

# DPM Data Discovery

Automate the Hardest Part of Privacy:  
*Knowing What Data You Have and Where.*

---

Personal data hides in emails, logs, shared drives, and legacy systems. **DPM Data Discovery** finds and classifies it all—so you can stay compliant, reduce risk, and take control.

## FULL VISIBILITY

Map where personal data lives—structured or unstructured, across all systems.

## LESS MANUAL WORK

Automate months of manual discovery and reduce team workload.

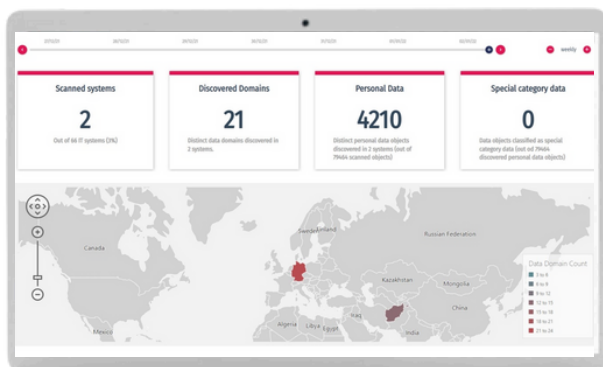

## AUDIT-READY

Maintain complete & accurate data visibility to meet regulatory audits with confidence.

## LOWER RISK

Detect vulnerabilities early and prevent compliance risks.

## SMART PRIVACY FOUNDATION

Power smarter data removal, consent, and governance.

## What Makes DPM the Smart Choice?

- ✓ **In-House Processing:** No data leaves your environment. No third-party risk, no data exposure.
- ✓ **Language & Script Agnostic:** Accurately detects personal data in any language or script, including Cyrillic or Arabic.
- ✓ **AI Based Solution:** Combines machine learning with rule-based classification for precise detection across all data types.
- ✓ **Structured & Unstructured Data:** Most tools focus on databases or structured sources. DPM goes further—handling PDFs, emails, Excel sheets, logs, and more.
- ✓ **Cloud & On-Prem Compatible:** Flexibility in deployment. Works whether your company is fully cloud-based or on-prem.
