Services

We Provide Full Range Of Premium Engineering Services For Your Business

INITIAL FIELD EXPLORATION AND EVALUATION

Natural resources like Oil, Gas and Geothermal Energy are trapped in reservoir rocks buried underground (on shore/ off shore), developments in science and technology have made oil, gas and geothermal resources exploration more efficient.

IPM Methodology uses various means from testing subsoil for onshore and offshore exploration. From geological data in governmental databases to seismic imaging of the earth’s subsurface produced by seismic echography, our geoscientists analyze and evaluate all these data to locate hydrocarbon or geothermal accumulation.

We help our clients to build a model of geological layering of the subsurface, to identify potential reservoirs.

IPM Solutions works together with Energy companies helping them to access mineral rights granted by governments by either entering a concession agreement or a production-sharing agreement where the government retains ownership and participation.

Exploration and Evaluation of potential reservoirs is a high risk and expensive business. Besides the Geological and Geophysical evaluation, IPM Solutions assist our clients with:

- ✓ Studies of a specific country’s legislation and their requirements.
- ✓ Plans and Schemes for Renewable Energy Sources.
- ✓ Analysis and study of a specific energy market.
- ✓ Feasibility studies.
- ✓ Cost and benefit evaluation.
- ✓ Project audits.
- ✓ Documentation preparation for funding from specific governmental assisting programs.

INTEGRATED DRILLING PROJECTS

Through IPM Solutions methodology, our clients have a single point of contact that helps to achieve their drilling and financial objectives faster, while minimizing the operational risks.

From independent services to full well construction, we have a business approach that has proved to be successful in many projects during our more than 30 years of work in the Drilling Industry, Land and Offshore.

For Integrated Well Construction, IPM offers:

Well Engineering

Our Well Engineering services comprise engineers with long experience in drilling projects around the world. Working together as Team, incorporating all Service Companies proved to be effective on all projects.

Project Management

IPM Solutions integrated Well Construction Management Team includes many projects managed successfully in the past years, safely, on time and within the budget.

Onsite Supervision

IPM Solutions provides onsite supervision, with engineers that have been on site over 20 years, with a strong track record of delivering safe projects on plan.

RESERVOIR TESTING & EVALUATION

Whether downhole or surface, oil, gas or geothermal, in exploration, producing or flowing back after fracking, IPM Solutions Reservoir Testing Methodology, has proven to be environmentally friendly and through proper DATA Analysis and Evaluation we help our clients to confirm the capacity of their reservoir.

IPM Reservoir Evaluation provides answers to well pressure, ideal flow rates, temperature, and fluid properties to maximize fluid recovery.

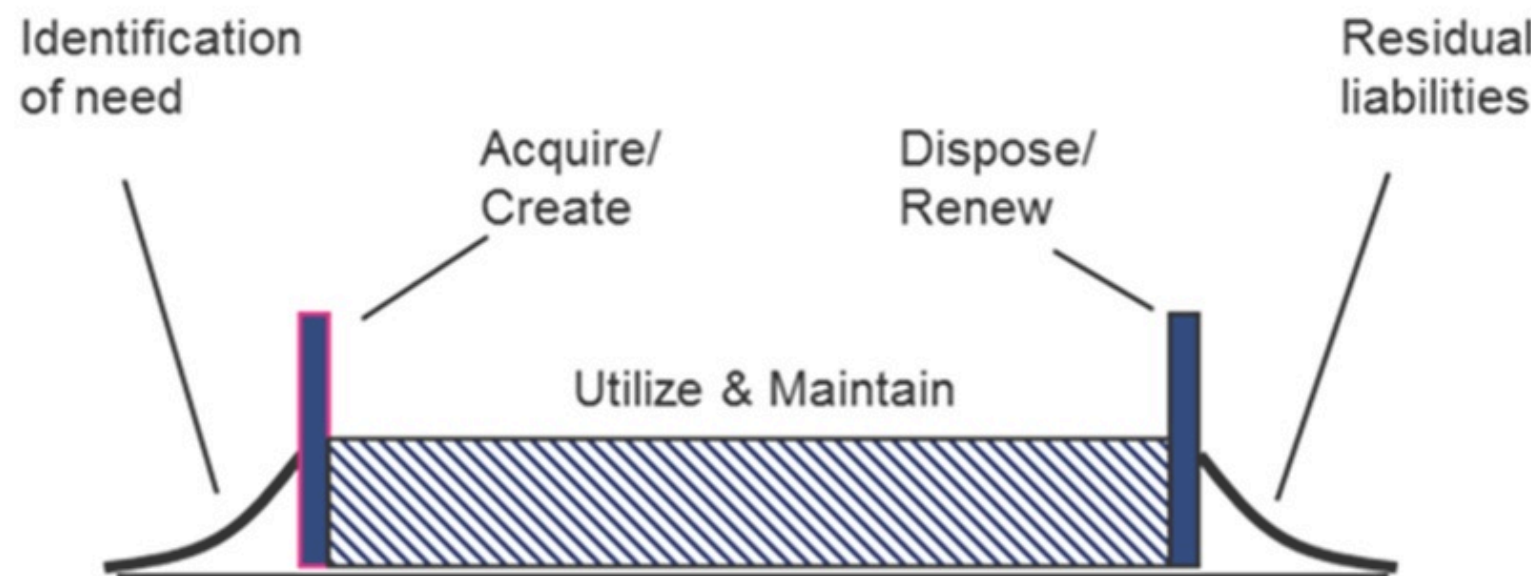

We help our clients to integrate the best available Service Company locally together with international suppliers of materials, equipment, and personnel to achieve a Reservoir Testing Program within their budget, on time and acquiring all necessary data and information for their specific Reservoir Characterization. We do this by focusing to relevant parameters for a specific reservoir and eliminating expensive equipment and techniques that will bring no relevant information.

By integrating and evaluating Seismic, Geological Mapping, Cuttings Evaluations, and Open Hole Logs with specific Surface and Downhole Testing Data, IPM Reservoir Evaluation bring up a complete characterization model of the reservoir. including petrophysics, geology, geomechanics, and geophysics.

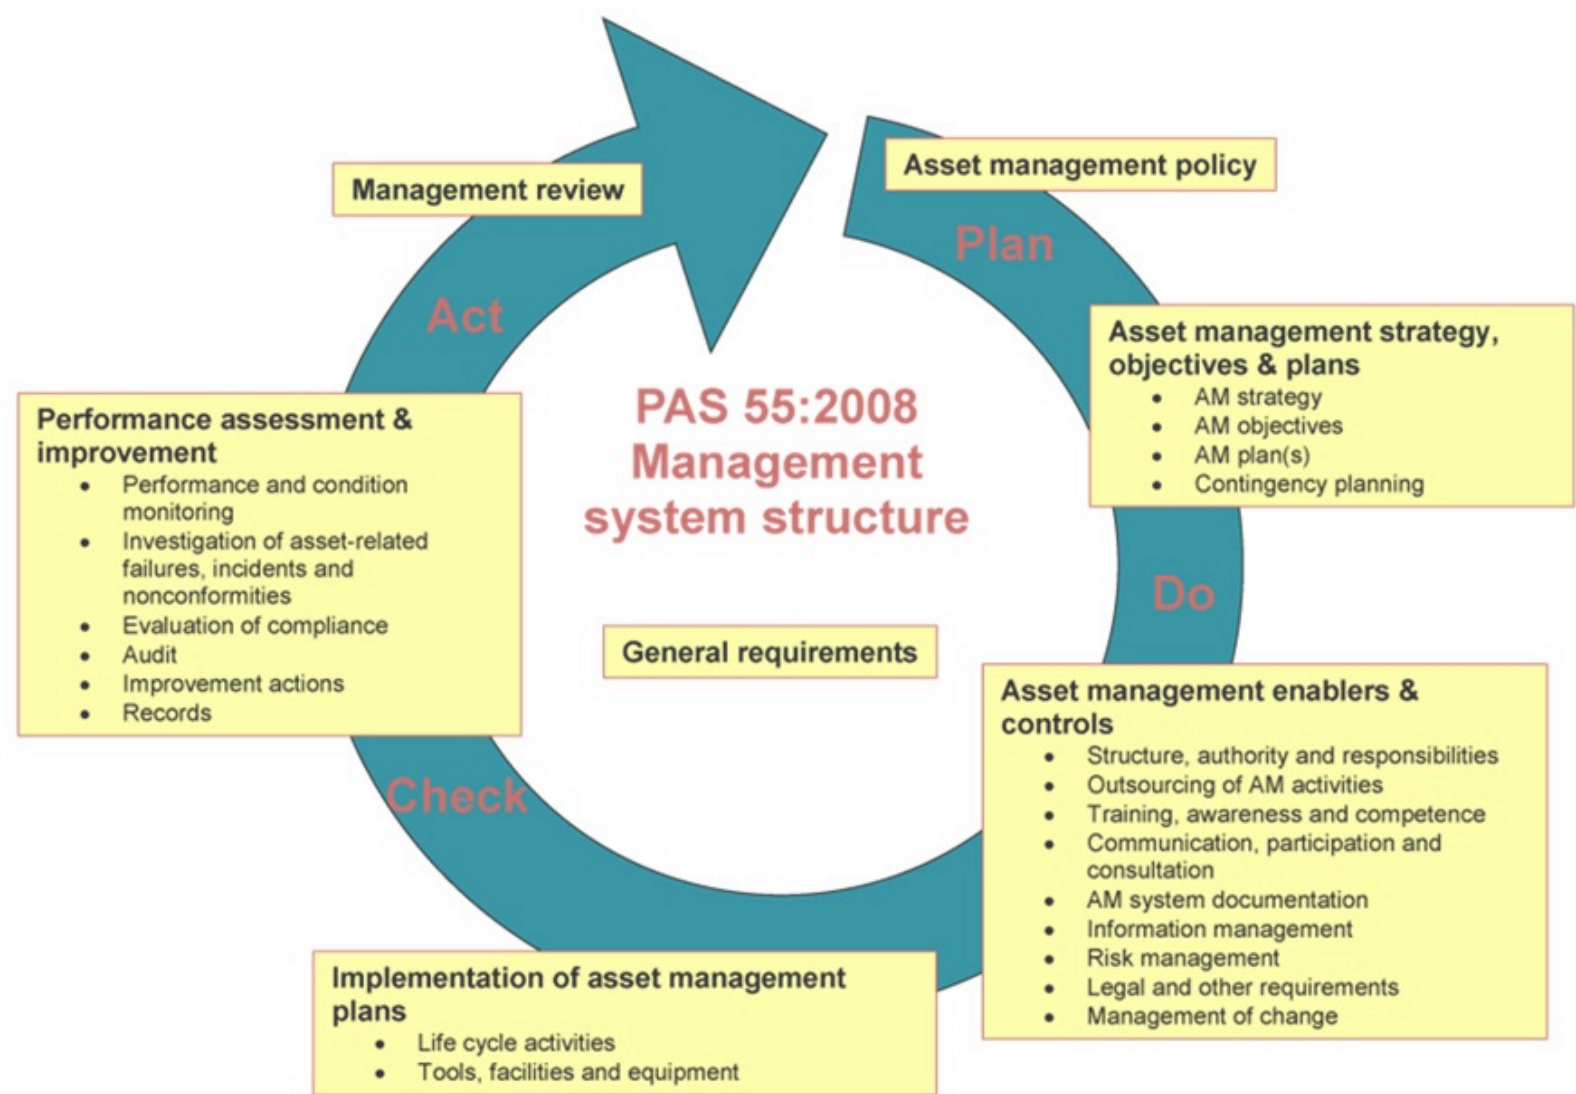

Our goal is to help clients to understand the most from their reservoir.

ASSETS MANAGEMENT

Our Asset Management and Maintenance System clearly indicates what is needed to manage your assets throughout their entire life.

IPM Solutions methodology and eXimo i-ASSETS is a Management Tool that allows complete control over assets and a systematic follow up of the Maintenance Programs.

By providing Hosting Services for eXimo i-ASSETS, without large equipment investments or expensive licenses, and only having internet connection our clients have access to all Assets information including full Assets History and Financial Status.

QHSE

IPM Solutions has access to an important source of technical knowledge and experience with its professionals who operate around the world in many different terrains. We collate and distil this valuable knowledge for the industry to use as guidelines for good practice.

A Company Culture can be defined as the attitudes, values and beliefs that mark “the way they do things within their organizations”.

organizations which are characterized by their “chronic sense of unease”. Organizations must ensure that senior management are committed to a journey of continuous improvement.

IPM Solutions QHSE Program electronically supported by eXimo application software i-Quality (QHSE Management System) will provide an easy and strong tool to improve the QHSE Performance at all levels in your Organization.

DRILLING SOFTWARE AND IT SOLUTIONS

IPM Solutions is the dealer in Europe of EXIMO Software Development.

We set out to solve complex operational problems faced by companies in the Oil & Gas segment by designing efficient software, backed by our experience in daily operations, based on solid and proven research, which has made us leaders in several local markets and competitive with similar solutions worldwide.

Along the way, we work with multiple companies from various industries, all focused on growth models leveraged in technological development, where we contributed with our experience in scalable infrastructure, project management, and knowledge of solutions specific for each business.

"Together IPM Solutions and eXimo offer end-to-end real-life experience, technology expertise and IT support to help our clients build a forward-thinking digital environment, with a smart and user-friendly design tailored to their specific growth needs."

			
iQuality <i>Quality Management, Safety and Environment</i>	iActivos <i>Preventive and Corrective Maintenance</i>	eXimoDrill <i>Integral Management for the Oil and Gas Industry</i>	eXimoSIO <i>Efficient management of Oil & Gas assets</i>
Application that allows to carry out the management of processes under ISO Standards. Your findings, Document Management, Incidents and other tasks related to processes, can be managed with this tool.	It allows the detailed management of preventive and corrective maintenance of company assets. Mainly oriented to companies in the Oil & Gas industry.	Its objective is to have a Command Board (BSC) with indicators that reflect the activity of the company, both in financial, economic, operational and quality areas in general. It allows the integral management of the so-called "tower companies".	Track, configure, optimize and strategically manage your IT assets Oil & Gas throughout its life cycle. The solution's configurable design helps you define and follow your own workflows or implement pre-defined processes to use.

Ipm Solutions Spain

📍 Lope de Vega 16 – Of 1.
07013 Palma de Mallorca
Is. Baleares – España.

👤 Angelo Bianco
☎ +34 689 805 848
✉ angelo@ipmsol.com

Ipm Solutions Croatia

📍 Trnjanska cesta 67
10000 – Zagreb City.
Zagreb – Hrvatska.

👤 Zoran Veselinovic
☎ +385 988 712 75
✉ zoran@ipmsol.com

Ipm Solutions Africa

Kenya (East African Community Partner State)

📍 Amrutha Apartment, Office A3, 2nd Floor
Brookside Drive, Westlands.
Nairobi – Kenya.
