on gaming, VFX, and media arts. **Founded in Bologna and expanded to Modena in 2021**, the Festival offers a program designed for a diverse audience, from schools to creative industries, fostering a dialogue between education and industry. Through this project we want to develop and implement the **Festival's relationship with European industrial community**. The aim is to create a platform for animated film in Europe, promoting the internationalisation of works and authors from Italy with a **special focus on the Emilia-Romagna Region**, while collaborating with international partners.

Aftermovie highlights 2025:

<https://www.youtube.com/watch?v=uiaXj5TVRDE&t=42s>

## BOOMing Festival of Contemporary ART

BOOMing Contemporary Art Show is the contemporary art fair that has decided to break down the concept of **"emerging"** by linking it to the literal meaning of being in the process of emerging and the need to emerge.

Participating Artists are those who share a feeling of emergency, understood as **urgency related to modern times and the role of art**. Interpreters of a necessary art, bearer of change, which critically confronts an acephalous age with inhuman rhythms, enslaved to a concept of unstoppable development.

# DOC Project

# The unit of the Doc Network for the research, design, management and reporting of Calls for Proposals and Grants

<https://docproject.retedoc.net/>

Doc Project is the reality born from the Doc Network's **many years of experience in the management of calls for tenders, contracts and the creation of interconnections between public and private entities**. Doc Project is able to provide its clients with an updated and complete scenario of the state of the art of funds, **to identify the most relevant funding opportunities available** on the market; to identify the most suitable public and private partners for the implementation of each individual project, and to **manage all aspects of project reporting**.

Doc Project provides its clients with a wealth of knowledge and expertise in identifying and recovering financial resources to support various types of activities and projects.

Through its staff and thanks to the Doc Network's of planners, Doc Project is able not only to identify the most appropriate sources of funding, but also to provide the client with the **professional skills most suited to the needs of the project** and the identified call for proposals.
