

SIA EMJ Metāls

The company was established in 2010, with prior experience in the metal industry since 2005.

Our core competence lies in sheet metal cutting and bending services, with the final product being prefabricated sheet metal parts tailored to customer orders.

Our products serve diverse industries such as construction, energy, mechanical engineering, woodworking, ship and boat building, the military sector, mining, and more.

We strongly believe in creating mutually beneficial deals, and "win-win" is our motto.

Our focus is on cultivating long-term partnerships with our customers.

By leveraging our extensive material stock and a wide range of cutting and bending equipment, we offer competitive prices and short delivery times. We approach each customer individually, considering their needs and our capabilities.

**Laser cutting
tables up to:
8150*2600 mm**

volume is 40 tons of
metal per day**

**Plasma
cutting table layout
up to 4000*20000 mm
with bevel cut,
drilling, threading
option**

**For the
defence sector,
full in-house
production**

**Export to Baltic,
Nordic, Benelux
(references
upon request)**

**We can bend up to
20 mm s355MC
steel with bending
length 8000 mm
@ 125 tn./m**

**Production facilities:
11 500 sq. meters**

**Additional
services: welding,
machining, galvanizing,
painting
(upon request
availability)**
