

THERMAL & STRUCTURAL ENGINEERING

Raise TRL faster — without surprises

What we do

We help satellite, subsystem, and electronics teams reach qualification faster — without surprises.

From design through environmental and in-orbit verification, we ensure your hardware performs reliably under real mission conditions.

Proven support across Design, Analysis, AIT, TVAC, and Vibration Testing.

With over 20 years of experience across LEO and GEO satellite programs — and participation in ESA and NASA reviews — now adapted to the pace and needs of NewSpace.

Global Presence

- **LATAM** - Argentina hub — core of our engineering, talent, and R&D
- **EUROPE** - UK branch — serving the European and UK region.
- **NORTH AMERICA** - US branch — serving US and Canada region.
