

Who we are

LAPIN brings European experts in lung cancer screening, epidemiology and public health together to improve risk-based screening and understand radon-related risk.

What we are working on

We map smoking behaviour, estimate screening-eligible populations and study radon exposure to improve lung cancer screening criteria and programme planning.

What's the one thing we need next

We need screening programmes, national survey data and stakeholder collaboration to test radon criteria, refine tools and support practical screening implementation.

**5 years Mission Cancer:
Stronger Through Connection**
