

PULP Y.

paper yarns

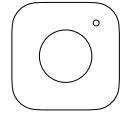

Magic Pulp develops threads made from natural papers, offering a lightweight, durable, and recyclable alternative to traditional synthetic fibers. Suitable for crochet, weaving, or embroidery, these threads allow for the creation of original textiles that blur the line between fabric and sculpture, for fashion, decoration, and scenography. Designed for both handmade and automated production, these threads integrate into industrial processes and open up new possibilities in textiles, packaging, and interior design.

INNOVATIVE & RESPONSIBLE PAPER YARNS

PULP Y. is a range of paper yarns developed by Magic Pulp, made from natural cellulose fibers. Lightweight, flexible, durable, and fully recyclable, these yarns provide an eco-friendly alternative to synthetic fibers, while maintaining a refined aesthetic. Their 100% cellulose composition ensures a controlled end-of-life through the existing paper and cardboard recycling stream, aligned with a sustainable and responsible approach.

CRAFTSMANSHIP MEETS INDUSTRY

Suitable for crochet, weaving, or embroidery, Pulp Y yarns allow for the creation of textural and expressive textile surfaces, ideal for experimental fashion, interior decoration, or scenographic installations. Designed to be used on both artisanal and industrial scales, they can be integrated into semi-automated or automated production lines, opening new possibilities in textile design, luxury packaging, and interior applications.
