

The Future of Arbitration Is Intelligent

Traditional arbitration can be time-consuming, document-heavy, and administratively complex.

Legal teams, arbitrators, businesses, and parties often face:

- Large volumes of documents
- Repetitive case review tasks
- Delays in organizing evidence
- Complex timelines and procedural steps
- Difficulty identifying key issues quickly
- High administrative workload

xArbitration brings AI into the process.

By using artificial intelligence to support arbitration workflows, xArbitration helps users organize information, accelerate review, and manage disputes with greater efficiency.

Let AI Transform the Arbitration Process

Bring intelligence, speed and structure to dispute resolution.

Built for

Businesses · Legal Professionals · Arbitrators · Institutions · Online Platforms

What Makes xArbitration Different?

Built Around AI-Driven Dispute Resolution

xArbitration is designed to support arbitration with intelligent digital tools that help simplify complex case management.

The platform helps users work more efficiently by supporting tasks such as:

- Case information organization
- Document review support
- Issue identification
- Evidence structuring
- Workflow guidance
- Summary preparation
- Procedural tracking

More intelligence. Less manual effort.

xArbitration helps users focus on strategy, decisions, and resolution instead of spending unnecessary time on repetitive administrative work.

INPUT & AUTOMATION

Capture. Organise. Understand.

AI-Powered Arbitration Document Generation

Generate Key Documents Using Your Own Templates

Users can generate arbitration documents using structured case data and your own templates.

Generate

Arbitration Notices · Responses · Awards ·
Corrigenda · Case Documents

CASE DATA → AI → DRAFT DOCUMENT

Key Advantages

- Use your preferred formats
- Create consistent drafts
- Reduce manual drafting
- Save preparation time
- Improve data accuracy
- Maintain standard formatting

Your Format. Your Data. AI-Assisted
Drafting

AI PROCESSING & DOCUMENT GENERATION

Analyse. Generate. Draft.

Benefits of AI-Powered Arbitration

Faster Case Preparation

Prepare case materials with less manual work.

Smarter Document Handling

Review and organise information efficiently.

Improved Clarity

Turn complex information into structured insights.

Reduced Administration

Spend less time on repetitive tasks.

Better Organisation

Keep case information structured in one place.

Scalable Dispute Management

Support multiple cases and workflows efficiently.

SECURE & RELIABLE OUTCOMES

Protect. Comply. Deliver.
