Hungarian Water Partnership

The Hungarian Water Partnership (HWP) unites Hungarian-owned, export-oriented companies, national research institutes, and leading universities that share a common vision: to deliver innovative, sustainable, and cost-efficient water management solutions to the world.

Our members combine cutting-edge technology with scientific excellence and **practical experience** to address global water challenges. The drinking water and wastewater treatment solutions developed within our cluster are **internationally recognized** and some of them are listed by the **United Nations as SDG Acceleration Solutions—initiatives** that actively contribute to achieving the Sustainable Development Goals (SDGs).

OUR SOLUTIONS

Our aims

Through our projects, **we promote**

- **affordable, sustainable,**
- **efficient water management systems,**

especially **in regions where traditional water infrastructure is limited or unavailable**. Thus, we support communities around the world in building a cleaner, safer, and more resilient water future.

What we do

HWP offers a “one-stop shop” service to foreign partners interested in cutting-edge complex water industry solutions. To that end, it has built and maintains a network of professional contacts worldwide.

By fostering cooperation between

- industry,
- academia,
- and research,

we can offer integrated, innovative responses to global, regional and local challenges.

SUCCESS STORIES FROM OUR PORTFOLIO

HWP member companies are present in numerous regions around the world. Here are a few examples of the implemented projects:

Faecal Sludge Treatment Plant
in Kumasi, Ghana
Capacity: 1,000m³/d
Budget: 10€ million

Modular, mobile, pallet-based
water purification equipment
installed in Akim Wenchi
settlement, Ghana

Stormwater treatment at the
Lugoj-Deva highway,
Romania
ENVIATRP oilseparators
were installed

Drinking water treatment plant in
Quang Binh province, Vietnam
Capacity: 10,000 m³/d
Budget: 10€ million

Water exploration with
innovative hydrogeological
methods in Ngorongoro District
(Northern Tanzania)

Air treatment project at a waste
management centre, Subotica,
Serbia
Capacity: 20,000 m³/h

Arsenic removal equipment
combined with a disinfectant,
Hanoi, Vietnam
donated by the
President of Hungary

Independent Drinking Water
Provider - PurAID®- based
Drinking Kiosk System
Packaging-free, sustainable,
safe drinking water supply
technology

Stormwater solution for
NEXEN Tire plant in Žatec,
Czech Republic
1,200m³ of corrugated
steel pipes

Hungarian Water Partnership knowledge and solution portfolio

- ✓ Offers cost-efficient and affordable water solutions
- ✓ Provides partnership, professional cooperation and network on international level
- ✓ Supports realization of solutions, from planning to operation
