

BULGARIAN JOINT CANCER NETWORK (BJCN) – MISSION, RESOURCES AND INITIATIVES

1 / About us

Legal form

Established in 2021, the Bulgarian Joint Cancer Network (BJCN) is a **non-governmental non-profit association** with public benefit activities.

In social terms, it is an **open cluster organization**, that functions as an ecosystem of medical and non-medical societies with a wide range of multidisciplinary interrelations in the field of oncology.

BJCN is **the only non-governmental health cluster** and designed to provide expert activity in the field of clinical oncology through synergy between the scientific societies in Bulgaria.

Mission

The BJCN operates through **network synergies**, being differentiated into cluster sectors and relevant coordination groups, adhering to three principles:

- 1) multiplication of cluster interactions,
- 2) exchange of mutual benefits and
- 3) positive external cluster effect.

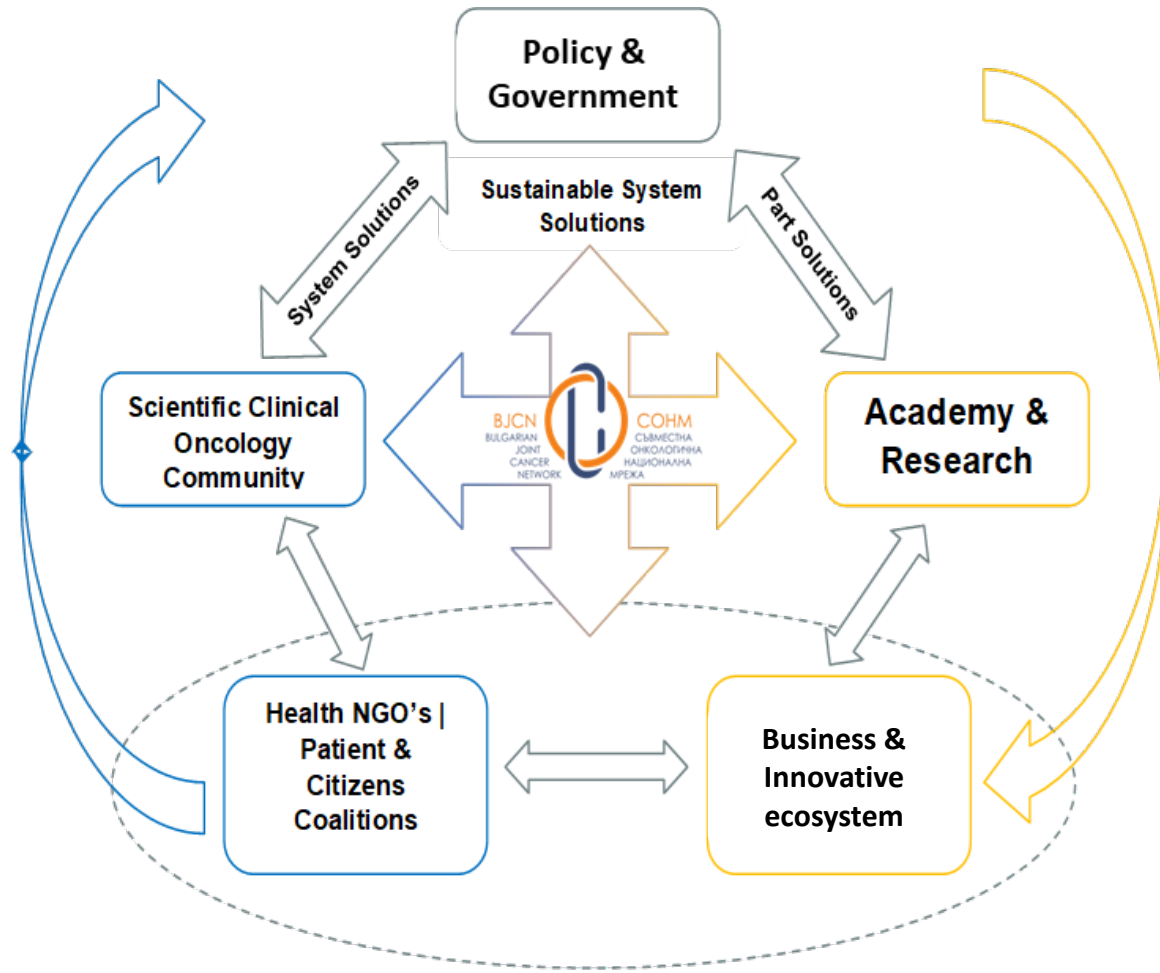

Goals

Building Bridges: moving beyond and toward open European collaboration, optimize the network within the cluster at the “triangle” of social knowledge (universities, industry, government);

Ecosystem: achieve synergy in the expert functions and all Stakeholders in Bulgaria for empowering and implementing solutions in direct correlation with the National Cancer Plan;

Co-create: a sustainable environment as prerequisite for development of innovative oncological care in Bulgaria, through the imperatives of screening and prevention, diagnosis and treatment, psychosocial support and quality of life, and tech-convergence.

2 / The BJCN vision

Sustainable System Innovations by tailoring healthcare to accelerate outcomes for oncology patients, healthcare workforce, and the broader socioeconomic system we aim to drive positive and lasting impact in cancer care and beyond.

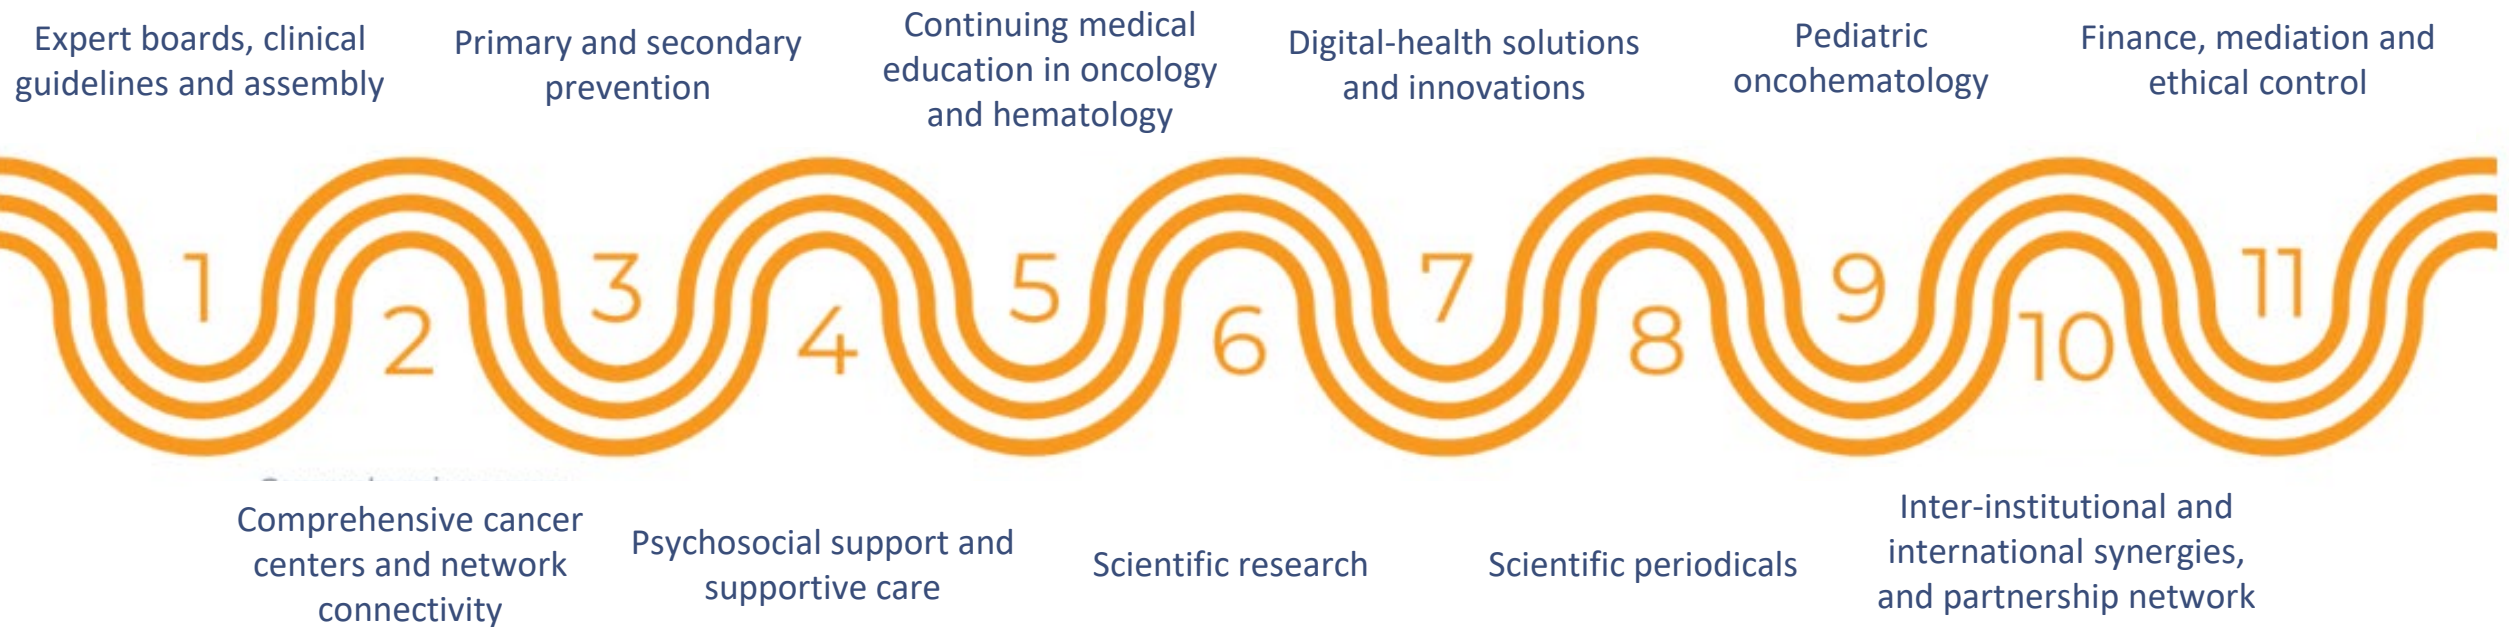

Impact on the "bandwidth" of Stakeholders engagement, with long-term cumulative effect implies sensitive social and financial efficiency.

Accelerate Innovative Advancements in comprehensive cancer care through creative synergy among various traditional and non-traditional stakeholders in Bulgarian health ecosystem, in line with European values.
