## Company Information & Our Philosophy

### Company Philosophy:

- Our products are cost-effective: balance quality-cost-delivery time of products & service
- Our work is customer-oriented: providing professional products and service
- We are good at communication skills: precise and efficient communication with partners/customers

### Our Goal:

- to provide products and service with good quality, competitive price, on time delivery for benefiting customers & partners
- To create greater value for customers than the product itself, such as efficient service and communication, comprehensive cost optimization and professionalism in the overall procurement of different products, and the ability to create more new products or solutions for customers.

WELLE Technology Factory Club includes the following products:

### Customized Product Manufacturing

✓ With more than 30 years of experience, we are able to provide various industrial products. Incl.:

- **Injection parts,**
- Rubber/PVC/Silicon products,
- Fastener Parts
- CNC precision machining parts (non-metal & metal),
- Industrial Chains + Drive components
- Customized Bearing Unit
- 3D print products,
- Other customized products according to drawings and specifications.

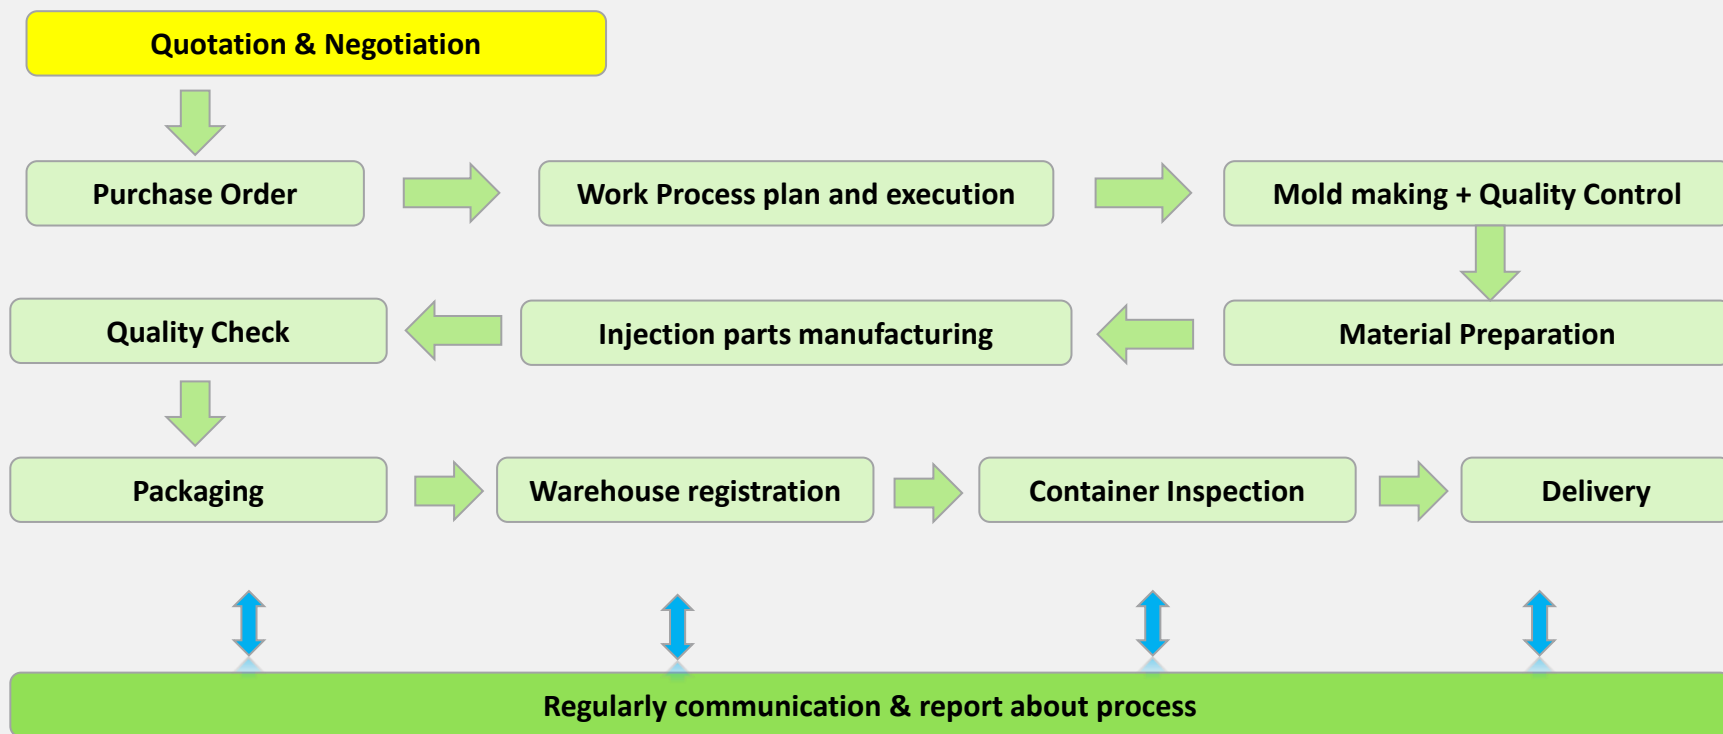

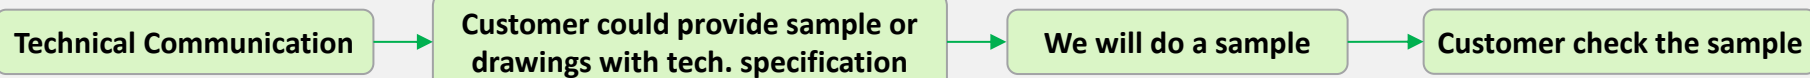

**Customized injection parts,  
which are made of variable materials e.g.  
PVC, PP, PE, ABS, PC, PA, POM, TPU/TPE, Acryl, etc.**

# Product Overview

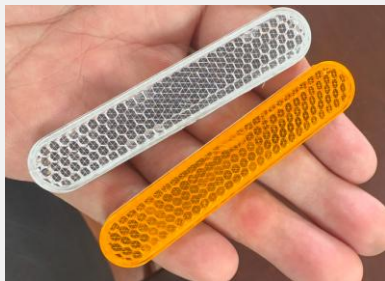

## Rubber / Silicone Products

### Technical Communication and Order Process

### Injection Parts

- We have many materials available for injection molding manufacturing, with high-level good quality of raw materials,
- Manufacturing according to customer requirements and drawings,
- Precision mold manufacturing. Molds work with a long life cycle,
- Injection molding machines come in various sizes and dimensions, with efficient performance and guaranteed high quality,
- We have years of mature experience in the injection molding industry, and this point is also an indispensable key to manufacture high-quality products
- The general delivery time of injection parts is short,
- We do transparent and efficient technical communication with customers, providing excellent technical services.

### Precision Machining for POM/PEEK material

- We have precision machining CNC machines of various sizes (including 4-axis and 5-axis precision CNC machines), which can not only complete precision machining for metals, but also process non-metallic materials with good rigidity, such as POM, PEEK, etc.
- Manufacturing is carried out according to customer requirements and drawings,
- Our products are widely used in various projects and products,
- Shortly delivery time,
- No problem with orders of small quantity!

- From beginning to the end of the projects and order, we complete the process in a professionally manner and response quickly:
  - The first step is to understand the detailed requirements of the customer. We have professional technical knowledge and remote technical communication skills.
  - Continue to track the manufacturing process and strictly follow high quality standards for quality control
  - We always do CIP process in the product and production process
  - Customer feedback and satisfaction are always very important to us.
  - We exchange technical experience with customers & partners. We provide our optimization suggestions to customers & partners during projects/orders period.

- Extensive product selection: One-stop purchase for various industrial products; Solution for all you need
- 100% quality assurance: high-quality sources and supplies with accurate delivery time control
- Cost-effective products and efficient services
- Comprehensive cost optimization and professionalism in the overall procurement of different products
- We give suggestions in the project to optimize the workflow or content
- We are able to create more new products or solutions for customers
- Professional remote technical communication, short response time
