

BlueTechPort

Innovation by **Port de Barcelona**

An architectural rendering of a modern building at dusk. The building features a large, arched glass facade and a multi-story upper section with a grid-like structure. Palm trees are silhouetted against the twilight sky, and a full moon is visible. People are walking in the foreground plaza.

25,000 m² DEDICATED TO THE BLUE ECONOMY

Welcome to the innovation hub promoted by Port de Barcelona, a leader in the development of the blue economy.

WHY INVEST IN THE BLUE ECONOMY?

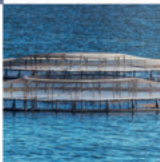

71% of the world's surface is water

3,59 million jobs created by the blue economy sector

623,6 billion euros in revenue

171,1 billion euros in gross added value

*According to the EU Blue Economy Report 2024, table 1

SECTORS

Recovery and recycling of plastic and other materials * Marine renewable energy * Marine biotechnology * Sustainable aquaculture * Sustainable coastal and maritime tourism * Big data and data analysis

At BlueTechPort, we promote the blue economy as a driver for sustainable development, fostering innovation and collaboration in key sectors to ensure a future that is in balance with our seas and oceans.

Barcelona

Discover an innovation hub
in the heart of Barcelona

» Pier 01

WHY BE PART OF IT?

Pier O1

PierO1, where BlueTechPort was born, is more than just a coworking space. Tech Barcelona-Pier O1 was ranked in the top five innovation centres in the world by Forbes magazine in 2017.

PRIVILEGED LOCATION

The building, covering 11,000 m², houses startups, corporations, incubators, investors, and institutions. It is located at a key point in the city, by the sea, between Barceloneta and the Gothic Quarter.

SYNERGIES AND COLLABORATIONS

Integration of BlueTechPort members into the ecosystem and initiatives arising from the synergy between Tech Barcelona and Port de Barcelona.

BLUE OPPORTUNITY

Opportunity to work in a space focused on the blue economy and receive support from industry leaders.

» Sant Bertran

WHY BE PART OF IT?

SANT BERTRAN

More space for innovation:

This BlueTechPort option housed in Warehouse 1 in Sant Bertran is the first step in transforming the old warehouses into a knowledge and innovation hub focused on the blue economy.

EPICENTRE OF MARITIME INNOVATION

This complex consists of six interconnected old warehouses, now housing a space dedicated to the latest advancements in maritime technology and sustainability.

BLUE FUTURE

The goal of BlueTechPort is to complete the restoration of all the Sant Bertran warehouses by 2027: a 25,000 m² hub where innovation will lead the future of the blue economy.

MORE THAN A HUB

A headquarters that serves as a bridge between the Port and the city of Barcelona, fostering an ecosystem rich in synergies and opportunities for everyone.

TIMELINE

In 2023, the BlueTechPort pilot test was launched at the Tech Barcelona facilities. In July of that same year, 200 square metres were refurbished at Palau de Mar to create a coworking space for 30 people. One year later, following the success of the initiative, the first of the six warehouses in Sant Bertran was inaugurated. At the end of this year, construction of The Lighthouse will begin, with completion expected by 2027.

SANT BERTRAN 2027

Cutting-edge and technology

The architectural plan includes energy-saving measures and the use of sustainable materials, optimizing natural lighting, ventilation, and water management to create a building with zero CO₂ emissions. This will be achieved through the installation of solar panels, cogeneration systems, and the responsible management of rainwater.

THE LIGHTHOUSE

The design enhances the distinctive volume and structure of the existing building, preserving the character of the port area while aiming for a cutting-edge and technological appearance.

WHAT DO WE OFFER YOU?

PROGRAMMES

With our acceleration programmes, we empower emerging companies in maritime technology and sustainability. These programmes offer financial support such as the Ports 4.0 funds or European funding, along with assistance from Port de Barcelona or the BCN Port Innovation Foundation.

ACTIVITIES

Meet like-minded people at events and themed conferences where emerging companies will showcase their capabilities, build networks, and gain global visibility.

- Events
- Fairs
- Conferences
- Seminars
- Others

CONNECTIONS AND GUIDANCE

We provide you with the opportunity to form strategic alliances with companies, universities, research centres, and other leading organizations in the fields of maritime technologies and sustainability.

OPPORTUNITIES

Receive support and stay up-to-date with the latest trends in innovation and technology.

- Collaborate with Port de Barcelona
- Conduct pilot tests, prototypes, or PoCs at the Port of Barcelona's testing space
- Be part of an innovative and diversified ecosystem
- Establish synergies with key players in maritime technology
- Participate in international conferences and fairs

SERVICES

We offer spaces equipped with cutting-edge technology, as well as private offices tailored to the needs of startups and corporations.

Additional services:

- Registered address and mail handling
- Office manager service
- Meeting rooms and communal area
- Auditorium
- Kitchen
- Gym
- Private utilities included (lighting, connectivity, electricity...)
- Bicycle parking
- Printer and scanner
- Parking

*Services may vary depending on the space (Pier 01 or Sant Bertran).

Blue Storage

Access to containers as a storage service.

Blue Lab

A testing laboratory to test your prototypes.

Blue Sandbox

Testing spaces available at the port to test your products.

Blue Workshop

Present and share your projects in a workshop focused on exchanging innovative ideas.

OUR RATES 2025

DESK	Personal workspace with 24/7 access	€185/month
PRIVATE OFFICE	Enjoy the privacy of your own office, +4 desks	€200/desk/month
MEETING ROOM	Book a room for your next meeting	€5/hour
AUDITORIUM	Versatile space for exhibitions, events, and networking	€200/day
