

Engineering Plus - Complete Solutions for Your Production

precision
machines
with a hot
heart

Are you looking for a partner who can handle **the entire engineering production process** from development to delivery?

Our **Engineering Plus** service offers comprehensive support – from **initial design** and **construction**, through **detailed technological procedures**, **precise machining** and **assembly**, to **delivery** and **service**. Every project is carried out with an emphasis on **quality** and **precision**, with maximum **confidentiality** guaranteed (NDA).

Whether you need help with part of a project or a **complete production solution**, we are ready to get started. **Contact us today** and turn your ideas into reality. **Your production, our commitment.**

Design department

- solutions and modifications
- drawing documentation
- process modeling

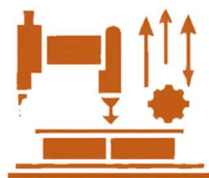

Electrical design

- control systems
- process simulations
- machine commissioning

Preparation of production

- productivity improvement
- fixture design
- technological procedures

Production

- 5-axis, pallet system
- grinding, welding
- heat treatment
- paint booth

Assembly

- heated hall 20x90 m
- cranes 12 500 kg
- installation in Europe, Africa, America, Asia

Quality

- 3D measurement
- 8D reports

Storage facilities

- tempered 1 500 m²
- covered 2 500 m²
- outdoor 15 000 m²

Expedition

- covered expedition hall
- gantry crane
- railway junction on site

Service

- worldwide service
- EN, DE, FR, RU
- hotline 24/7
