

Who we are

EVITA is a Portuguese patient organisation improving prevention, early detection and care for hereditary cancer while connecting patients, professionals, researchers and policymakers.

What we are working on

We develop patient-centred tools and contribute to European projects through patient engagement, co-creation, communication and improved hereditary cancer literacy.

What's the one thing we need next

We need patient organisations to be equal, sustainably funded partners throughout cancer research, from defining priorities to implementation and evaluation.

5 years Mission Cancer: Stronger Through Connection
