

Unbiased Expertise. Elevating AI, Together.

Your Strategic Partner for Responsible AI Advancement & Cross-Border Innovation

ARTIFICIAL
INTELLIGENCE
LATVIAN
ASSOCIATION

WHY PARTNER WITH US?

- **Unbiased Neutrality:** We prioritise the ecosystem's growth over individual wins, serving as an "honest broker" for your project
- **Evidence-Based Impact:** We don't just talk about innovation; we prove it through pilots, benchmarking, and real-world testing
- **Strategic "Widening" Status:** Latvia is a Widening country under Horizon Europe - partnering with MILA improves alignment with Widening/cohesion topics and broadens geographic coverage

HOW WE COLLABORATE?

We step in as a **Task Contributor**, **Work Package Leader**, or **Coordinator**, tailoring our involvement to where we add strategic value. For example:

- **Ecosystem Mapping & Regional Brokerage:** We don't just find partners; we curate the right stakeholders across the Baltic-Nordic region to ensure local relevance and impact.
- **Impact, Dissemination & Knowledge Hubs:** We ensure innovation isn't just a "PDF on a shelf" by managing dissemination, hubs, and measurable KPIs for real-world visibility.
- **Policy Alignment & Responsible AI:** We bridge technical innovation with regulation, providing AI Act readiness, ethical guidelines, and pre-normative standardisation support.
- **Capacity Building & Skills:** We translate research into market competence through hackathons, training, and workshops that up skill SMEs and public administrators.
- **Technical Implementation & Pilot Test-Beds:** We coordinate real-world validation - from LLMs to computer vision - by leveraging the technical infrastructure of our member network.
- **Ecosystem Growth & Funding Navigation:** We scout high-potential innovators and provide frameworks needed to prepare SMEs for cascade funding and scaling.
- **Project Management & Sustainability:** We provide neutral coordination and define long-term exploitation routes to ensure project results survive long after funding ends.

WHO WE ARE

Members: Corporates, SMEs, Universities, individual researchers as well as VET & Networking organisations

Sectors of interest: Energy, Manufacturing, Healthcare, Municipalities, Robotics

65+ members strong NGO: driving the AI ecosystem in Latvia. We do not just represent the industry; we act as a neutral connector uniting industry, government/public sector, and academia. We serve as your gateway to the Baltic-Nordic region, helping partners navigate everything from practical AI implementation to complex societal challenges.

OUR GOAL

To ensure AI is a beneficial force that improves productivity and quality of life for all!

THE MILA PROMISE

We are here to elevate the quality of collaboration. By partnering with MILA, you aren't just ticking a box for a "Latvian partner"; you are gaining a dedicated team focused on lifting the entire project to the next level of quality and impact.

READY TO BUILD THE FUTURE OF AI?

LET'S TALK!
