

Ukrainian Automotive and Mobility Cluster (UAMC)

Empowering Ukraine's Automotive and Mobility Ecosystem

About Us

Ukrainian Automotive and Mobility Cluster (UAMC) is an industrial community uniting manufacturers, suppliers, service providers, research institutions, universities, associations, and public authorities. UAMC is committed to advancing a resilient, innovative, and internationally integrated automotive and mobility ecosystem in Ukraine.

Vision

To position Ukraine as a trusted and competitive location for automotive manufacturing – a reliable partner, an attractive employer, and a driver of innovation and smart mobility.

Mission

To create and support favorable conditions for sustainable growth, innovation, and business resilience in Ukraine's automotive and mobility sectors.

To Support Ukraine –

*Do Business with Ukraine
and Invest in Ukraine!*

Strategic Objectives

- Enhance the global visibility and competitiveness of Ukraine's automotive and mobility industries
- Promote production localization and integration into European value chains
- Support the development of smart mobility and infrastructure
- Strengthen capacities, innovation, and skills across the Ukrainian ecosystem

Strategic Projects & Collaborations

- Development Data Exchange
- Interreg Danube Region Programme – Fostering cross-border data integration and innovation in automotive supply chains
- Central Ukraine EDIH – UAMC is a core partner in this European Digital Innovation Hub, driving digital transformation for manufacturing SMEs
- RESIST II Euroclusters – Participation in EU-wide Euroclusters programs to strengthen innovation, supply chains, and resilience

Why Collaborate with UAMC?

- Access to an agile and resilient network of SMEs and R&D partners
- Deep engagement in European cluster networks, funding programmes, and policy dialogues
- Proven track record in organizing impactful events, building international partnerships, and delivering cross-border projects
- Strategic commitment to digitalization, skills development, green transition, and mobility innovation
