

Who we are

PREVENT is an EU Cancer Mission project uniting researchers, schools, health professionals and policymakers to reduce future cancer risk by addressing childhood obesity.

What we are working on

Living Labs in Greece, Sweden and Spain are testing and adapting childhood obesity interventions in real-world settings to understand what works, for whom and in which contexts.

What's the one thing we need next

We need to identify and scale the most effective approaches so schools, health professionals and policymakers can implement them across Europe.

**5 years Mission Cancer:
Stronger Through Connection**
