## Biohof Klaus Rapf

Date of registration	2025-05-17
Project name	Biohof Klaus Rapf
Project Holder	Bauernmarktfahrer Karmelitermarkt
Project Area in hectares	45
Regenerative solutions applied	Syntropic Agriculture, Humus Production, Cover Crops
<b>Voluntary attributes</b>	
Area-under-Management Date	1997-02-01
Regeneration Strategy	Embedding crop diversity; discovering new diversity and uses among untapped species or types of common cultivated plants; New biodiversity management models; New approaches to plant breeding and management; New crops, varieties and populations.
Policy Programs	Common Agricultural Policy CAP, Green Claims Directive - European Commission
Market Makers	Regional Farmer Market – Trader, Farm-gate sale

### Project Description

Biohof Rapf operates exclusively according to organic principles. We are based in the Seewinkel region of Burgenland (headquartered in Tadten) and stand for biodiversity and against food waste. Our focus is on rare and endangered fruit and vegetable varieties—especially heirloom chilis and tomatoes. Then there's what goes into the jars: In Austria, around one million tons of food end up in the trash each year.
