WHO WE ARE?

+120
PROJECTS

4
CONTINENTS*

+200
COLLABORATORS

Through in-depth analysis and intelligent use of data, we enable businesses to make informed decisions, better understand their customers, and quickly adapt to market changes. Our data-driven and AI-driven approach enables us to deliver innovative and tailored solutions, ensuring successful and sustainable transformation.

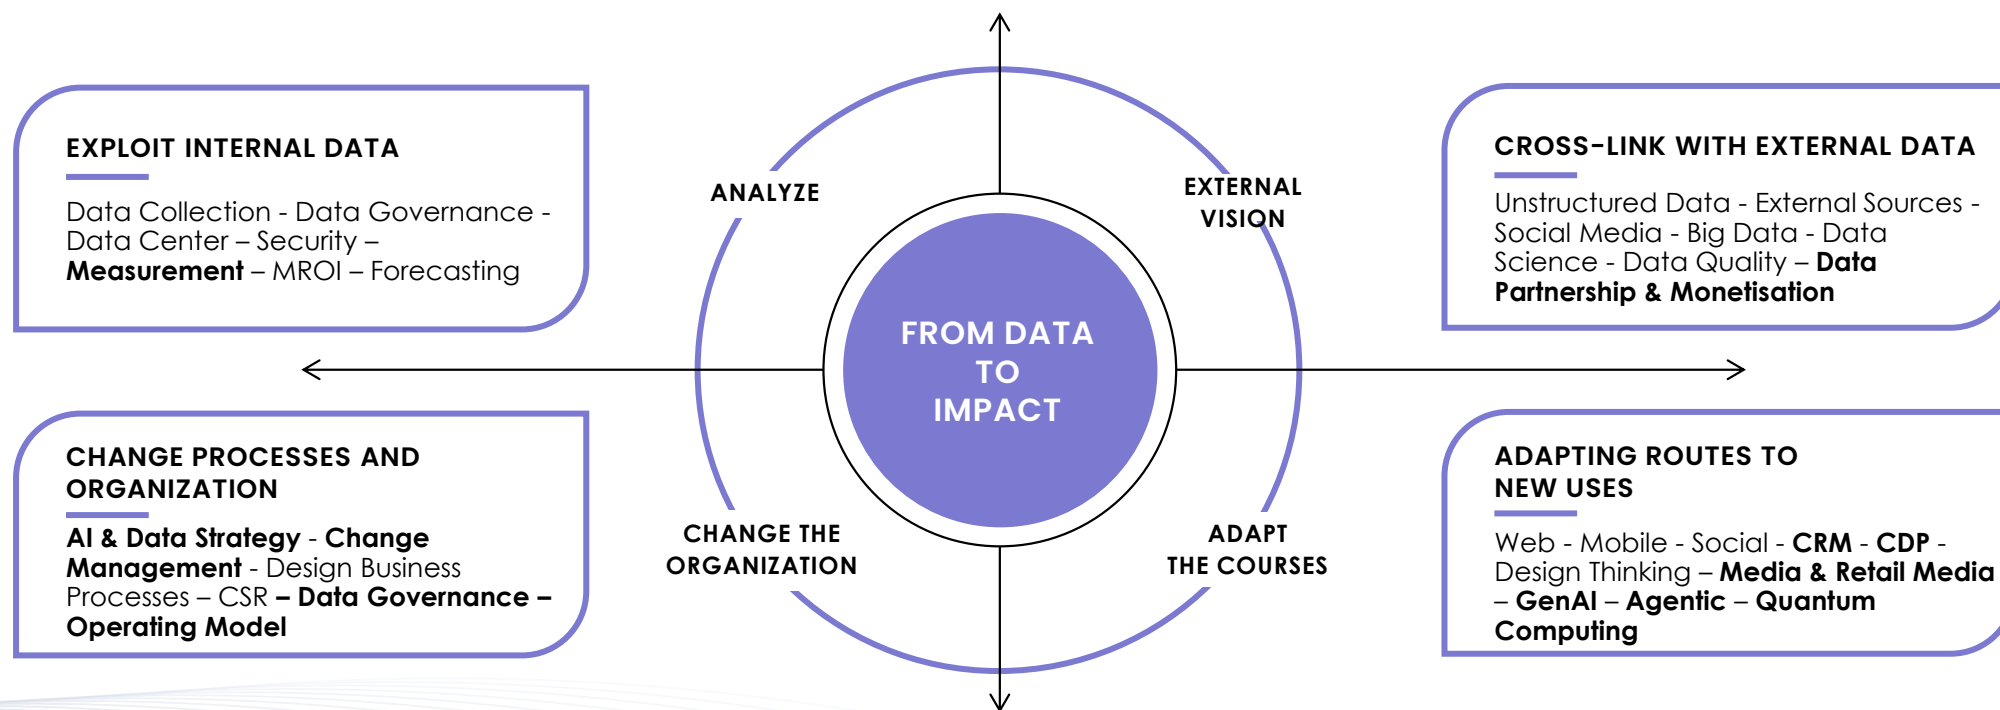

*Key Countries: France, Spain, Italy (en cours), Tunisia, UAE (en cours), LatAm (en cours)

OUR KNOW-HOW TO DEVELOP DATA & AI SOLUTIONS

Our expertise in Data and Artificial intelligence (AI) is based on a deep understanding of advanced data processing and analysis techniques. We develop innovative solutions capable of extracting valuable insights and making informed decisions in real time, also powered by Quantum Computing, GenAI and Agentic. Our teams, composed of data scientists and AI engineers, collaborate closely to design high-performing predictive models, enhance process automation, and provide personalized services, enabling our clients to stand out in a constantly evolving competitive environment.

OUR EXPERTISE IN IMPLEMENTING A 360° DATA & AI APPROACH

Operational performance necessarily relies on data exploitation. Whether internal or external, structured or unstructured, in real time or batch, this data must be stored, structured, governed, and exploited to improve processes and knowledge (customers, objects, processes, employees), in order to optimize operations and reduce costs. Exemplary use of data must enable the company to become a leader in its sector and withstand competition from new entrants.

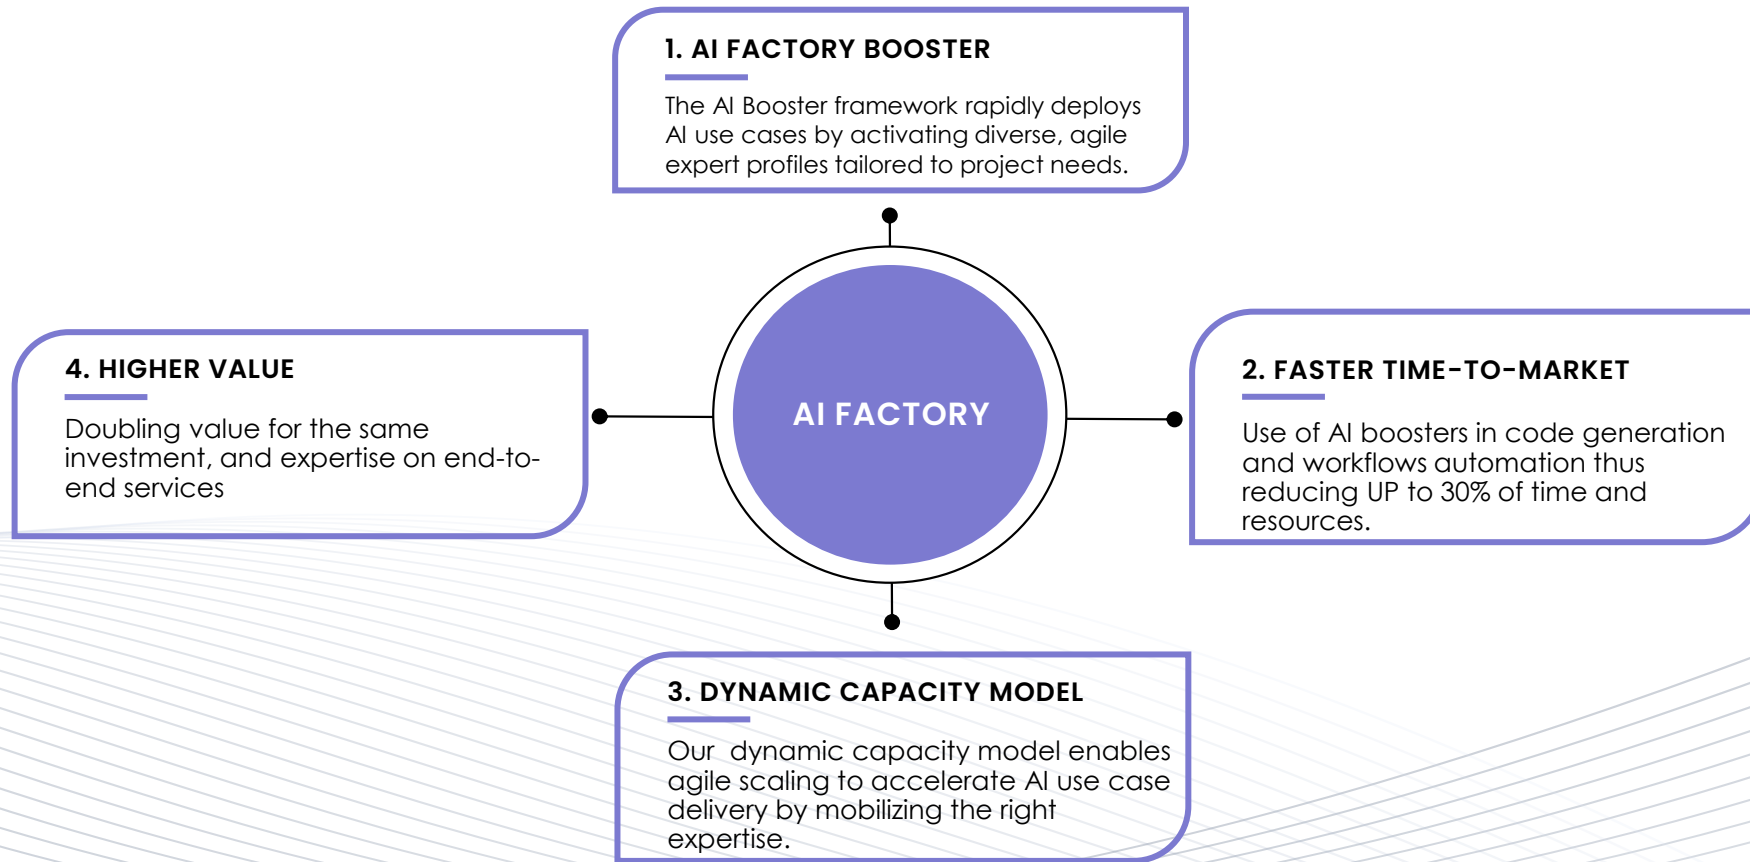

AI FACTORY

WHY WIMBEE ?

With years of hands-on experience in Data & AI, Wimbee brings end-to-end expertise and agile delivery to help clients navigate talent scarcity and accelerate value creation in the age of intelligent transformation.

This innovative positioning is illustrated through four strategic levers that reflect our unique approach and proven impact:

CUSTOMIZED EXPERTISE FOR EVERY USE CASE

Wimbee offers a framework based on the rapid deployment of highly experienced consultants (AI Factory), carefully selected for their specific expertise to address the precise needs of our clients; The right skills at the right timing in an agile scrum environment.

Our talent pool represents a unique foundation of expertise, combining advanced technical skills with a deep understanding of business challenges.

This synergy between technological know-how and business acumen is the hallmark of Wimbee, ensuring the success of every project we undertake.

AI FACTORY

The right skills, at the right timing, for real impact

Dynamic & agile Setup

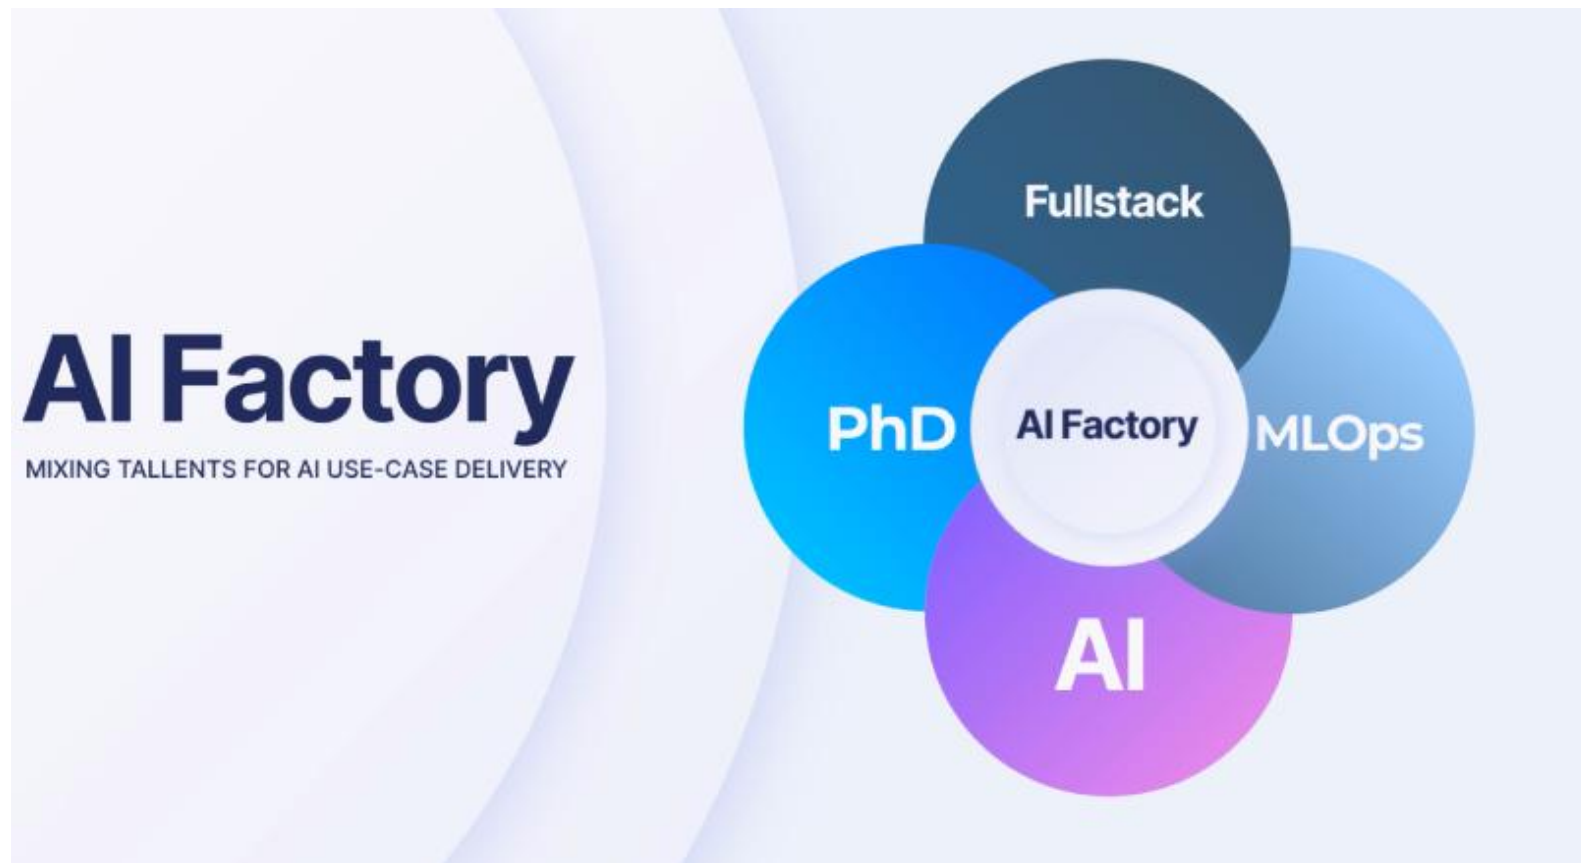

Attracting diverse talents:
Data scientist, MLOPS, fullstack,
Ci-CD, Econophysics, AI PhD.
We activate **the right talent at
the right moment**

End-to-end solutions

Our teams are experienced in
delivering end-to-end AI
solutions fully integrated into
client platforms.

Technology watch

Continuous monitoring of
emerging AI technologies
and frameworks to deliver
the most relevant, efficient,
and future-ready solutions to
our clients.

Resources	- Resource setup by WIMBEE, located at Wimbee office - The client books capacity units (at least 2 FTE per use case) - Wimbee manage this capacity to choose the right talent for the right need at the right time to maximize value - Wimbee provides a flexible capacity (up and down) aligned with client's strategic goals.
Single point of contact	A single point of contact (SPOC) from Wimbee, managing : - resources capacity & optimization - needed support, Management
Unique rate per resource	A unique rate for all involved resources
Pricing	Our services will be invoiced at the end of the month based on: - Allocated capacity per month (example : capacity = 2 FTE) - Number of working days per month

AI-POWERED DOCUMENT FRAMEWORK – DOCULINK

A smart framework designed to transform **unstructured documents** into **actionable, high-value data**.

In a world where over 80% of enterprise data is unstructured, like PDFs, emails, scanned documents, images, and chat logs, organizations need a way to extract meaning, **structure it**, **enrich it**, and ultimately, **make smarter decisions faster**.

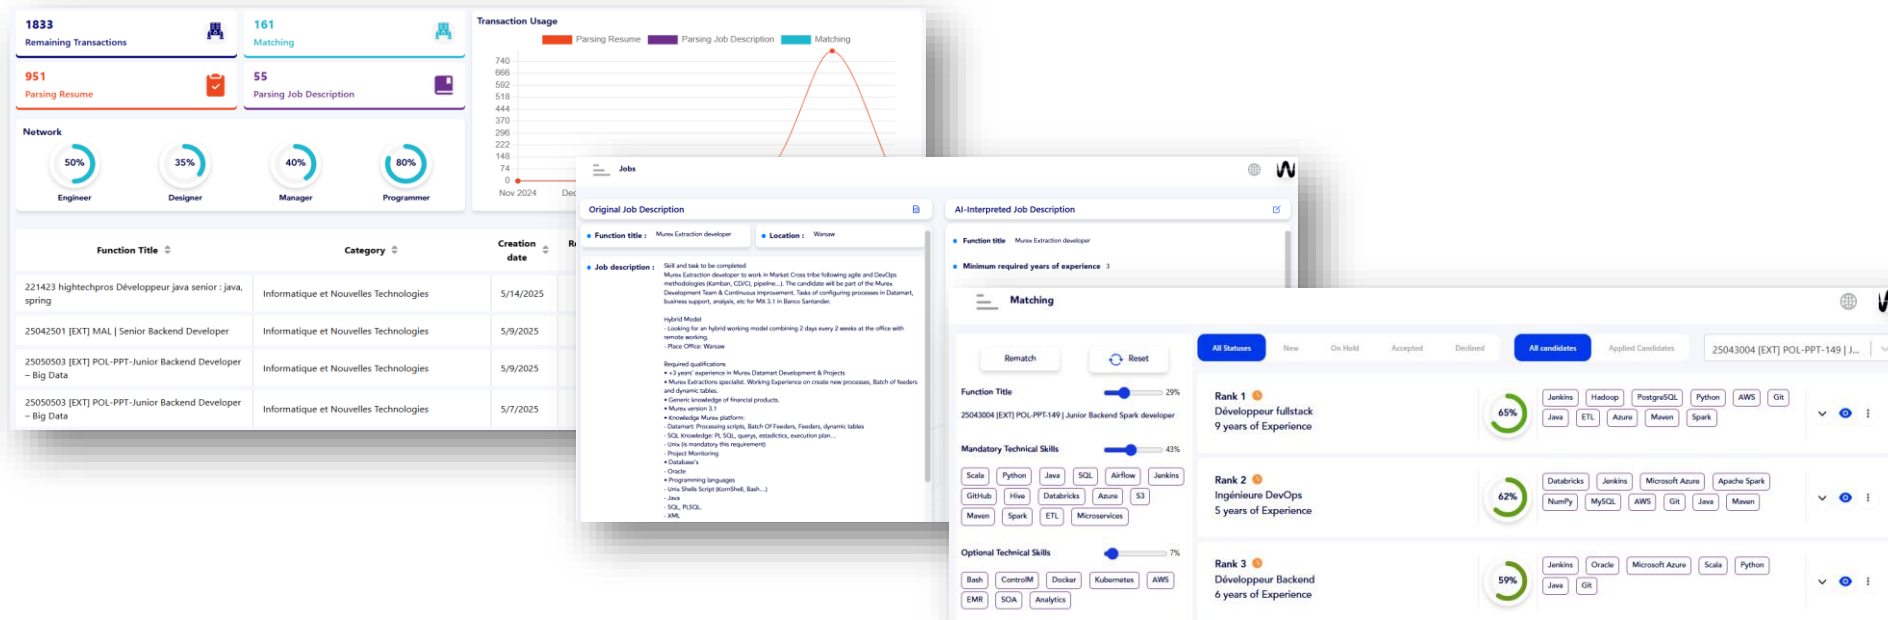

AI-POWERED MATCHING ENGINE – PROFILINK

Unlock the Full Power of Your Recruitment Data

Recruitment isn't just about managing CVs — it's about making **the right match, at the right time, with precision.**

Profilink is an intelligent matching engine that transforms your entire hiring process. It centralizes your job offers, CV database, and candidate applications into one powerful platform — delivering **AI-driven scoring, matching, and end-to-end tracking.**
