## THE NEW EUROPEAN SCENARIO Networking and Consortium

- The European context becomes more to more complex because of major crises, globalization, environmental defects and competitiveness. Thanks to my permanence in the capital of Europe, Brussels, **my company has create an italian consortium of constructors to transfer and get models for an innovative and adapting building to changes, based on an ongoing project of demolition and reconstruction building at Adriatic Seaside allocated at structural funds.**
- After an experience in NEB with a Municipality in Italy in the topic **«Regaining a sense of belonging»** I decided to help the italian buildings sector that is growing up but that lives big weakness, above all for the access to finance at European Level for a sustainable and modern infrastructure.

## TOPIC OF INTEREST

- The topic of interest of the ongoing consortium is
  - HORIZON-NEB-2025-01-REGEN-01 : *Applying-regenerative- design-built-environment-neighbourhoods*
  - But we are opened to other suggestions too.
- The consortium starts from italian companies and it is looking for partners all over Europe.
- The ongoing consortium has potential with SMART committment based on italian structural funds to integrate the opportunities at cohesion level.
