

Who we are

EU-CIP unites 40 partners across 19 countries to combine scientific evidence, patient perspectives, governance and digital methods for trusted European cancer information.

What we are working on

We are building a multilingual cancer information portal using AI-supported processing, expert review, translation and national adaptation within the European Cancer Patient Digital Centre.

What's the one thing we need next

We invite cancer information providers, patient organisations and health authorities to test workflows, connect national systems and establish sustainable governance.

**5 years Mission Cancer:
Stronger Through Connection**
