WORKING WITH PCB MUST

FROM REQUIREMENT TO PRODUCTION

A clear, secure and structured development process to turn your idea into a reliable, production-ready product.

1	2	3	4	5	6	7	8	9
DISCOVERY	REQUIREMENTS	ARCHITECTURE	DESIGN	REVIEWS	PROTOTYPE	BRING-UP	VERIFICATION	PRODUCTION HANDOVER

Understand your goals, constraints and success criteria.	Define technical, regulatory and commercial requirements.	Finalize system architecture, technology choices and key components.	Schematic design and PCB design with performance, reliability and manufacturability in mind.	Design reviews with you at key milestones.	Build and assemble prototypes.	Initial testing, debugging and performance optimization.	Functional, performance and pre-compliance validation.	Complete documentation and manufacturing files for smooth production.

NDA & CONFIDENTIALITY
Your ideas and data are safe with us.

MILESTONE-BASED DEVELOPMENT
Transparent process and clear deliverables.

REGULAR DESIGN REVIEWS
You stay informed and in control.

LONG-TERM ENGINEERING SUPPORT
Support beyond prototype for production and future revisions.

WHAT YOU RECEIVE

Source Design Files	BOM (Bill of Materials)	Gerbers / ODB++	Manufacturing Files	Test & Validation Documentation	Prototype Support	Production Handover

YOUR PRODUCT
OUR ENGINEERING
A SMARTER, FASTER PATH TO PRODUCTION
