# lemonworx

Lemonworx optimises manufacturing processes with AI-powered solutions and engineering expertise.

The ROI potential is compelling when using computer vision, with faster issue detection lowering defect rates, cutting down on rework costs, reducing downtime, improving throughput, and improving safety and compliance — ultimately delivering immediate and long-term financial gains for manufacturers.

Discovery Session:
Process and Outcomes

As manufacturing rapidly transitions to Industry 5.0, integrating Computer Vision into production lines is no longer optional—it's essential for staying competitive. Companies that fail to embrace these advancements risk falling behind or even becoming obsolete. Starting with a discovery session provides a no risk, high-impact way to explore this transformative technology, ensuring a smooth and strategic adoption before it's too late.

FREE OF CHARGE

Discovery Session

A 4 hour on-site assesment to identify potential collaboration scenarios for computer vision.

- Preparation Session
- On-Site Discovery Session
- Post-Session Analysis & Report
- Follow-Up

Initial pre-session to confirm objectives

Factory walkthrough, problem identification, defect analysis, and solution brainstorming

Data analysis, solution design, pricing estimates, and rough ROI estimation

Present findings in a concise report and discuss the next steps

Ready to get started? Book your free discovery session now and take the first step toward your goals!
